Re: Pay for Performance Projects
$H_2O$ Environmental, Inc.

Dear Mr. Hurst:

The pay-for-performance corrective action projects listed in the table below were awarded to $H_2O$ Environmental, Inc. ($H_2O$) between the dates of May 1997 and January 2000.

| Permit # | Site Name | Remove and Abandon Treatment System | Abandon Monitoring Wells |
|---|---|---|---|
| 04102 | City of Greenville | X | X |
| 00781 | SCDOT Bamberg Maintenance | X | |
| 02382 | Black's 66 | X* | X |
| 06851 | Spinx | X | |
| 09413 | Gaulden's Grocery | X | X |
| 15971 | Nesmith Well Contamination | X | |
| 16090 | Fmr Ellison's (Owens Well) | X | |
| 12335 | Crawford's Store | X | |

* Contact Mr. Tommy Keels at G&K Tank Services (803-799-0054) to pick up this trailer.

In the time since Groundwater & Environmental Services (GES) acquired $H_2O$, little work has been done to advance these projects toward completion. It has been determined that it is in the best interests of the UST Program to release GES/$H_2O$ from the listed contracts.

The release of GES/ $H_2O$ from these contracts is unconditional and will not prejudice any current or future work by your company. In accordance with the terms and conditions of the PfP contracts, you are to remove your equipment from the listed facilities, abandon the remediation wells, piping, electrical service, etc., and restore the sites to the conditions prior to corrective action (e.g., asphalt paved areas will be repaved with asphalt, concrete areas will be replaced with concrete, grass areas will have soil replaced to the original grade and reseeded or sodded with grass, etc.). The monitoring wells are to be abandoned only at the facilities indicated in the table above. The Department will make no further payments from the SUPERB Account. Your performance bonds will be returned as soon as completion of these activities has been verified by DHEC staff.

UST PROGRAM
DOCKETING # 2 Sealed

Please feel free to contact me at (803) 896-6249 if you have any questions or need additional information.

The Underground Storage Tank Management Division is currently directing cleanup of petroleum chemicals of concern (CoC) in groundwater at the referenced facility. Information regarding your inactive water supply well (CP-WW) is needed as part of the cleanup. Please check the appropriate response and return this form to the address listed below:

✓ An inactive water supply well is currently located on my property. I do not intend to use the well again and wish to have it properly abandoned by a SC-certified well driller. I understand that the Underground Storage Tank Management Division will provide all funding for the abandonment.

_____ An inactive water supply well is currently located on my property. I intend to keep the well for future use.

Subject: Aggressive Fluid Vapor Recovery Report
Crawford's Country Store
Antreville, South Carolina
SCDHEC Site ID # 12335; CA #41829
MECI Project Number 11-3449A
Certified Site Rehabilitation Contractor UCC-009

Dear Mr. Padgett,

On behalf of Mr. H. Franklin Crawford, Midlands Environmental Consultants, Inc. (MECI) is pleased to submit the attached Aggressive Fluid Vapor Recovery Report for the referenced site. This describes the aggressive fluid vapor recovery activities conducted at the site in general accordance with South Carolina Department of Health and Environmental Control (SCDHEC) guidelines.

**AGGRESSIVE FLUID VAPOR RECOVERY**

MECI personnel conducted an Aggressive Fluid Vapor Recovery (AFVR) event at Crawford's Country Store from July 18, 2011 to July 19, 2011. The event was conducted on monitoring wells MW-1R, MW-3, and OMW-1 to remove free phase petroleum product and reduce dissolved CoC concentrations. Free phase petroleum product was detected in monitoring well MW-1R at a thickness 0.06 feet and in OMW-1 at a thickness of 0.24 feet prior to the AFVR event. The event was conducted continuously for eight hours by MECI personnel utilizing a vacuum extraction unit. Free phase petroleum product was detected in the wells immediately following the event.

MECI treated the off gas produced during the AFVR event using an activated carbon filter system. Calculated total petroleum hydrocarbons removed from the well were 6.39 pounds or approximately 1.10 equivalent gallons. The average rate of removal for the hydrocarbons was calculated to be 0.80 pounds per hour. Concentrations of off gas produced during the event were recorded from 128 parts per million by volume (PPM) to 629 PPM. Measurements were obtained from vapors prior to entering off gas treatment. Vacuum readings were recorded at a range of 9.0 to 12.0 inches of mercury during the event. A complete compilation of measurements recorded is presented in attached Table 1A.

Post Office Box 854, Lexington SC 29071 • 235-B Dooley Road, Lexington, SC 29073
Telephone: (803) 808-2043 • fax: (803) 808-2048

Differential pressures and groundwater levels were measured and recorded for selected site monitoring wells at regular intervals. This data is summarized in the attached Table 2A. Monitoring well locations are depicted on attached Figure 1.

A total of 150 gallons of liquid was removed from MW-1R, MW-3, and OMW-1 during this event. Free phase petroleum product was not observed in the holding tank at the end of the event. The fluids produced were transported to TK Tank Services of Sumter, S.C. for disposal. A disposal manifest for these fluids is attached at the end of this report.

## QUALIFICATIONS OF REPORT

The activities and evaluative approaches used in this assignment are consistent with those normally employed in enhanced fluid recovery events and waste management projects of this type. Contents of this report are intended for the use by Mr. H. Franklin Crawford, MECI and the South Carolina Department of Health and Environmental Control, under mutually agreed upon terms and conditions. If other parties wish to rely on this report please contact MECI prior to their use of this information so that a mutual understanding and agreement of the terms and conditions of our services can be established.

Midlands Environmental appreciates the opportunity to offer our professional environmental related services to you on this project. Please feel free to contact us at 803-808-2043 if you have any immediate questions or comments.

Sincerely,
**Midlands Environmental Consultants, Inc.**

Subject: Aggressive Fluid Vapor Recovery Report
Crawford's Country Store
Antreville, South Carolina
SCDHEC Site ID # 12335; CA #41829
MECI Project Number 11-3449B
Certified Site Rehabilitation Contractor UCC-009

Dear Mr. Padgett,

On behalf of Mr. H. Franklin Crawford, Midlands Environmental Consultants, Inc. (MECI) is pleased to submit the attached Aggressive Fluid Vapor Recovery Report for the referenced site. This describes the aggressive fluid vapor recovery activities conducted at the site in general accordance with South Carolina Department of Health and Environmental Control (SCDHEC) guidelines.

**AGGRESSIVE FLUID VAPOR RECOVERY**

MECI personnel conducted an Aggressive Fluid Vapor Recovery (AFVR) event at Crawford's Country Store from August 31 and September 01, 2011. The event was conducted on monitoring wells MW-1R, MW-3, and OMW-1 to reduce dissolved CoC concentrations. Free phase petroleum product was not detected in monitoring wells MW-1R MW-3, and OMW-1 prior to the AFVR event. The event was conducted continuously for eight hours by MECI personnel utilizing a vacuum extraction unit. Free phase petroleum product was detected in the wells immediately following the event.

MECI treated the off gas produced during the AFVR event using an activated carbon filter system. Calculated total petroleum hydrocarbons removed from the well were 9.76 pounds or approximately 1.69 equivalent gallons. The average rate of removal for the hydrocarbons was calculated to be 1.22 pounds per hour. Concentrations of off gas produced during the event were recorded from 195 parts per million by volume (PPM) to 1,901 PPM. Measurements were obtained from vapors prior to entering off gas treatment. Vacuum readings were recorded at a range of 5.0 to 22.0 inches of mercury during the event. A complete compilation of measurements recorded is presented in attached Table 1B.

Post Office Box 854, Lexington SC 29071 • 235-B Dooley Road, Lexington, SC 29073
Telephone: (803) 808-2043 • fax: (803) 808-2048

Differential pressures and groundwater levels were measured and recorded for selected site monitoring wells at regular intervals. This data is summarized in the attached Table 2B. Monitoring well locations are depicted on attached Figure 1.

A total of 185 gallons of liquid was removed from MW-1R, MW-3, and OMW-1 during this event. Free phase petroleum product was not observed in the holding tank at the end of the event. The fluids produced were transported to TK Tank Services of Sumter, S.C. for disposal. A disposal manifest for these fluids is attached at the end of this report.

## QUALIFICATIONS OF REPORT

The activities and evaluative approaches used in this assignment are consistent with those normally employed in enhanced fluid recovery events and waste management projects of this type. Contents of this report are intended for the use by Mr. H. Franklin Crawford, MECI and the South Carolina Department of Health and Environmental Control, under mutually agreed upon terms and conditions. If other parties wish to rely on this report please contact MECI prior to their use of this information so that a mutual understanding and agreement of the terms and conditions of our services can be established.

Midlands Environmental appreciates the opportunity to offer our professional environmental related services to you on this project. Please feel free to contact us at 803-808-2043 if you have any immediate questions or comments.

UST 13ecd DOCKETING

MR H FRANKLIN CRAWFORD
5870 SC-28 N
ANTREVILLE SC 29620

OCT 20 2011

Re: Water supply well abandonment directive
Crawford's Country Store, 5870 SC-28 North, Antreville, SC
UST Permit #12335; CA #42536
Release reported December 3, 1991
Abbeville County

Dear Mr. Crawford:

On June 28, 2011, the Underground Storage Tank (UST) Management Division received a water supply well information form that indicates your desire to abandon water supply well CP-WW located on your property. Accordingly, the Division requested that your contractor of choice, Midlands Environmental Consultants, Inc., secure a price quote for the abandonment from a SC-licensed well driller.

The Division received a response in the amount of $762.00 from Environmental Drilling and Probing Services, LLC (EDPS) on October 11, 2011. Since the Division considers the price quote to be fair and reasonable for the scope of work, the quote has been accepted.

Cost Agreement (CA) #42536 has been approved in the amount shown on the enclosed cost agreement form for the water supply well abandonment. Midlands and EDPS may proceed with the water supply well abandonment upon receipt of this correspondence. The abandonment must be conducted in accordance with the UST Quality Assurance Program Plan (QAPP) and with the South Carolina Well Standards and Regulations (R. 61-71). A brief report documenting the abandonment and completed SCDHEC 1903 Water Well Record must be submitted to the Division within 90 days of the date of this correspondence.

Midlands can submit an invoice direct billing from the SUPERB Account. The invoice must be submitted within 120 days of the date of this correspondence or monies allocated to pay the invoice will be uncommitted. This means that the invoice will not be processed for payment until all other committed funds are paid or monies become available.

Please note that Sections 44-2-110(4) and 44-2-130 of the SUPERB Statute state that no costs will be allowed unless prior approval from the SCDHEC is obtained. If for any reason additional tasks will be completed, these additional tasks and the associated cost must be pre-approved by the Department for the cost to be paid. SCDHEC reserves the authority to pay only for work properly performed and/or technically justified and will only pay rates in accordance with established criteria. Further, SCDHEC reserves the right to question and/or reject costs if

deemed unreasonable and the right to audit project records at any time during the project or after completion of work.

On all correspondence concerning this site, please reference UST Permit #12335. If there are any questions concerning this scope of work, please feel free to contact me by telephone at (803) 896-6398, by fax at (803) 896-6145, or by e-mail at padgetjp@dhec.sc.gov.

Sincerely,

SUBJECT: Crawford's Country Store, 5870 SC-28 North, Antreville, SC
UST Permit #12335; CA #42536
Release reported December 3, 1991
Abbeville County

The inactive water supply well on the H. Franklin Crawford property near the Crawford's Country Store facility is considered a potential receptor for the referenced release. The property owner no longer needs the well and has elected to have it abandoned using funds from the State Underground Petroleum Environmental Response Bank (SUPERB) Account. The well is 6-inch diameter and approximately 34 feet deep. Since there is not a SUPERB allowable rate for the abandonment of a 6-inch water supply well, the UST Management Division requested that owner/operator's contractor, Midlands Environmental, provide price quotes for the abandonment. One solicitation for the abandonment has been received:

- Environmental Drilling and Probing Services, LLC $762.00

The price quote include costs to mobilize to and from the site, remove the well equipment, cut and pressure grout the well casing, clean up the site, and submit an abandonment report to Midlands Environmental. Since the quote is less than $2500.00, no additional quotes are required. The Division considers the price quote submitted by EDPS to be fair and reasonable for this work scope. Therefore the Division has accepted the price quote for the water supply well abandonment. The quote should be approved as a miscellaneous item under Cost Agreement #42536.

RE: Proposal to Provide Well Abandonment Services
Autryville, South Carolina
Proposal No. EDPS-11-1168

Dear Mr. Coleman:

Environmental Drilling and Probing Services, LLC (EDPS) is pleased to provide this proposal to conduct well abandonment services at the subject site. Based on our understanding of the project, EDPS proposes to conduct the following scope of services:

- Mobilize crew and equipment to the subject site.
- Abandon one 34-foot (6") diameter water supply well.

The above scope of work could be completed for an estimated total cost of $762.00. The following is a breakdown of the total estimated cost:

Mobilization.....$575.00
WSW Abandonment (34ft x $5.50/ft).....$187.00

**NOTES:**

- Assumes locations are accessible with truck mounted equipment.
- EDPS not responsible for any permits or utility locating that may be necessary for project.
- Proposal prices are good for 60 days.
- EDPS will submit the required Well Abandonment Record to the South Carolina DHEC at no charge.

We appreciate the opportunity to provide our services to you on this project. Please contact me at (704) 607-7529 to if you would like to discuss this Proposal or to schedule this work.

Sincerely,
EDPS

MR ROBERT BIEDERMAN
NATIONWIDE INSURANCE
PO BOX 80208
SIMPSONVILLE SC 29680

Re: Concern letter
Crawford's Country Store, 5870 SC 28 North, Abbeville, SC
UST Permit #12335
Petroleum release reported December 3, 1991
Abbeville County

Dear Mr. Biederman:

Per your request, the Underground Storage Tank (UST) Management Division is providing you with this update on environmental conditions and liability associated with the referenced facility.

According to Division records, Mr. Frank Crawford has operated ten underground storage tanks (USTs) at the Crawaford's Country Store facility to supply gasoline, diesel fuel, and kerosene. Five tanks were abandoned by removal in October 1991. Five replacement tanks have been operated from November 1991 to the present. The operating tanks were last inspected on September 8, 2011 and found to be in compliance with state and federal regulations.

On December 3, 1991, the Division received a report that documented a release of petroleum products at the facility. In response to the initial report of contamination, the Division directed the owner/operator on record, Mr. Frank Crawford, to assess the severity and extent of the petroleum contamination. Assessment work conducted from 2007 through 1999 confirmed and delineated petroleum contamination in groundwater at the site. In November 1999, the Division solicited bids to perform active corrective action (ACA) at the site to reduce the contamination to acceptable levels protective of human health and the environment. The successful bidder, $H_2O$ Environmental, began ACA in June 2000. ACA was performed until October 2004 when $H_2O$ went out of business. During ACA, an additional water supply well (CP-WW2) was installed at the facility to replace a water supply well (CP-WW) that had been impacted by petroleum. Since 2004, the Division has conducted periodic groundwater sampling and aggressive fluid and vapor recovery events (AFVR) to reduce petroleum contaminates at the facility. Recently, the Division directed the state lead contractor, Midlands Environmental Consultants, to abandon CP-WW with Mr. Crawford's permission. The Division will direct additional AFVR events in the near future.

The referenced release of petroleum products from the USTs is qualified to receive funding under the conditions of the State Underground Petroleum Environmental Response Bank (SUPERB) Act. This means that reasonable costs up to $1,000,000.00 can be paid by the SUPERB account for site rehabilitation associated with the release. Should cleanup costs exceed $1,000,000.00, Mr. Frank Crawford, pursuant to state and federal laws, retains responsibility for any additional site rehabilitation and

costs associated with the release. Division records show that a total of $224,327.79 of SUPERB funds has been expended on rehabilitation of the site.

In 1997, the General Assembly amended Section 80 (B) of the SUPERB Act to clarify that persons who hold "indicia of ownership" primarily to protect a security interest in property impacted by a release from a UST are exempt from the requirements to conduct site rehabilitation activities other than necessary abatement actions to eliminate any imminent threat to human health or the environment. The "indicia of ownership" exemption includes those persons who acquire title to property through foreclosure or other means necessary to protect their security interest, provided that person does not participate in the management of the UST and is not otherwise engaged in petroleum production, marketing, or refining. This applies equally to subsequent lenders who acquire the USTs and property through foreclosure in the future.

Please note there are currently no laws or regulations that prohibit the use, sale or development of properties at or near the location of a UST petroleum release. Should the current owner sell the property, the Division requests that the buyer coordinate with the Division to allow for continued access for necessary site rehabilitation activities.

If you have any questions, please contact me by telephone at (803) 896-6398, by fax at (803) 896-6245, or by e-mail at padgetjp@dhec.sc.gov.

Subject: Water Supply Well Abandonment
Crawford's Country Store
5870 SC-28 North
Antreville, South Carolina
SCDHEC Site ID# 12335, CA # 42536
MECI Project Number 12-3807

Dear Mr. Padgett:

On behalf of Mr. H. Franklin Crawford, Midlands Environmental Consultants, Inc. (MECI) is pleased to submit this letter report outlining the water supply well abandonment activities performed at the subject site. This describes the abandonment conducted at the site in general accordance with South Carolina Department of Health and Environmental Control (SCDHEC) guidelines.

One (1) water supply well was abandoned on March 8, 2012 at the subject site according to South Carolina Well Standards and Regulations R.61-71.H. The well abandonment was conducted under the direction of Mr. Tommy Bolyard (SC Driller's License # B 01846) of Environmental Drilling and Probing Services, Inc. of Rock Hill. SC. The following matrix presents the well identification numbers, surface coverings, well diameter, and total well depth:

| Well Number | Surface Covering | Well Diameter (Inches) | Total Depth (Feet) |
|---|---|---|---|
| WW-CP | Grass | 6" | 39.0 |
| Total Well Footage Abandoned | | | 39.0 |

The water supply well was abandoned with portland bentonite slurry utilizing tremie pipe. A total of 39.0 feet of water supply well was abandoned by the methods described above. Following the abandonment, monitoring wells that were located in paved areas were finished with an aggregate-reinforced concrete cap to the level of the surrounding pavement. Additionally, the well pad, vault, and cover were removed from wells located in unpaved areas and the resulting space was filled with backfill to the level of the surrounding land surface. Please find the attached SCDHEC 1903 Water Well Records and site maps.

Re: Underground Injection Control Permit #505
Crawford's Country Store, Site Id #12335
Abbeville County, South Carolina

Dear Mr. Crawford:

Enclosed is a Permit to Operate for ten (10) Class VA-I (Aquifer Remediation) injection well at the Crawford's Country Store as per your application.

Affected parties may appeal this permit decision in accordance with State Regulation R.61-72. To contest a case, a request for a hearing must be made to the Clerk of the DHEC Board within 15 days of the date of this letter. All requests must include the following information:

1) name of the party requesting the hearing,
2) issue(s) for which the hearing is requested,
3) caption or other information sufficient to identify the decision, order, action or inaction which is the subject of the hearing,
4) relief requested.

Note further that Administrative Law Judge (ALJ) Division rules require that persons requesting a contested case hearing must file a copy of the request and pay a filing fee in the amount of $100 dollars (US) with the ALJ Division at the following address:

Clerk, ALJ Division
1205 Pendleton Street, Suite 224
P.O. Box 11667
Columbia, SC 29211

If you have any questions, please feel free to call me at (803) 898-3549.

Sincerely,

Todd Adams, Hydrogeologist

**WATER MONITORING, ASSESSMENT AND PROTECTION DIVISION**

Injection Well Operating Approval
for

Class II, III, and V.A. Injection Well(s)

Permit #505 Date of Issue: August 9, 2002

In accordance with the provisions of Title 48, Chapter 1, South Carolina Code of Laws, 1976, as amended, and pursuant to receiving a Permit to Construct ten (10) Class V.A.-I (Aquifer Remediation) injection wells, authorization is granted to Mr. Crawford to operate ten (10) Class V.A.-I (Aquifer Remediation) injection wells located at the Crawford's Country Store, Abbeville County, and are subject to the attached provisos noted for the operator.

The Class V.A.-I (Aquifer Remediation) injection wells are a true diameter of 1 inch, a total depth of 10-30 feet located at the Crawford's Country Store, Abbeville County, South Carolina.

Pursuant to Title 48, Chapter 1, South Carolina Code of Laws, 1976, as amended, this authorization may be rescinded if these injection wells should, at any time, contaminate, pollute, or otherwise adversely affect other water in the vicinity or for any other conditions contained in R61-87, Title 48, Chapter 1, South Carolina Code of Laws, 1976, as amended.

COMMODITY: To perform corrective action of a petroleum release from a regulated underground storage tank site at Crawfords Country Store (UST Permit #12335), 5870 Hwy. 28 N., Abbeville, South Carolina

METHOD OF BID AWARD: Award will be made by total to the lowest responsive and responsible bidder.

UST PROGRAM DOCKETING # 18 tech

## SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL
## BID NUMBER: SB-9570-12/02/99-TC

### PURPOSE and SCOPE OF WORK

The Division of Underground Storage Tank (UST) Management of the South Carolina Department of Health and Environmental Control (DHEC) is seeking services to perform corrective action of a petroleum release from a regulated underground storage tank site in accordance with defined remediation goals. The objective is to remove free product AND/OR reduce the levels of chemicals of concern (CoC) in the ground water and subsurface soil to or below defined site specific target levels (SSTLs). All bidders must be South Carolina Certified Class I Site Rehabilitation Contractors. The scope of work defined in this bid invitation is to be implemented at Crawfords Country Store (UST Permit #12335), 5870 Hwy. 28 N., Abbeville, South Carolina for the release reported on December 3, 1991.

### SPECIAL CONDITIONS

1. CONTRACT PERIOD: The contract will be effective from date of award until the corrective action is complete as described in this contract.

2. This contract is for corrective action at only one (1) site in South Carolina. Compensation from the SUPERB Account is not considered a state contract for purposes of procurement or subject to state bid requirements in accordance with Section 44-2-130(D) of the SUPERB Act.

3. AWARD: Award will be made to a South Carolina Certified UST Site Rehabilitation Contractor based on the total cost of corrective action to SSTLs and removal or abandonment of assessment and rehabilitation items. The proposed implementation schedule to achieve the remediation goals, the removal of all equipment and abandonment of wells, (including pre-existing wells), trenches, etc. installed by the contractor, and the proposed remediation technology(ies) or method(s) must protect public health and the environment and be eligible for permitting by DHEC. The total cost, methods, and estimated time to complete the contract must also be advantageous to the State of South Carolina.

4. REASONABLE BID: DHEC reserves the right to reject any and all bids that appear to be above the customary and reasonable cost for the same scope of work in a similar geologic setting.

5. Contractor must agree to make positive efforts to use women and minority owned businesses and individuals.

6. AMENDMENTS: All amendments to this solicitation will be in writing from the DHEC Procurement Officer indicated on page one of this solicitation. DHEC will not be legally bound by any amendment or interpretation that is not in writing.

7. QUESTIONS: Questions or requests for information must be submitted in writing and received by 5:00 P.M.,November 9, 1999. After this date, no further questions will be addressed. A written response will be mailed to all requestors of the bid package. The questions may be faxed to Tripp Clark, fax number (803) 898-3505.

8. **NOTE . . . THE ONLY OFFICIAL CONTACT PERSON AT DHEC DURING THE BIDDING AND AWARDING PROCESS IS THE PROCUREMENT OFFICER INDICATED ON PAGE ONE OF THIS SOLICITATION. BIDDING CONTRACTORS ARE NOT TO CONTACT DHEC PERSONNEL LOCATED OUTSIDE THE BUREAU OF BUSINESS MANAGEMENT.**

9. The contractor will be required to treat the area where the petroleum chemicals of concern are above site-specific target levels (see figure #2). Verification that interim corrective action goals have been met will be based upon ground-water quality samples collected from monitoring wells OMW-1, MW-2, MW-3, MW-4, MW-5, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15, DMW-17, and water wells CLS-WW, and CP-WW. Verification that final corrective goals have been met will be based upon ground-water quality samples collected from all existing monitoring wells (including water wells CLS-WW and CP-WW), and additional verification wells and verification soil borings to be installed at locations designated by SCDHEC (see specification #10 for more detail).

## SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL
## BID NUMBER: SB-9570-12/02/99-TC

10. REPORTS: Deliver the reports to: SCDHEC, Division of UST Management, ATTN: **H. Reed Corley**, 2600 Bull Street, Columbia, SC 29201. A minimum of two (2) copies of each plan and two (2) copies of each report must be delivered to the above address. Based on permitting and other requirements, an engineering report, UIC permits, air modeling forms or NPDES Permits may be required. Please contact the Department for the exact number of copies of each document to be submitted.

11. INVOICING: Invoices will be submitted to: SCDHEC, Division of UST Management, ATTN: Financial Section, 2600 Bull Street, Columbia, SC 29201, using the Department's Corrective Action (CA) Bid Invoice form. The initial invoice must be received at the above address within four months of CAP approval or funds will be uncommitted as required by the Section 44-2-40(B) of the SUPERB Act. If funds are uncommitted the submitted invoice will be held until funding is available. Payment to the contractor will be a pay for performance system as follows:

A. Payment of forty percent (40%) of the total bid price will be made within 90 days of operation of the remediation system or implementation of corrective action as described in the approved corrective action plan (CAP), subject to the limitations of Section 44-2-40 of the SUPERB Act. The implementation should be documented in the first corrective action monitoring report.

B. Payment of thirty-five percent (35%) of the total bid price will be made based on removal of free product to .01 foot as verified in monitoring wells OMW-1, MW-2, MW-3, and MW-10 and achieving interim CoC mass reduction goals at the site as verified in monitoring wells OMW-1, MW-2, MW-3, MW-4, MW-5, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15, DMW-17, and water wells CLS-WW, and CP-WW. Payment will be made for interim goals of 25, 50, and 75 percent reduction of <u>total</u> CoC mass by the implementation of corrective action. **NOTE: Payment cannot be based on laboratory analyses for any well that has been used for injection unless that well has returned to ambient conditions.** The CoC mass requiring reduction is as follows:

CoC mass in parts per billion (mg/l) based on 08/05/99, sampling: (CoC may increase or decrease in the future)

| Well | Benzene | Toluene | Ethylbenzene | Xylenes | MTBE | Naphthalene | Total Mass |
|---|---|---|---|---|---|---|---|
| OMW-1** | 226,000 | 301,000 | 280,000 | 278,000 | 5,110,000 | 2,000 | 6,197,000 |
| MW-2** | 226,000 | 301,000 | 280,000 | 278,000 | 5,110,000 | 2,000 | 6,197,000 |

| CP-WW+ | 81 | 1 | <1 | 10 | 35 | <5 | 133 |
| Initial Mass* | 929,859 | 1,304,760 | 1,127,869 | 1,157,245 | 20,592,083 | 9,869 | 25,121,685 |
| SSTL Mass | 61 | 7,280 | 5,109 | 70,245 | 473 | 209 | 83,377 |
| Initial Mass above SSTL | 929,798 | 1,297,480 | 1,122,760 | 1,087,000 | 20,591,610 | 9,660 | 25,038,308 |

* CoC mass may change due to seasonal fluctuations in the groundwater.

** Contains free phase product (OMW-1 {1.05 ft.}, MW-2 {2.29 ft.}, MW-3 {1.01 ft.}, and MW-10 {1.01 ft.}) initial mass based on maximum solubility limits

\+ Sample collected December 1997

(1) 25 percent total mass reduction will be achieved when free product has been removed to .01 foot from OMW-1, MW-2, MW-3, and MW-10, and one-quarter of the initial BTEX, MTBE, and Naphthalene mass from monitoring wells OMW-1, MW-2, MW-3, MW-4, MW-5, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15, DMW-17, and water wells CLS-WW, and CP-WW is removed compared to the SSTLs. The following formula will be used to calculate the percent total mass reduction: total mass above SSTLs from initial sampling less total mass above SSTLs from subsequent sampling divided by total mass above SSTLs from initial sampling. Payment of 10 percent (10%) of the total bid price will be made upon verification (see Specifications item 10 for the method of verification) of at least one-quarter of the total CoC mass above SSTLs is removed.

(2) 50 percent total mass reduction will be achieved when one-half of the initial BTEX, MTBE, and Naphthalene mass from monitoring wells OMW-1, MW-2, MW-3, MW-4, MW-5, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15, DMW-17, and water wells CLS-WW, and CP-WW is removed as compared to the SSTLs. The formula outlined in item 11. B. (1) will be used. Payment of 10 percent (10%) of the total bid price will be made upon verification (see Specifications item 10 for the method of verification) of at least one-half of the total CoC mass above SSTLs is removed.

(3) 75 percent total mass reduction will be achieved when three-quarters of the initial BTEX, MTBE, and Naphthalene mass from monitoring wells OMW-1, MW-2, MW-3, MW-4, MW-5, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15, DMW-17, and water wells CLS-WW, and CP-WW is removed as compared to the SSTLs. The formula outlined in item 11 B (1) will be used. Payment of 15 percent (15%) of the total bid price will be made upon verification (see Specifications item 10 for the method of verification) of at least three-quarters of the total CoC mass above SSTLs is removed.

SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL
BID NUMBER: SB-9570-12/02/99-TC

C. **The final 25 percent (25%) of the total bid price will be paid upon: 1) verification that the thickness of free product does not exceed .01 foot and the levels of CoC do not exceed the site-specific target levels (SSTLs) defined in item 11.C. at any point in the area of concern (see figure #2). Verification that the SSTLs have been met will be based upon ground-water quality samples collected from all existing monitoring wells, additional verification wells, and soil quality samples from verification soil borings to be installed at locations designated by DHEC (see specification #10 for more detail); and 2) all remediation and assessment items installed by the contractor (e.g., wells [including preexisting wells], trenches, etc.) are removed from the site or properly abandoned.** The SSTLs are as follows:

Site Specific Target Levels (SSTLs) in parts per billion (mg/l)

| Well | Benzene | Toluene | Ethylbenzene | Xylenes | MTBE | Naphthalene |
|---|---|---|---|---|---|---|
| OMW-1 | 5 | 1,000 | 700 | 10,000 | 40 | 25 |
| MW-2 | 5 | 1,000 | 700 | 10,000 | 40 | 25 |
| MW-3 | 5 | 1,000 | 700 | 10,000 | 40 | 25 |
| MW-4 | 5 | 1,000 | 700 | 10,000 | 40 | <5** |
| MW-5 | 5 | 1,000 | 700 | 10,000 | 40 | 25 |
| MW-7 | <1** | <1** | <1** | <1** | <1** | <1** |

* Laboratory analysis is less than calculated SSTLs; therefore, SSTL mass is set equal to laboratory mass.

** Laboratory analysis is below detection limits; therefore, SSTL masss is set equal to detection limits.

1. NOTIFICATION FOR FAILURE TO PERFORM: If the contractor fails to meet any specification of corrective action as outlined in this document, DHEC will notify the contractor by certified letter of the deficiency (ies). If the contractor does not correct the deficiency(ies) within 30 days, the contractor will be in breach of contract and the bid award may be voided by DHEC. DHEC will notify the contractor by certified letter that the bid award is void and any invoices are payable upon review and approval of DHEC. If the contractor corrects the deficiency(ies) within 30 days, the bid award will continue. Please note contractor-owned items used on-site for the contract that are destroyed by acts of nature, improper maintenance or handling, theft or vandalism will not be replaced or reimbursed by the SUPERB fund. The accepted bid will be final and will not be increased or cancelled for any reason (e.g., unanticipated iron fouling of a system, wells clogging because of biological activity or sediments, increased subcontractor costs, loss of utilities, modification to the system to meet the remediation goals, etc.) with the exception of unforeseen geologic circumstances or identification of additional CoC from another release.

2. SITE SPECIFIC DETAILS: A brief technical summary of the release, including a location map and specifics of existing wells, is attached. The detailed technical file will be available for review through the Freedom of Information (FOI) Office located on the third floor of the Sims Building, 2600 Bull Street, Columbia, SC. **Review of the detailed technical file is not mandatory; however, bidders are strongly encouraged to review the file to ensure a complete understanding of the contract requirements. The successful bidder will be responsible for all information included in the technical file.** Appointments to view the technical file may be scheduled on weekdays between the hours of 8:30 A.M. to 5:00 P.M. by calling the SCDHEC Freedom of Information Office at (803) 898-3882. Please request file #12335.

3. **The contractor will submit a CAP within 30 days of Statement of Award notification from the Bureau of Business Management in accordance with Specification item 2.** The implementation of the CAP will be initiated immediately upon Departmental approval of the CAP and all associated permit(s), and in accordance with the schedule presented in the bid. A performance bond or irrevocable standby letter of credit, equal to the award price, will be required by DHEC. The issuing institution for an irrevocable standby letter of credit must be an entity that has the authority to issue letters of credit in South Carolina and whose letter-of-credit operations are regulated and examined by a federal or state agency. The original performance bond or irrevocable standby letter of credit will be submitted to the Division of UST Management, Attn: Chris Doll, within 30 days of award. The performance bond or irrevocable standby letter of credit will specify that the SUPERB Account will be the recipient of any forfeiture.

4. **MINIMUM REQUIREMENTS: Corrective action will be considered complete once the levels of CoC in the area of concern (see figure #2) are verified to be at or below the SSTLs listed in item 11.C., and removal or abandonment of all remediation and assessment items installed by the contractor (e.g., wells [including preexisting wells], trenches, etc.). See Specification #10 for the method of verification.** All rehabilitation activities associated with a UST release must be performed by a SCDHEC certified Class I site rehabilitation contractor as required by R. 61-98. All corrective action plans and reports must be sealed by a Professional Engineer or Professional Geologist registered in the State of South Carolina. All engineering reports, drawings and plans must be sealed by a Professional Engineer registered in the State of South Carolina. All laboratory analysis for CoC must be performed by a SC certified laboratory. All monitoring, verification, injection, or recovery wells must be installed and abandoned by a SC certified well driller. All applicable certification, training, permits, applications, and fees associated with well installation; injection, discharge, treatment, or transportation of ground water, air, or soil; construction or operation of a remediation system; and any other action requiring a permit are the responsibility of the contractor. Any required business or occupation license and occupational safety and health training (e.g., OSHA) as defined by the laws and regulations of the United States of America, State of South Carolina, county or city is also the responsibility of the contractor. The terms and conditions of all applicable permits will be met. Any contaminated ground water, soil, or construction material must be properly transported and disposed of, or treated at an approved facility with prior approval from DHEC. Any costs for utilities construction and service (electric, telephone, sewer, etc.) required by the corrective action are the responsibility of the contractor.

**SPECIFICATIONS for CORRECTIVE ACTION**

The successful contractor must meet the following specifications as required by the proposed treatment method(s) or corrective action technology(ies):

1. Submit a CAP bid proposal. The proposal will outline in general terms an approach to achieve the remediation goals (e.g., reduction of each CoC to SSTL). The proposal must outline the following:

   A. A description of the proposed treatment method(s) or technology(ies) for corrective action.

   B. The total cost (in thousands of dollars) to complete site rehabilitation to meet the remediation goals and to remove or abandon all assessment and remediation items installed as part of corrective action.

   C. The estimated amount of time in months to complete site rehabilitation to meet the remediation goals, install verification wells, and remove or abandon all assessment and remediation items installed as part of corrective action.

2. Complete and submit a detailed CAP (three copies) for the release at Crawford's Country Store, 5870 Hwy. 28 N., Abbeville, South Carolina **within 30 days of Statement of Award notification by the Bureau of Business Management. NOTE: *Use of monitoring well(s) for injection purposes is not allowed.*** A condition of the plan may include installation of additional recovery, sparge, compliance, or injection wells. The plan must define all active (pump and treat, sparge, vapor extraction, excavation of impacted soils, bioremediation, etc.) and passive (intrinsic remediation, monitoring, etc.) corrective action method(s) proposed to reduce CoC to SSTLs. It must be shown, by use of scientific models, computations, or discussion, how each CoC will be reduced to the SSTL for each remediation method proposed for the release. Any assumptions used in a model will be listed or shown, as well as, appropriate references. Intrinsic corrective action will require monitoring to verify remediation. General construction details will be included (e.g., install four additional recovery wells, construct a compliance point, install four air injection wells, excavate 3,000 cubic yards of impacted soils, etc.) as well as details of well abandonment and equipment removal. A remediation timetable including abandonment of wells and removal of equipment will be included with the CAP. The Division of UST Management will review the CAP and initiate a public notice period for a maximum of 30 days. The contractor must obtain a copy of the applicable portion of the tax map. This map will depict the location of the facility,

and all impacted properties, and all properties located adjacent to the impacted properties. The names and addresses of the owners of each of these properties will be provided. The contractor may be required to attend or provide input at a public meeting upon request by DHEC. Any CAP amendments and modifications arising from public notice must be submitted within 15 days of notification by DHEC. The CAP and any amendments or modifications must be sealed by a qualified Professional Engineer or Geologist registered in the State of South Carolina. The owner/operator, Frank Crawford, will be consulted and will approve the location of the corrective action system. If permanent, the system must be enclosed in a fenced area or small building. The initial invoice must be received at the above address within four months or funds will be uncommitted as required by the SUPERB Act. If funds are uncommitted this invoice will be held until funding is available.

An initial monitoring report documenting CoC concentrations in all wells and potentiometric conditions prior to start up (including verification of system operation or CAP implementation) must be submitted to the Division of UST Management within 45 days after award. Sampling for the initial monitoring report must occur prior to system startup.

Based on naturally occurring conditions, the dissolved concentration of petroleum chemicals of concern (CoC) will increase or decrease. For the purposes of this contract, the total CoC mass for the wells included in the bid package may reasonably increase up to 150 percent or decrease as much as 50 percent. If the total CoC concentration in all wells listed in Special Condition 11.B. increases more than 150 percent based on this initial sampling or if measurable free product that has not been previously documented in any report is detected during the initial sampling event, the contractor may request in writing that the award be canceled. **If either of these conditions occurs, the contractor will contact the UST project manager within two days of problem identification and will submit written documentation within five days of notification.** The contractor will be reimbursed for one personnel mobilization to collect samples, one sample collection and one analytical fee each monitoring well sampled as outlined in SUPERB Allowable Costs, plus $6,000 for all other costs incurred (e.g., CAP preparation, obtaining performance bond, business license). The contract will be canceled and the performance bond will be returned to the company. If the total CoC concentration in all wells listed in Special Condition 11.B. decreases more than 50 percent based on this initial sampling the DHEC may cancel the award. If the corrective action system is started or treatment is performed, the contractor will be required to complete the contract unless geological conditions change or another release is confirmed. See special condition 12. If the contract is canceled by DHEC, the contractor will be notified by certified letter and an invoice for the above outlined items shall be submitted within 20 days from the date of the certified letter canceling the contract.

3. Complete and submit all applications for permits (injection, NPDES, BAQC modeling form, thermal treatment, construction, etc.; 3 copies) and an engineering report (ER; 4 copies) with the CAP. Any required permit changes or corrections will be submitted within 15 days of notification by DHEC. The ER and any ER amendments and modifications, must be sealed by a Professional Engineer registered in the State of South Carolina. After review of the CAP and all permit applications by DHEC, the Division of UST Management will issue a notice to proceed with CAP implementation.

   Implementation of the corrective action plan before the completion of the public notice process and approval of all permits by DHEC is not authorized. If premature implementation occurs, the Department will not reimburse those costs from the SUPERB Account, and the bid award will be reduced by that amount. If the Department agrees with early implementation to better protect human health in an emergency and provides approval in writing, early implementation without any reduction to the bid amount will be authorized.

4. Implement the CAP within 30 days of receipt of notice to proceed and any required permit to construct. Disruption to the owner/operator's normal business will be kept to a minimum. Upon completion of any required construction, DHEC will inspect the system and issue a permit to operate.

5. Gain access to the adjacent property to sample monitoring wells and to install any corrective action equipment, as required.

6. Initiate system startup within 15 days of receipt of the permit to operate. Remediation as defined in the CAP and ER will begin upon system startup. **If any problem with CAP implementation occurs, the contractor will contact the UST project manager within 24 hours of problem identification and will submit written documentation within five days of notification.** ***Note: The application of corrective action technologies can result in the mobilization and possible increase in the thickness of free phase product or elevated CoC concentrations in the monitoring wells.***

7. Complete and submit a corrective action monitoring report (first quarterly due within 90 days of the date of the permit to operate and quarterly thereafter) 3 copies plus one copy for any DHEC Bureau that issued a permit) on a quarterly basis. The corrective action monitoring reports must include:

   A. A narrative portion that documents current site conditions and system effectiveness in achieving the remediation goals (e.g., free product removal, reducing CoC to the SSTLs) as outlined in the CAP. Any system down time and the associated reason(s) will be included in the report.

   B. Conclusions and recommendations based on the reported data.

   C. Ground-water laboratory analytical data for all monitoring wells in the following format (additional parameters such as dissolved oxygen may be required; do not sample wells containing free product):

Analytical Data (mg/l)

| Monitoring Well | Date | Benzene | Toluene | Ethylbenzene | Xylenes | MTBE | Naphthalene |
|---|---|---|---|---|---|---|---|
| MW-1 | 7/15/97<br>10/15/97 | 145<br>140 | 200<br>190 | 146<br>140 | 1,000<br>900 | 170<br>50 | 47<br>165 |
| MW-2 | 7/15/97<br>10/15/97 | 580<br>480 | 800<br>690 | 300<br>257 | 1,000<br>912 | 60<br>50 | 20<br>19 |

   D. Ground-water potentiometric data for all monitoring wells in the following format:

Ground water Data (feet)

| Monitoring Well | Date | TOC Elevation | TOC to GW | TOC to FP | FP Thickness | GW Elevation |
|---|---|---|---|---|---|---|
| MW-1 | 7/15/97<br>10/15/97 | 98.0<br>98.0 | 17.54<br>17.90 | | | 80.46<br>80.10 |
| MW-2 | 7/15/97<br>10/15/97 | 100.0<br>100.0 | 20.50<br>21.50 | 20.47<br>21.48 | 0.03<br>0.02 | 79.50<br>78.50 |

E. A ground-water elevation contour map of the site based on current ground-water potentiometric data.

F. A CoC map based upon current ground-water laboratory analytical data. The ground-water data should be adjacent to the relevant monitoring well using the following format (additional parameters such as dissolved oxygen may be required):

MW - Number
Benzene (mg/l)
Toluene (mg/l)
Ethylbenzene (mg/l)
Xylenes (mg/l)
MTBE (mg/l)
Naphthalene (mg/l)

G. A copy of the DHEC approval letter and manifests for any contaminated soil and ground-water removed from the site for treatment and/or disposal.

H. Additional data required by permits (e.g., air analyses, wastewater effluent analyses and amounts, etc.). The data should be reported on a form or in a format specified in the permits, and attached to the monitoring report as an addendum.

All rehabilitation activities associated with the UST release must be performed by a SCDHEC Certified Site Rehabilitation Contractor. All air, soil, and ground-water analyses must be performed by a South Carolina certified laboratory. The corrective action monitoring report must be sealed by a Professional Engineer or Geologist registered in the State of South Carolina. All monitoring wells associated with the release will be sampled on a quarterly basis for the first year. Thereafter, the number of wells sampled may be reduced and/or the interval between corrective action monitoring reports may be lengthened upon clear demonstration of CoC reduction, unless restricted by permit requirements. DHEC may require data to be reported on a form or in a specific format. The contractor will be provided with the proper report forms and format prior to system startup. The contractor will be notified of any revisions to the report forms or format 90 days prior to the due date for the corrective action monitoring report.

8. Collect one (1) ground-water sample per monitoring event for all monitoring wells associated with the release. Each well should be purged prior to sampling. Purging is considered complete once the ground-water temperature and pH have stabilized. Sampling logs should note all temperature and pH measurements, as well as the location and type of each sample submitted for laboratory analysis. Each ground-water sample will be collected in accordance with established QA/QC protocol and submitted to a certified laboratory for analysis. The ground-water samples must be analyzed for the following parameters:

| Analyte | Analytical Method* | Reporting Limit (mg/l) |
|---|---|---|
| BTEX | 8260B/5030B | 5 |
| Naphthalene | 8260B/5030B | 5 |
| MTBE | 8260B/5030B | 5 |

*or EPA equivalent method that can achieve the same reporting level

The soil samples must be analyzed for the following parameters:

| Analyte | Analytical Method* | Reporting Limit (mg/kg) |
|---|---|---|
| BTEX | 8260B/5030B | 5 |
| Naphthalene | 8260B/5030B | 5 |

*or EPA equivalent method that can achieve the same reporting level

Additional samples (air, groundwater, effluent, soil) required by permits must be collected in accordance with established QA/QC protocol and submitted to a certified laboratory for analysis. The samples will be analyzed for parameters stipulated in the permits. Sampling and analytical data for each sample (e.g., field sampling logs, chain of custody forms, certificates of analysis, and the lab certification number) will be included in the corrective action monitoring report.

9. Properly dispose of all contaminated soil and ground water generated during the implementation of the CAP and installation of verification wells and soil borings. DHEC must approve the disposal facility selected for treatment and disposal of the free product and contaminated soil and ground water. The owner/operator of the facility is considered the generator for any contaminated soil and ground water. The contractor must document all disposal of free product and contaminated soil and ground water in the corrective action monitoring report.

10. Verification for the removal of free product will be conducted by SCDHEC personnel with an interface probe. If the remediation technology is in-situ (e.g., pump and treat, air sparging, vapor extraction): suspend operation of the system once the remediation goals for all CoC have been maintained for a period of 30 days. Samples are to be taken after one (1) quarter or after all CoC levels have reached equilibrium and again after a second quarter. Along with the parameters listed in Specification #8, the ground-water samples should also be sampled for the following parameters:

| Analyte | Analytical Method* | Reporting Limit (mg/l) |
|---|---|---|
| Dissolved Oxygen | SM4500-O G | 500 |
| Ferrous Iron | SM3500-Fe D | 30 |
| Methane | Kerr Method | 1000 |
| Nitrate | 9056/9210 | 100 |
| Sulfate | 9038/9056 | 1000 |

*or EPA equivalent method that can achieve the same reporting level

If sample results indicate that the remediation goals are not sustained, the contractor must submit a corrective action status report (3 copies) that outlines the deficiency(ies) and offers recommendations for achieving the remediation goals with a revised timetable. Modifying and restarting of the system will be directed by DHEC. The system will operate until all remediation goals are again maintained for a period of 30 days. Operation of the system will then be suspended again and samples taken to verify that remediation goals are sustained. This cycle of activity, including status reports, will be repeated until all CoC levels remain below SSTLs for all wells listed in Special Conditions item 11 C for two (2) consecutive quarters. **Three (3)** verification wells and **three (3)** verification soil borings may then be installed at locations designated by DHEC. Costs for verification well and soil boring installation are considered part of this bid price. Each well and soil boring will be sampled in accordance with Specifications item 8 and the analyses compared to the calculated SSTLs for the CoC at that well and soil boring location. If the laboratory analyses are at or below the SSTLs, corrective action will be considered complete. If any analysis is above the SSTL, the corrective action will not be considered complete, and the activity cycle described above must be repeated until all CoC levels remain below SSTLs for those wells and soil borings listed in Special Conditions item 11 C. Split or duplicate samples may be collected by DHEC **(or its subcontractors)** to verify achievement of remediation goals. **At least two weeks**

**notice will be provided to DHEC prior to mobilizing to the site for sampling to verify attainment of remediation goals.** Costs for transportation and analysis of split or duplicate samples will be paid by DHEC.

or

If the remediation technology is a single event (e. g. excavation of impacted soils, vacuum enhanced recovery): collect sufficient samples as outlined in the CAP to verify the reduction of CoC to the remediation goals. The contractor may be required to install and sample **three (3)** verification wells and **three (3)** verification soil borings at locations designated by DHEC. If the levels of CoC in all samples are at or below SSTLs, corrective action will be considered complete. If the level of any CoC is above the SSTL, additional corrective action will be required. The contractor will submit one (1) corrective action status report to document the reduction of CoC to the remediation goals. Split or duplicate samples will be collected **by DHEC (or its subcontractors)** to verify achievement of remediation goals. **At least two weeks notice will be provided to DHEC prior to mobilizing to the site for sampling to verify attainment of remediation goals.** Costs for transportation and analysis of split or duplicate samples will be paid by DHEC.

11. Disassemble and remove the remediation system and all associated remediation items including utilities from the site within 60 days of notification by DHEC that the remediation goal for the release associated with the UST(s) at the site has been achieved. Disruption to the owner/operator's normal business will be kept to a minimum.

12. Properly abandon all wells (including preexisting wells), borings, trenches, and piping/utility runs installed by the contractor as part of corrective action within 60 days of notification by DHEC that the remediation goal for the release associated with the UST(s) at the site has been achieved. The abandonment will be in accordance with South Carolina Well Standards and Regulations R. 61-71 and accepted industry standards for abandonment of trenches and piping/utility runs. Disruption to the property owner's normal business will be kept to a minimum. The contractor must notify DHEC of the method of well abandonment and final disposal of any free product and contaminated soil or ground water. The contractor will return the site to the condition prior to corrective action (e.g., asphalt paved areas will be repaved with asphalt, concrete areas will be replaced with concrete, grass areas will have soil replaced to the original grade and reseeded or sodded with grass, etc.).

BIDDING SCHEDULE

**The total cost in dollars to treat the area of concern (see figure #2) such that the thickness of free product does not exceed .01 foot and the levels of CoC do not exceed the site-specific target levels (SSTLs) defined in item 11.C. at any point, complete all associated monitoring and post-remediation verification, prepare all plans, reports, and correspondence; obtain and meet all terms and conditions of all required permits and licenses; design, install, monitor, operate, maintain, and when completed, properly abandon or remove all assessment and remediation items installed as part of corrective action; provide evidence of performance bond; and other items outlined in this bid invitation for the Crawford's Country Store, (UST Permit # 12335), 5870 Hwy. 28 N., Abbeville, South Carolina is:**

$ _____

**SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL**
**BID NUMBER: SB-9570-12/02/99-TC**

---

**OTHER CRITERIA**

Please respond to the following questions that have been designed to verify your corrective action qualifications:

1. The corrective action method(s) or technology (ies) that will be proposed in the CAP will be (list all active and/or intrinsic methods or technologies for remediation of the aquifer; attach additional pages(s) as required):

   _____

   _____

   _____

   _____

2. The estimated time in months to complete the corrective action from the date of bid award, corrective action goals are met, and all corrective action items are removed from the site or properly abandoned is approximately _____ months. This time assumes all submitted plans and reports will be reviewed by DHEC within 30 days of receipt.

**BID ACCEPTANCE and DELIVERY STATEMENT**

In compliance with the bid solicitation and subject to all conditions thereof, the contractor offers and agrees, if this bid is accepted within _____ days from date of bid opening, to furnish any or all items/services quoted at the prices set forth.

## SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL
## BID NUMBER: SB-9570-12/02/99-TC

---

# PLEASE READ THE FOLLOWING CAREFULLY PRIOR TO COMPLETING BID

## INSTRUCTIONS TO BIDDERS

DISCUSSIONS AND NEGOTIATIONS: By submission of a bid, bidder agrees that during the period following issuance of this solicitation and prior to notification of intent or award of a contract, the bidder shall not discuss this procurement with any party except members of the DHEC Procurement Division or other parties designated in this solicitation. Bidder shall not discuss or attempt to negotiate with the using area or program any aspects of the procurement without prior approval of the DHEC Procurement Division Buyer responsible for the procurement. Infractions may result in rejection of the violator's bid.

1. Unless otherwise required herein, only one signed copy of the invitation to bid is required.
2. Bids "faxed" directly to the DHEC Procurement Office will not be accepted or considered for award.
3. Bids, amendments thereto or withdrawal request must be received by the time advertised for bid opening. It is the bidder's sole responsibility to insure that these documents are received by the person (or office) at the time indicated in this solicitation document. Any withdrawal request received after the time of the bid opening shall be governed by DHEC Underground Storage Tank Environmental Remediation Procedures.
4. When specifications or descriptive papers are submitted with the bid submission, enter bidder's name thereon.
5. Submit your signed bid on this form. Show the bid number on the envelope as instructed. DHEC assumes no responsibility for unmarked or improperly marked envelopes. All envelopes received showing a bid number are placed directly under locked security until the date and time of opening. Do not include more than one bid invitation per envelope. If directing any other correspondence, address the envelope to the Procurement Officer but do not include the bid number on the envelope since it does not include your bid.
6. Bidders must clearly mark as "CONFIDENTIAL" each part of their bid which they consider to be proprietary information that could be exempt from disclosure under Section 30-4-40, Code of Laws of South Carolina 1976 (1986 Cum. Supp.; Freedom of Information Act) If any part is designated as confidential, there must be attached to that part an explanation of how this information fits within one or more categories listed in Section 30-4-40. DHEC reserves the right to determine whether this information should be exempt from disclosure and no legal action may be brought against the State, DHEC or its agents for its determination in this regard.
7. By submission of a bid, you are guaranteeing that all goods and services meet the requirements of this solicitation during the contract period.
8. Tie bids will be resolved as outlined in DHEC Underground Storage Tank Environmental Remediation Procedures.
9. Do not include any taxes that DHEC may be required to pay in the bid price. Upon submission of a bid by a state agency, the Procurement Officer will compute a 5% sales and use tax to the non-state agency bids when applicable (service and labor excluded) in determining the low bidder. This procedure conforms with the SC Tax Commission Sales and Use Tax Regulation 117-174-.95.
10. Correction of errors on this bid form: All prices and notations should be printed in ink or typewritten. Errors should be crossed out corrections entered and initialed by the person signing the bid. Erasures or use of typewriter correction fluid may be cause for rejection. No bid shall be altered or amended after the time specified for the bid opening.
11. Ambiguous bids which are uncertain as to terms, delivery, quantity or compliance with this solicitation may be rejected or otherwise disregarded.
12. Any bidder desiring to exercise a grievance may do so under section IV of DHEC Underground Storage Tank Environmental Remediation Procedures. All correspondence should be directed to the Director of Procurement Services, Bureau of Business Management, 2600 Bull Street, Columbia, SC 29201.
13. Failure to respond to three consecutive bid notices may result in removal of bidder's name from the mailing list.

## GENERAL PROVISIONS

14. DHEC reserves the right to reject any and all bids, and to cancel this solicitation.
15. Unit prices will govern over extended prices unless otherwise stated in this solicitation.
16. Prohibition of Gratuities: Amended section 8-13-420 of the 1976 Code of Laws of South Carolina States: "Whoever gives or offers to any public official or public employee any compensation, including a promise of future employment, to influence his action, vote, opinion or judgement as a public official or public employee or such public official solicits or accepts such compensation to influence his action, vote, opinion or judgement shall be subject to the punishment as provided by Section 16-9-210 and Section 16-9-220. The provision of this section shall not apply to political contributions unless such contributions are conditioned upon the performance of specific action of the person accepting such contribution nor shall they prohibit a parent, grand-parent or relative from making a gift to a child, grandchild or other close relative for love and affection except as hereafter provided".
17. Bidder's Qualification: Bidders must, upon request of DHEC, furnish satisfactory evidence of their ability to furnish products or services in accordance with the terms and conditions of these specifications. DHEC reserves the right to make the final determination as to the bidder's ability to provide the products or services requested herein.

Re: **QAPP Contractor Addendum**
Crawfords Country Store
5870 Hwy 28 North, Abbeville, SC 29620
UST Permit # 12335
Release Reported December 3, 1991
Abbeville County

Dear Mr. Crawford:

The Underground Storage Tank (UST) Management Division (Division) of the South Carolina Department of Health and Environmental Control (Agency) recognizes your commitment to continue work at this site using Midlands Environmental Consultants, Inc., as your contractor. Based upon review of site records, additional site assessment and groundwater monitoring is required at this time. The next scope of work will include field screening and comprehensive groundwater sampling as outlined in the UST Quality Assurance Program Plan (QAPP) Revision 2.0. The number of additional monitoring wells and their install locations will be based upon review of field screening data. Please have your contractor plan to conduct field screening in the areas outlined on the attached map and to sample all monitoring wells and area water supply wells for BTEX, Naphthalene, Oxygenates, 1,2-DCA, MTBE and EDB, in accordance with the QAPP Rev. 2.0, and in compliance with all applicable regulations. A copy of the QAPP is available at http://www.scdhec.gov/environment/lwm/usthome/Qapp.htm.

Your contractor must complete and submit a QAPP Contractor Addendum and cost agreement for the aforementioned scope of work within 30 days of the date of this letter. Upon review and approval of the Addendum and cost agreement, the Division will issue a directive to you for the work.

On all correspondence concerning this site, please reference UST Permit # 12335. If there are any questions, feel free to contact me by telephone at (803) 898-0607, by fax at (803) 898-0673, or by e-mail at ShullSS@dhec.sc.gov.

Sincerely,

RE: Remediation System Removal/Well Abandonment
Various Pay-For Performance Sites

Dear Mr. Coleman:

Per a SCDHEC request in a correspondence dated March 2, 2007, $H_2O$ Environmental, Inc. personnel removed the remediation systems from the following referenced sites and disconnected the power sources. A copy of the SCDHEC letter is provided as Attachment 1. Any remaining remediation system equipment and piping were dismantled, removed, and/or abandoned.

| UST Permit # | Site Name | Referenced Attachment # |
|---|---|---|
| 04102 | City of Greenville | 2 |
| 00781 | SCDOT Bamberg Maintenance | 3 |
| 02382 | Black's 66 | 4 |
| 06851 | Spinx | 5 |
| 09413 | Gaulden's Grocery | 6 |
| 15971 | Nesmith Well Contamination | No Attachments |
| 16090 | Former Ellison's ( Owens Well) | 7 |
| 12335 | Crawford's Store | 8 |

In addition, all site monitoring wells were abandoned at the following site:

| | |
|---|---|
| 04102 | City of Greenville |
| 02382 | Black's 66 |
| 09413 | Gaulden Grocery |

All piping, monitoring wells, sparge wells, and vapor wells were abandoned by a certified well driller. A copy of the Water Well Records detailing abandonment of monitoring wells and/or sparge wells and vapor wells are attached for each of the reference sites. Upon your final inspection, please return the performance bonds issued for each site.

If you have any questions or comments, please do not hesitate to contact Craig Hurst at 954-565-7650 or me at (803) 749-4080.

**$H_2O$ Environmental, Inc.**

* Contact Mr. Tommy Keels at G&K Tank Services (803-799-0054) to pick up this trailer.

In the time since Groundwater & Environmental Services (GES) acquired $H_2O$, little work has been done to advance these projects toward completion. It has been determined that it is in the best interests of the UST Program to release GES/$H_2O$ from the listed contracts.

The release of GES/ $H_2O$ from these contracts is unconditional and will not prejudice any current or future work by your company. In accordance with the terms and conditions of the PfP contracts, you are to remove your equipment from the listed facilities, abandon the remediation wells, piping, electrical service, etc., and restore the sites to the conditions prior to corrective action (e.g., asphalt paved areas will be repaved with asphalt, concrete areas will be replaced with concrete, grass areas will have soil replaced to the original grade and reseeded or sodded with grass, etc.). The monitoring wells are to be abandoned only at the facilities indicated in the table above. The Department will make no further payments from the SUPERB Account. Your performance bonds will be returned as soon as completion of these activities has been verified by DHEC staff.

Please feel free to contact me at (803) 896-6249 if you have any questions or need additional information.

Sincerely,

Kent M. Coleman, P.G., Director
Assessment and Corrective Action Division
Underground Storage Tank Program
Bureau of Land and Waste Management

SCDHEC Site ID Number 12335
MECI Project Number 13-4650
Certified Site Rehabilitation Contractor UCC-0009

Dear Mr. Rivers,

On behalf of Mr. Frank Crawford, Midlands Environmental Consultants Inc. (MECI) is pleased to submit the attached QAPP Contractor Addendum for the referenced site.

On October 15, 2013, MECI personnel performed a site visit to the subject site to evaluate site conditions, attempt to locate monitoring wells and identify potential problems for future assessment activities.

If you have any question or comments please feel free to contact us at 803-808-2043.

Sincerely,
**Midlands Environmental Consultants, Inc.**

**Table 1A Addendum Distribution List**

## A4 Problem Definition/Background

***Discuss the background (as much as is known) of the site and appropriate historical information, and why this site is being assessed.***

The subject site (Crawford's Country Store) is located at 5870 S.C. Highway 28 North in Abbeville, Abbeville County, South Carolina (see Figure 1). The subject site is currently an active gasoline service station and convenience store. Previously, the subject site maintained one 2,000 gallon gasoline underground storage tank (UST), one 1,000 gallon kerosene UST, one 560 gallon diesel UST, one 8,000 gallon gasoline UST, and one 10,000 gallon gasoline UST. The former UST's were removed from the ground in October of 1991. The South Carolina Department of Health and Environmental Control (SCDHEC) reported a release of petroleum product in December of 1991 and confirmed the release in March of 1993. Currently, the subject site maintains one 3,000 gallon diesel UST, one 6,000 gallon off-road diesel UST, one 6,000 gallon premium gasoline UST, one regular unleaded gasoline UST, and one 10,000 gallon regular unleaded gasoline UST. This assessment included direct push field screening, installation of monitoring wells based on the results of the field screening, and a comprehensive sampling of the site.

***Please answer the following: Does this project fall under UST or Brownfields area?***

Underground Storage Tank Division

## A5 Project/Task Description

1. ***Summarize what is known about the work to be done. This can be a short sentence indicating what the Scope of this project is (see Master QAPP Section A6).***

The scope of this assessment is to conduct field screening on the properties south and southwest of the subject site (Crawford's Country Store) and use the field screening results to determine where additional monitoring wells are needed in order to properly define the plume. Following field screening activities, MECI will propose locations of additional permanent monitoring wells for approval from the SCDHEC project Manager. In addition, during the initial site visit, it was documented that monitoring well MW-12 and MW-13R have been either destroyed or covered. MECI will propose the replacement of these monitoring wells as well. Following monitoring well installation, all newly installed wells, entire monitoring well network, and area water supply wells will be sampled for BTEXMN, 1,2DCA, 8-Oxygenates, and EDB.

Following the well installation a subsequent survey will be conducted by MECI Personnel to locate the vertical and horizontal positions of the newly installed wells and existing wells.

2. ***The work will begin within*** fourteen (14) days of receipt of approved QAPP contractors addendum ***after cost approval and the scope of work should be complete by*** sixty (60) days of receipt of approved QAPP contractors addendum.

3. ***Are there are time or resource constraints? Include those factors that may interfere with the tentative schedule.***

Factors that may prevent schedule work will be, but not limited to, inclement weather, equipment malfunction, and machine failure.

## A6 Data Quality Objectives (DQOs) and Data Quality Indicators (DQIs)

The subject site (Crawford's Country Store) is located at 5870 S.C. Highway 28 North in Abbeville, Abbeville County, South Carolina (see Figure 1).

The proposed work will be conducted on the properties located at 3 Highway 184 North (Abbeville County Tax Map Number 046-00-00-048), 5773 Highway 28 North (Abbeville County Tax Map Number 046-00-00-050) and 5804 Highway 28 North (Abbeville County Tax Map Number).

## A7 Certification

**The Following Laboratory(ies) will be used for this Project:**

## Commercial Lab(s)

**Full Name of the Laboratory___Shealy Environmental Services, Inc.____**
**Name of Lab Director_____Daniel J. Wright_____**
**SC DHEC Certification Number_____32010_____**
**Parameters this Lab will analyze for this project:**

Groundwater collected from the monitoring wells will be analyzed for BTEX, Naphthalene, MTBE, 1,2 DCA, 8-Oxygenates (EPA Method 8260B), and EDB (EPA Method 8011).

## A8 Documents and Records

***Personnel will receive the most current version of the QAPP Addendum via: (Check all that apply)***

____US Mail ____Courier _X_ Hand delivered

Other (please specify):_____E-mailed electronic copies___

| Record | Produced By | Hardcopy/ Electronic | Storage Location For how long? | Archival |

| | | | |

**Table 3A Sampling Activities**

## B2 Sampling Methods

Please note: The contractor must follow sampling protocols as given in the UST QAPP.

***Estimate* the number of samples of each matrix that are expected to be collected:**

Soil _____

Ground Water from Monitoring Wells _____32____

From Drinking/Irrigation water wells _____ 2____

Field Duplicate Collection _____2____

Field Blank Collection _____1____

Trip Blank _____1____

From surface water features _____

Total number of samples _____38____

Notes:

-During the October 15, 2013 site visit, twenty-two (22) monitoring wells and two (2) water supply wells were located. Monitoring wells MW-12 and MW-13R were not located during QAPP prep activities and are believed to have been destroyed or covered. In addition, it was noted that the pads and vaults on monitoring wells MW-8 and MW-15 are damaged and in need of replacing.

-It is anticipated that eight additional monitoring wells will be installed following field screening activities; however the amount of additional monitoring wells will be determined following the completion of field screening activities. In addition, MECI proposes replacing monitoring wells MW-12 and MW-13R.

-It is anticipated that two (2) field duplicate will be sampled. Two duplicate will be collected during the monitoring well sampling event.

-It is anticipated that two (2) field blank will be collected. Two field blank will be collected during the monitoring well sampling event.

- It is anticipated that two (2) trip blank will be analyzed.

Environmental Drilling and Probing Services (EDPS) will mobilize a drilling rig to the subject site. All drilling activities will be performed under the supervision of a South Carolina Certified Well Driller and MECI field personnel (Tommy Bolyard, #B 01846).

Wells will be installed according to MECI Standard Operating Procedures (4.1.1, 4.1.5, 4.2.1, 4.2.2, & 4.2.4) and in accordance with South Carolina Well Standards, R.61-71.

Monitoring wells will be purged/sampled in accordance with MECI SOP # 4.3.1 through 4.3.5.

***For the sample matrices indicated above, please describe how samples will be collected and the equipment needed.***

## Monitoring Well Sampling

### Water Level Measurement:

-MECI personnel utilize Electronic Water Level Indicators for Water Level Measurements. Each sampling crew carries an electronic water level indicator for use on downgradient monitoring wells and an Oil/Water Interface probe for use on source area wells or wells that have historically contained measurable free phase petroleum product.

-Prior to usage, the indicator is decontaminated with isopropanol applied by a Teflon squeeze bottle and rinsed with analyte free water. This rinse water is collected and run through a portable GAC (granulated activated carbon) unit.

-The indicator is slowly lowered into the water table, and the water level is recorded to the nearest 0.01 feet.

-When free phase petroleum product is encountered, the Oil-Water Interface probe is slowly lowered into the monitoring well until product is encountered; this measurement is recorded to the nearest 0.01 feet. The meter is then lowered through the product until water is encountered. The probe is then pulled back up through the well until product is encountered again; this measurement is recorded to the nearest 0.01 feet.

-If the total depth of a monitoring well is required, after a groundwater level is recorded, the indicator probe is lowered until the bottom of the monitoring well is encountered. This depth is recorded to the nearest 0.01

feet. Following a total depth measurement, the entire length of probe tape is decontaminated with isopropanol and rinsed with analyte free water.

-All measurements will be taken from the top of the well casing.

**Monitoring Well Purging:**

-Where necessary, monitoring wells will be purged prior to sampling if: the well screen does not bracket the watertable, if a screened interval is not known, purging is specifically asked for by the SCDHEC project manager, or a monitoring well has not previously been sampled.

-Purging will be completed utilizing a prepackaged, clear, disposable polyethylene bailer and nylon rope. Following purging/sampling of a well, the bailer and rope will be properly disposed. -A new set of Nitrile gloves will be worn at each monitoring well, and at any time samples are handled.

-Prior to purging, the water level of the well will be determined using an electronic water level indicator. The water level, total well depth and well diameter will be used to determine the amount of water standing in the water column. The following table presents gallons of water per foot of water column in selected diameters of wells:

| ***Well Diameter (inches)*** | ***Gallons of Water/Foot*** | ***Well Diameter (inches)*** | ***Gallons of Water/Foot*** |
|---|---|---|---|
| 1 | 0.047 | 8 | 2.611 |
| 2 | 0.163 | 10 | 4.08 |
| 4 | 0.653 | 12 | 5.875 |
| 6 | 1.469 | | |

-The length of the water column multiplied by the gallons of water per foot will provide the number of gallons in one well volume of water.

-Purging will continue until three well volumes of water are evacuated, or where field measurements of pH, Specific Conductivity (uS), Temperature (°C), and Turbidity (NTU) have stabilized to within 10% of previous values or until all accessible well water is evacuated (purged dry). Field measurements of these parameters will be taken and recorded in field notes, prior to purging and after each well volume of water has been purged.

-When purging a well with a diameter larger than 2", a submersible Redi-Flo2 pump can be used.

-Prior to usage, the pump assembly will be cleaned using a laboratory grade detergent and rinsed with analyte free water.

-The pump is lowered into the water column utilizing an attached nylon rope. DO NOT LOWER THE PUMP USING THE ELECTRICAL CORD OR HOSE.

-Once the pump has been lowered to the desired depth, the nylon rope is securely attached to an anchor at the ground surface (i.e. metal stake, truck bumper, etc). The power cord is attached to the speed controller which is attached to the generator.

-Slowly increase the speed of the controller until a desired flow rate is achieved. The pump should not be allowed to run dry.

-Purge water will be treated on-site utilizing a GAC unit.

**Monitoring Well No-Purge Sampling:**

-No-purge sampling will be conducted in previously sampled monitoring wells if: the water level is within the screened interval of the well or specifically asked for by the SCDHEC project manager.

-Immediately prior to sampling, laboratory provided labels will be placed on all sample vials and containers. These labels will include the site name, sample ID, analysis to be completed, date and time.
-Sampling will be conducted utilizing prepackaged, clear, disposable polyethylene bailers and nylon rope. Following sampling of a well, the bailer and rope will be properly disposed. A new set of Nitrile gloves will be worn at each monitoring well, and at any time samples are handled.

-The bailer is lowered into the well until it encounters the watertable, the bailer is then allowed to fill with water and is extracted from the well. Samples are placed in laboratory provided and approved sampling containers. Following sample collection, the samples are immediately placed in laboratory provided coolers, pre-filled with wet ice obtained from the MECI office.

-When requested by the SCDHEC project manager, passive diffusion bags (PDB) can be used to obtain no purge samples from discreet intervals within a water column or from wells were it is not possible to treat purge water on-site (i.e. DNAPL contamination).

-Prior to installation of a PDB, all equipment used should be washed with isopropanol and rinsed with analyte free water (weights, PDB clamps, etc.).

-Wearing Nitrile gloves, the PDB is filled with analyte free water, sealed with a PDB clamp according to the manufacturer and attached to a nylon rope. The PDB is then lowered into the well to a specified depth.

-After a minimum of two weeks in the well, the PDB is removed from the well and a sample taken using a disposable, prepackaged, sealed sampling straw to puncture the bag and fill sample vials.

**Quality Assurance:**

-Once the samples are taken, they are to be immediately placed in laboratory provided coolers, pre-filled with wet ice obtained from the MECI office.

-One field duplicate will be taken for every twenty (20) monitoring wells sampled at a site. This blank is a duplicate sample taken from a monitoring well near the source area, and is sampled in accordance with MECI Standard Operating Procedures.

-One field blank will be prepared for each day a site is sampled. A field blank is prepared using lab provided DI water placed into laboratory provided sample containers.

-One trip blank per cooler used in sampling will be used at each site. The trip blank is prepared by the laboratory.

-Once a sample has been taken, a sample time will be recorded in the field notes, along with any information about monitoring well condition that should be brought to the attention of the project manager.

**If decontamination procedures differ from Appendix H, please provide details.**

***Identify any equipment and support facilities needed. This may include such things as Fed-ex to ship the samples, a Geoprobe, field analysis done by another contractor (who must be certified), and electricity to run sampling equipment.***

Environmental Drilling and Probing Services (EDPS) will mobilize a drilling rig to the subject site. All drilling activities will be performed under the supervision of a South Carolina Certified Well Driller and MECI field personnel (Tommy Bolyard, #B 01846).

Wells will be installed according to MECI Standard Operating Procedures (4.2., 4.2.2, 4.2.3 & 4.2.4) and in accordance with South Carolina Well Standards, R.61-71.

Drill cuttings will be disposed of by MECI personnel at Waste Management Richland County Landfill in Elgin, SC.

***Address the actions to be taken when problems occur in the field, and the person responsible for taking corrective action and how the corrective action will be documented.***

| Failure | Response | Documentation | Individual Responsible |
|---|---|---|---|
| Unable to gain access to drilling location | Attempt to create path to well location through vegetation, Utilize plywood boards to cross soft ground, contact SCDHEC project manager to discuss a potential change to the well location. | Record on field sheets, notify SCDHEC and Office. | Field Staff, Field Manager |
| Hitting a Utility Line while Drilling | Contact PUPS (Palmetto Utilities Protection Service), contact appropriate utility (if | Record in field sheets, on PUPS ticket in office. Contact SCDHEC project manager to | Field Staff, Field Manager |

| | | | |
|---|---|---|---|
| | gas line is hit, notify fire department) | inform them of problem. | |
| Drilling rig breaks down | Attempt to correct problem. If the problem cannot be determined, or cannot be fixed, discontinue drilling for the day. Drilling can continue once drill rig has been fixed, or new drill rig is mobilized to the site | Record on field sheet, notify office staff. | Field Staff, Drill rig operator |
| Property Owner will not allow access onto property for drilling activities | Stop drilling. Attempt to discuss with property owner the need for the work. Inform SCDHEC project manager of the access issue. If no resolution can be made, discontinue drilling on the disputed property until access can be obtained or new well location is determined. | Document on field sheets (or QAPP, if access denied during QAPP site visit). Inform SCDHEC project manager immediately if any disputes arise. | Field Staff, Field Manager |
| | | | |

**Table 6A Field Corrective Action**

## B3 Sample Handling and Custody

1. ***How will the samples get from the Site to the Lab to ensure holding requirements are met?***

Following sample collection, the samples are immediately place in a laboratory provided cooler, pre-filled with wet ice obtained from the MECI office. Samples are transported to the MECI office once a sampling event is complete. A Chain of Custody (CoC) is filled out following the sampling event by the field staff. See attached CoC. If a lab provided courier is scheduled to visit the MECI offices the day following a sampling event, sampling coolers are repacked with wet ice, and left at the office for pick-up the following morning. If no courier is schedule to visit the MECI office the day following a sampling event, all sampling coolers are repacked with ice and are dropped off at a lab approved shipping company for overnight delivery to the lab.

2. ***If sample preservation procedures differ from the UST Programmatic QAPP, please provide details.***

3. ***If chain of custody procedures differ from the UST Programmatic QAPP, please provide details.***

## B4 Analytical Methods

1. ***Identify the SOPs which will be used to analyze the samples, the method which the SOP references and the equipment or instrumentation that is needed:***

| Parameter | SOP ID* | Method | Equipment | Comments |
|---|---|---|---|---|

| | | Referenced | | |
|---|---|---|---|---|
| BTEX+Naph+MTBE+Oxygentaes | S-VO-002 | 8260B | GC/MS | |
| PAH's | S-SV-021 | 8270D | GC/MS | |
| EDB | S-SV-012 | 8011 | GC | |
| Lead,T. | S-IM-022 | 6010C | ICP | |
| Ferrous Iron | S-IN-009 | SM 3500-FED | Spectrophotometer | |
| Nitrate | S-IN-042 | 353.2 | Auto-analyzer/Lachate | |
| Sulfate | S-IN-010 | 300.0 | Ion Chromatograph | |
| Methane | S-VO-004 | RSK-175 | GC | |
| TOC | S-IN-030 | Walkley-Black | N/A | |
| DRO - TPH | S-SV-001 | 8015C | GC | |
| Mercury | S-IM-006 | 7470A/7471B | Hydra AA Analyzer | |
| RCRA Metals | S-IM-014 | 6020A | ICP-MS | |
| pH | Standard | MECI SOP 4.3.6 | YSI 63 | Place probe in sample and allow to equilibrate before recording reading |
| Conductivity | Standard | MECI SOP 4.3.6 | YSI 63 | |
| Dissolved Oxygen | Standard | MECI SOP 4.3.6 | YSI 550A | |
| Temperature | Standard | MECI SOP 4.3.6 | YSI 550A | |
| PID reading | MECI SOP 4.2.2 | | | Use MiniRae PID to obtain reading. Place probe into soil sample bag and record the highest reading. |

**Table 5A Analytical SOPs and Referenced Methods**

- **This can be a full name of a SOP, an abbreviation, or a number. In the latter two cases, the abbreviation or number must be associated with the full name of the SOP. See also Table 8A SOP Abbreviation Key.**

2. Provide SOPs for the Kerr Method or the Ferrous Iron Method if these are parameters for this study. This can be attached or written here. If attached please note that it is an attachment and where it is located (if applicable).

## B5 Quality Control Requirements:

All QC will follow the requirements laid out in Section B5 of the UST Programmatic QAPP.

## B6 Field Instrument and Equipment Testing, Inspection and Maintenance

1. Identify all field and laboratory equipment needing periodic maintenance, the schedule for this, and the person responsible. Note the availability and location of spare parts.

| Instrument | Serial Number | Type of Maintenance | Frequency | Parts needed/Location | Person responsible |
|---|---|---|---|---|---|
| YSI 63 | 09C 101302, 10K 101895, 07M 100905 | Replace probe tip | Yearly | Order from YSI | J. Coleman |
| YSI 63 | 09C 101302, 10K 101895, | Replace batteries | As Needed | In stock at office | Field Staff |

| | | | | | |
|---|---|---|---|---|---|
| | 07M 100905 | | | | |
| YSI 63 | 09C 101302, 10K 101895, 07M 100905 | General inspection for wear and tear on equipment | Daily | Major fixes will be done out of office | Field Staff |
| YSI 63 | 09C 101302, 10K 101895, 07M 100905 | Check buffer solutions for expiration | Weekly | In stock at office | J. Coleman |
| YSI 550A | 04L 2026AK, 08B 101407, 04A 0912AI | Replace membrane | 4 to 8 weeks | In stock at office | Field Staff |
| YSI 550A | 04L 2026AK, 08B 101407, 04A 0912AI | Replace batteries | As Needed | In stock at office | Field Staff |
| YSI 550A | 04L 2026AK, 08B 101407, 04A 0912AI | General inspection for wear and tear on equipment | Daily | Major fixes will be done out of office | Field Staff |
| Electronic Water Level Indicator | WLI-1, WLI-2, WLI-3 | Inspection | Weekly | N/A | Field Staff |
| Oil/Water Interface probe | PLI-1, PLI-2, PLI-3, PLI-4 | Inspection | Weely | N/A | Field Staff |
| Micro TPW/TPI Turbidimeter | 201301174 201301183 | General inspection for wear and tear on equiptment | Daily | N/A | Field Staff |
| MiniRae 3000 | 592-902491 | Cleaning | Weekly | N/A | Field Staff |
| MiniRae 3000 | 592-902491 | Parts Inspection | As Needed | In stock at office | Field Staff |

**Table 6A Instrument and Equipment Maintenance**

## B7 Instrument Calibration and Frequency

1. Identify equipment, tools, and instruments for field or lab work that should be calibrated and the frequency.
2. Describe how the calibrations should be performed and documented, indicating test criteria and standards or certified equipment.
3. Identify how deficiencies should be resolved and documented. Identify the person responsible for corrective action.

| Instrument | Calibration Procedure | Frequency of Calibration | Acceptance Criteria | Corrective Action (CA) | Person Responsible for CA | SOP Reference* |
|---|---|---|---|---|---|---|
| Volatiles Mass Spec | Minimum of 5 calibration standards for all compounds | When indicated by continuous calibration verification standard | Method Criteria | Detailed in SOP | MSV Analyst | S-VO-002 |
| Semi-volatile Mass Spec | Minimum of 5 calibration standards for all compounds | When indicated by calibration verification standard | Method Criteria | Detailed in SOP | MSSV Analyst | S-SV-021 |
| GC ECD | Minimum of 5 calibration | When indicated by calibration | Method Criteria | Detailed in SOP | GC Analyst | S-SV-012 |

| Instrument | Calibration Procedure | Frequency of Calibration | Acceptance Criteria | Corrective Action (CA) | Person Responsible for CA | SOP Reference* |
|---|---|---|---|---|---|---|
| | standards for all compounds | verification standard | | | | |
| Dionex IC | Minimum of 5 calibration standards for all compounds | When indicated by calibration verification standard | Method Criteria | Detailed in SOP | IC Analyst | S-IN-010 |
| ICP | Minimum of 3 calibration standards for all compounds | When indicated by calibration verification standard | Method Criteria | Detailed in SOP | ICP Analyst | S-IM-022 |
| Cetac Mercury Analyzer | Minimum of 5 calibration standards for all compounds | When indicated by calibration verification standard | Method Criteria | Detailed in SOP | Mercury Analyst | S-IM-006 |
| Lacaht QuickChem 8000 | Minimum of 5 calibration standards | Daily or when indicated by calibration verification standard | Method Criteria | Detailed in SOP | Nitrate Analyst | S-IN-042 |
| YSI 63 | pH Calibration | Daily | +/- 0.2 pH units | clean/replace probe tip, recalibrate | Field Staff | 4.3.6 |
| YSI 63 | Conductivity Calibration | As directed by manufacturer | +/- 10 uS | clean/replace probe tip, recalibrate | Field Staff | 4.3.6 |
| YSI 550A | DO calibration | Daily | +/- 0.25 mg/l | clean/replace probe tip, recalibrate | Field Staff | 4.3.6 |
| YSI 550A | Temperature Calibration | Daily | +/- 1 °C | clean/replace probe tip, recalibrate | Field Staff | 4.3.6 |
| MiniRae 3000 | PID Calibration | Weekly | +/- 5 ppm | clean, recalibrate | Field Staff | *** |
| Electronic Water Level Indicator | Checked vs. Standard | Monthly | +/- 0.01 foot per 10 foot length | Replace probe tape | Field Staff | *** |
| Oil/Water Interface probe | Checked vs. Standard | Monthly | +/- 0.01 foot per 10 foot length | Replace probe tape | Field Staff | *** |

**Table 7A Instrument Calibration Criteria and Corrective Action**

*** This can be a full name of a SOP, an abbreviation, or a number. In the latter two cases, the abbreviation or number must be associated with the full name of the SOP. See also Table 8A SOP Abbreviation Key.**

## B8 Inspection/Acceptance Requirements for Supplies and Consumables

1. If procedures for storage, handling or transport of supplies/consumables differ from the UST Programmatic QAPP, please provide details.

## B9 Data Acquisition Requirements (Non-Direct Measurements)

1. Identify data sources, for example, computer databases or literature files, or models that should be accessed or used.
2. Describe the intended use of this information and the rationale for their selection, i.e., its relevance to project.
3. Indicate the acceptance criteria for these data sources and/or models.

| Data Source | Used for | Justification for use in this project | Comments |
|---|---|---|---|
| Small scope assessment, sampling and monitoring well installation reports. | Historic groundwater and CoC concentration data. Lithology and well construction data from previous MWI's | Establish the type of drilling rig required, time for sampling and any other potential problems that may be encountered. | 1903 forms from previous monitoring well installations will be used to estimate depth of the newly installed monitoring wells installed in conjunction with the Tier II Assessment. |
| | | | |
| | | | |

**Table 8A Non-Direct Measurements**

4. Identify key resources/support facilities needed.

## B10 Data Management

1. Describe the data management scheme from field to final use and storage.

Following sample collection and chain of custody production, samples are shipped to the lab. Field work from the field staff is reviewed by the MECI project manager, and converted into digital form. All data entry is subsequently checked to validate the data entry. The original copies of the field work are stored in MECI files for a minimum of 5 years. Digital copies of the work are stored on the MECI server, which is backed up weekly, and stored for a minimum of 5 years. The digital copy of the field work is presented to SCDHEC with the final report.

2. How does the lab and field staff ensure that no unauthorized changes are made to the chain of custody, sampling notebooks, laboratory notebooks and computer records?

The laboratory maintains comprehensive Quality Control and Training Programs. All sample receipt data, sample log-in, and analytical data is peer reviewed, including review for inappropriate changes. Data management, review procedures and the Quality Systems Program are documented in the laboratory's Quality Manual and Standard Operating Procedures. The Quality Assurance Department oversees adherence to and review of these programs.

All MECI field work is produced using ink-pens. Any attempt to alter field data, after sampling is complete, can be readily identified. MECI keeps a carbon copy of the chain of custody after it is shipped to the lab.

This copy is kept with the field work. If any change to the CoC are suspected, this original carbon copy can be use to identify potential changes.

3. How does the lab ensure that there are no errors in samples records including times when sample information is compiled, data calculated and/or transmitted?

Sample data acquisition software is reviewed periodically. The LIMS database is backed up daily and is able to be restored in the event of a system failure. These procedures are documented in laboratory SOP S-AD-003, LIMS. The IT Manager is responsible for these systems and procedures."

4. How will the data be archived once the report is produced? How can it be retrieved? (This applies to both electronic and hard copies).

Laboratory Hardcopy data stored off site is logged, maintained and archived by the Quality Assurance Department. Laboratory Electronic Data Reports are maintained through IT back up under the responsibility of the IT Systems Manager.

MECI keeps all field work and paper copies of reports in its in-house filing system. All paper copies are stored for a minimum of 5 years. Any file can be retrieved easily by going to the correct filing cabinet/box.

All electronic copies of reports generated are kept on the MECI server. This server is backed-up on a weekly basis. Any file stored on the MECI server can be retrieved instantly, by accessing the server. All electronic files are stored for a minimum of 5 years on the server.

# Section C Assessment and Oversight

## C1 Assessment and Response Actions

1. *The Contractor is supposed to observe field personnel daily during sampling activities to ensure samples are collected and handled properly and report problems to DHEC within 24 hours. . Please state who is responsible for doing this and what observations will be made. Will this person have the authority to stop work if severe problems are seen?*

Field audits can be conducted on any field personnel at any time. MECI field audits can be conducted by the Field Manger, who will be responsible for ensuring that field personnel adhere to the QAPP. If during a random field audit, severe problems are found, work will be stopped by the field manager and the QA officer contacted to determine corrective action. All problems must be corrected prior to any additional work being performed. Should it be requested, an On-site Field Audit can be scheduled with the SCDHEC project manager.

2. *The SCDHEC UST QAPP states that the Lab will receive an Offsite Technical System Audit. For this project, what assessments will be done on the Commercial Lab(s) that are being used—other than their certification audit? When or how often are these done? Who will the results be given to and who has the ability to stop work if problems are severe?*

The laboratory participates in annual Proficiency Testing through an approved vendor, Wibby Environmental. Proficiency Testing results are provided to the Office of Environmental Laboratory Certification.

### C2 Reports to Management

See the SC DHEC UST Programmatic QAPP (UST Master QAPP).

## Section D Data Validation and Usability

All field and laboratory data will be checked and verified by the project verifier (Courtney Sanders) prior to submission to SCDHEC.

| D. Repair well vault | | each x | $225.00 | | $0.00 |
| F. Replace well cover bolts | | each x | $10.00 | | $0.00 |
| G. Replace locking well cap & lock | | each x | $15.00 | | $0.00 |
| H. Replace/Repair stick-up | | each x | $137.50 | | $0.00 |
| I. Convert Flush-mount to Stick-up | | each x | $175.00 | | $0.00 |
| J. Convert Stick-up to Flush-mount | | each x | $125.00 | | $0.00 |
| K. Replace missing/illegible well ID plate | | each x | $22.50 | | $0.00 |
| **Report Prep & Project Management** | 15% | x | $44,557.50 | | $6,683.63 |
| **TOTAL** | | | | | $51,241.13 |

*The appropriate mobilization cost can be added to complete these tasks, as necessary

CoC is shipped with the samples to the lab, and a copy is kept by MECI in the work folder.

4.3.5.2. A lab provided transport blank will be stored in each cooler for transport to the laboratory.

4.3.5.3. Samples will be transported to the laboratory by shipment with a lab provided courier or with a lab approved shipping company. If a courier is scheduled to visit the MECI offices the day following a sampling event, sampling coolers will be repacked with wet ice, and left at the office for pick-up. If no courier is scheduled to visit the MECI office the day following a sampling event, all sampling coolers are to be dropped off at the lab or at an approved shipping company for overnight delivery to the lab immediately following the sampling event.

### 4.3.6. Field Measurements and Instrument Calibration

4.3.6.1. Prior-to all sampling events equipment for field measurements should be calibrated. MECI utilizes YSI550A meters for DO (mg/L) and temperature readings ($^{o}$C) and YSI63 meters for pH and conductivity (uS) readings. These meters are calibrated according to the manufacturers instructions (please see attached calibration instructions)

4.3.6.2. Calibration readings will be recorded on field notes, and should be within +/- 1$^{o}$C for temperature, +/- 0.2 pH units of 7.00 buffer for pH and within 10% of 100 uS buffer for conductivity.

4.3.6.3. MECI utilizes a 60 cm calibrated turbidity tube for turbidity measurements. The tube is marked with a 60 cm tape that has been calibrated into Nephelometric Turbidity Units (NTU). Turbidity is measured by filling the Turbidity Tube with purge water. The water is drained from the bottom of the tube while the user looks towards the bottom of the tube. Once the Secchi disk pattern at the bottom of the tube is visible, the drain tube is closed, and a reading is taken according to the amount of purge water remaining in the tube.

4.3.6.4. Field Measurements are taken by fully submerging the probes from the YSI550A and YSI63 into water taken from the well. Readings are allowed to equilibrate, then the measurement is recorded.

4.3.6.5. Meters are to be stored in waterproof cases inside of the office when not in use, to prevent possible exposure damage.

## 4.4. Aquifer Characterization

Aquifer specific data will be collected using methods appropriate to the local geology of the facility. MECI will primarily utilize slug tests to obtain specific aquifer data. This data, combined with sieve analysis and hydrometer data will be utilized in aquifer calculations.

### 4.4.1. Slug Test

A normal characterization for a Tier II assessment will require slug tests on two watertable bracketing monitoring wells and one deep monitoring well. Other scopes of work will require a varying number of slug tests.

4.4.1.1. Slug tests will be completed utilizing prepackaged, clear, disposable polyethylene bailers, nylon rope, stop-watch and previously decontaminated electronic water level indicator.

4.4.1.2. Prior to starting the Slug test, a static groundwater measurement will be taken.

4.4.1.3. Water is removed from the well until the water level in the well has been reduced at least one foot.

4.4.1.4. The stopwatch is started as soon as the last bail of water is removed from the well.

4.4.1.5. The water level indicator is lowered into the well and groundwater elevation readings are taken at 15-second intervals for the first two minutes. This interval can be expanded as the test continues.

4.4.1.6. Water level measurements are taken until the water level in the well has returned to within 90 percent of the static level, or one hour has elapsed.

Re: **Assessment Directive**
Crawford's Country Store
5870 Hwy 28 North, Abbeville, SC 29620
UST Permit # 12335; CA # 46938; UMW # 25248
Release Reported December 3, 1991
QAPP Addendum Received October 16, 2013
Abbeville County

Dear Mr. Crawford:

The Underground Storage Tank (UST) Management Division (Division) of the South Carolina Department of Health and Environmental Control (Agency) has reviewed the referenced Quality Assurance Program Plan (QAPP) addendum submitted on your behalf by Midlands Environmental Consultants, Inc. The previous assessment work for this release indicates that petroleum Chemicals of Concern (CoC) are present in the soil and groundwater at concentrations that exceed risk-based screening levels. In order to determine the extent of the CoC, additional assessment and sampling is necessary. All work should be conducted in accordance with the UST QAPP Revision 2.0, and must be conducted in compliance with all applicable regulations. A copy of the Agency Quality Assurance Program Plan (QAPP) Rev. 2.0 for the UST Management Division is available at http://www.scdhec.gov/environment/lwm/usthome/Qapp.htm.

Assessment activities at the site should begin immediately upon receipt of this letter. Cost agreement # 46938 has been approved for the amount shown on the enclosed cost agreement form for field screening, replacement of MW-12 and MW-13R, additional monitoring well installation, subsequent survey, and comprehensive groundwater sampling. The necessary monitoring well approval is enclosed. Field screening should be conducted in the locations described within the referenced QAPP. The final number of additional monitoring wells and their install locations will be determined upon review of field screening data. Groundwater analyses should be conducted for BTEX, Naphthalene, MTBE, Oxygenates, 1,2-DCA, Ethanol, and EDB. Analyses should be in accordance with Appendix E of the QAPP to include duplicate samples, field and trip blanks.

In accordance with the QAPP Rev. 2.0, if any quality assurance problems arise, you must contact the Agency project manager within 24 hours via phone or e-mail. In addition, a discussion of the problem(s) encountered, including quality assurance problems, the actions taken, and the results must be included in the final report submitted to the UST Management Division.

**The Assessment Report, contractor checklist (QAPP Appendix K), and invoice are due within 90 days from the date of this letter.** The report submitted at the completion of these activities should include the required information outlined in the QAPP. Please note that all applicable South Carolina certification requirements apply to the services and report preparation. All site rehabilitation activities must be performed and submitted by a South Carolina Certified Underground Storage Tank Site Rehabilitation Contractor.

You can submit an invoice for direct payment from State Underground Petroleum Environmental Response Bank (SUPERB) Account for pre-approved costs. By law, the SUPERB Account cannot compensate any costs that are not pre-approved. Please note that applicable South Carolina certification requirements regarding laboratory services, well installation, and report preparation must be satisfied. If the invoice is not submitted within 120 days from the date of this letter, monies allocated to pay this invoice will be uncommitted. This means that the invoice will not be processed for payment until all other committed funds are paid or monies become available.

Please note that Sections 44-2-110(4) and 44-2-130 of the SUPERB Statute state that no costs will be allowed unless prior approval from the Agency is obtained. If for any reason additional tasks will be completed, these additional tasks and the associated cost must be pre-approved by the Division for the cost to be paid. The Agency reserves the authority to pay only for work properly performed and/or technically justified and will only pay rates in accordance with established criteria. Further, the Agency reserves the right to question and/or reject costs if deemed unreasonable and the right to audit project records at any time during the project or after completion of work.

Please note, if unnecessary dilutions are completed resulting in reporting limits of individual CoC in excess of Risk-Based Screening Levels (RBSLs), the data cannot be used. In those cases, the UST Division may deny payment for any non-detect analysis where the reporting limit exceeds the RBSL. The UST Management Division encourages the use of 'J' values as necessary so the appropriate action can be determined for a release.

The Agency grants pre-approval for transportation of virgin petroleum impacted soil and groundwater from the referenced site to a permitted treatment facility. The transport and disposal must be conducted in accordance with the QAPP. If the CoC concentrations based on laboratory analysis are below RBSLs, please contact the project manager for approval to dispose of soil and/or groundwater on site. The SUPERB Account will not reimburse for transportation or treatment of soil and/or groundwater with concentrations below RBSLs.

On all correspondence regarding this site, please reference UST Permit # 12335 and CA # 46938. If you have any questions regarding this correspondence, please contact me by telephone at (803) 898-0607, by fax at (803) 898-0673, or by e-mail at ShullSS@dhec.sc.gov.

# Monitoring Well Approval Form

| | |
|---|---|
| Approval is hereby granted to: | Midlands Environmental Consultants, Inc. |
| (on behalf of): | Frank Crawford |
| Facility: | Crawfords Country Store |
| UST Permit Number: | 12335 |
| County: | Abbeville |

This approval is for the installation of twenty-one (21) temporary field screening points, up to eight (8) shallow monitoring wells and up to two (2) deep monitoring wells. The monitoring wells are to be installed in the approved location. The monitoring wells are to be installed following the South Carolina Well Standards, R.61-71, and the applicable guidance documents.

*Please note that R.61-71 requires the following:*

1. All wells shall be drilled, constructed, and abandoned by a South Carolina certified well driller per R.61-71.D.1.
2. All monitoring wells shall be labeled as required by R.61-71.H.2.c.
3. A Water Well Record Form or other form provided or approved by the Agency shall be completed and submitted to the Agency within 30 days after well completion or abandonment unless another schedule has been approved by the Agency. The form should contain the "as-built" construction details and all other information required by R.61-71.H.1.f
4. All analytical data and water levels obtained from each monitoring well shall be submitted to the Agency within 30 days of receipt of laboratory results unless another schedule has been approved by the Agency as required by R.61-71.H.1.d.
5. If any of the information provided to the Agency changes, notification to Shane Shull (tel: (803) 898-0607 or e-mail: ShullSS@dhec.sc.gov) shall be provided a minimum of twenty-four (24) hours prior to well construction as required by R.61-71.H.1.a.
6. All temporary monitoring wells shall be abandoned within 5 days of borehole completion using appropriate methods as required by R.61-71.H.4.c. All other wells shall be properly developed per R.61-71.H.2.d.
7. Agency approval is required prior to abandonment of all monitoring wells as required by R.61-71.H.1.a.

This approval is pursuant to the provisions of Section 44-55-40 of the 1976 South Carolina Code of Laws and R.61-71 of the South Carolina Well Standards and Regulations, dated April 26, 2002. A copy of this approval should be on the site during well installation.

Date of Issuance: October 25, 2013 Approval #: UMW-25248

Dear Mr. Shull,

On behalf of Mr. Frank Crawford, Midlands Environmental Consultants Inc. (MECI) is pleased to submit the attached the Additional Assessment Report for the referenced site. This report describes assessment activities conducted at the site and results of those activities in general accordance with South Carolina Department of Health and Environmental Control (SCDHEC) guidelines, including adherence to the UST Division Programmatic Quality Assurance Program Plan (QAPP, Revision 2.0).

Midlands Environmental appreciates the opportunity to offer our professional environmental services to you on this project. Please feel free to contact us at 803-808-2043 if you have any immediate questions or comments.

Sincerely,
**Midlands Environmental Consultants, Inc.**

## 1.1 PROJECT INFORMATION

The subject site (Crawford's Country Store) is located at 5870 S.C. Highway 28 North in Abbeville, Abbeville County, South Carolina (see Figure 1). The subject site is currently an active gasoline service station and convenience store. Previously, the subject site maintained one 2,000 gallon gasoline underground storage tank (UST), one 1,000 gallon kerosene UST, one 560 gallon diesel UST, one 8,000 gallon gasoline UST, and one 10,000 gallon gasoline UST. The former UST's were removed from the ground in October of 1991. The South Carolina Department of Health and Environmental Control (SCDHEC) reported a release of petroleum product in December of 1991 and confirmed the release in March of 1993. Currently, the subject site maintains one 3,000 gallon diesel UST, one 6,000 gallon off-road diesel UST, one 6,000 gallon premium gasoline UST, one regular unleaded gasoline UST, and one 10,000 gallon regular unleaded gasoline UST.

The above information is based on reports and correspondence obtained from SCDHEC files and MECI field notes.

## 2.0 POTENTIAL RECEPTOR SURVEY

MECI personnel conducted a survey of potential receptors within a 1,000-foot radius of the site boundaries. During this survey, twelve water supply wells and two surface water bodies were identified.

The following table identifies water supply wells and their approximate distance from the site:

| Water Supply Well Number | Approximate Distance from MW-3 | Abbeville County Tax Map Number: | Notes: | Well Status |
|---|---|---|---|---|
| CLS-WW | 167' Feet NE | 046-00-00-080 | 5870 S.C. Highway 28 N. (Onsite) | Active |
| CP-WW | 291' Feet SE | 046-00-00-049 | 5846 S.C. Highway 28 N | Abandoned |
| CP-WW2 | 281' Feet S | 046-00-00-049 | 5846 S.C. Highway 28 N | Active |
| EMS-WW | 244' Feet SW | 046-00-00-048 | 3 Highway 184 N | Active |
| McCullough-WW | 703' Feet SE | 047-00-00-004 | 5804 Highway 28 N | Active |
| Café-WW | Approx. 580' Feet NW | 046-00-00-044 | Fork @ S.C. Hwy. 28 & S.C. Hwy. 184 | Active |
| Old Service Station-WW | 976' Feet N | 046-00-00-043 | 3174 South Carolina Highway 260 | Active |
| Scott-WW | 1,041' Feet NW | 046-00-00-037 | 88 S.C. Highway N | Active |
| Farm-WW | 1,044' Feet SW | 046-00-00-106 | Dry Hollow Rd. & Parker Rd. | Active |
| Major-WW | 1,257' Feet S | 046-00-00-051 | 45 Parker Road | Active |
| Driver-WW | 1,387' Feet S | 046-00-00-050 | 5733 S.C. Highway 28 N | Inactive |
| Gin House-WW | 682' Feet W | 046-00-00-041 | Dry Hollow Rd. & Gin House Road | Unknown |

All listed water supply wells listed above were sampled during the reference assessment, except for the CP-WW and Gin House-WW. Water well CP-WW was abandoned in place on March 8, 2012 BY Environmental Drilling & Probing Services. The Gin House-WW was located behind a locked fence during assessment activities and the property owner could not be located. Furthermore, the actual location of the Café-WW is not exactly known and is believed to be buried in the northeastern portion of Tax Map # 046-00-00-044. A sample (Café-WW) was collected from a spigot located along the south western corner of the onsite structure.

A pond and intermittent creek associated with the Spur Creek is located to east of the site. The pond is located approximately 700' feet northeast of the site and samples were not collected as part of this assessment. South of the pond is a swampy area which leads to an intermittent creek, which begins approximately 175' feet east of MW-34 and flows southeast. Surface water samples were collected were collected adjacent to monitoring well MW-25 (SW-1) and approximately 250' feet southeast of MW-25 (SW-2).

Telephone, electric, and septic line were identified on and surrounding the site. Utilities at the site are buried approximately three to six feet below ground surface (BGS). Given the burial depth of the utilities and the depth to groundwater, it is unlikely that utilities would serve as receptors or preferential pathways. See Figure 2, Figure 2A, and Appendix A for detailed information relating to the receptor locales.

## 2.1 SURROUNDING PROPERTY USAGE

The subject site is located outside the town limits of Abbeville in an area known as Antreville, Abbeville County, South Carolina. The site is currently an active gasoline service station and convenience store. A wildlife processing center and residence is located directly south of the site, beyond which is residential farm. East of the site is bordered by a grass field, beyond which is a swampy area and grass fields. South Caroline Highway 28 forms the western border of the site, beyond which is an Abbeville County EMS facility. South of the EMS facility is a large agricultural field and residences. Northwest of the site is a Café and old gasoline service station.

## 3.0 AREA GEOLOGY AND HYDROGEOLOGY

The mean elevation of the property, as depicted on the local USGS quadrangle (Moore, SC), appears to be approximately 710 feet above sea level. The site is located in the Piedmont Physiographic Province of South Carolina, an area underlain by ancient igneous and metamorphic rocks. The soils in this province are generally residual soils that are underlain by rock at highly varying depths.

The soils encountered in this area are the product of in-place weathering of rocks similar to the rocks underlying the site. In areas not altered by erosion or disturbed by the activities of man, the typical residual soil profile consists of near surface clayey soils and underlying sandy silt and sand. The boundary between soil and rock is gradational. A transitional zone termed "weathered rock" is normally found overlying the parent bedrock. This zone is typically the most transmissive zone for groundwater movement. Consequently, the topography of the bedrock surface is uneven, even over short horizontal distances. It is not unusual to find lenses and boulders of hard rock and zones of weathered rock within the soil mantle well above the general bedrock level.

Local precipitation is the source of practically all of the groundwater in Spartanburg County. A portion of the precipitation infiltrates into the ground and moves under the influence of gravity to the surficial aquifer. After the water has reached the surficial aquifer, the direction of movement is generally parallel to the hydraulic gradient. In the Piedmont Province, the slope of the surficial aquifer's surface under static conditions (no pumping interference) approximates the topography of an area. Thus, the movement of groundwater within the soil mantel is typically in the direction of the topographic slope. Local groundwater flow patterns may be affected by disturbed areas such as tank pits, utility trenches, building foundations, borings, wells, etc. Groundwater flow in fractured rock is often difficult to interpret due to the variability of fracture connectivity and orientation.

Locally, in the surficial aquifer, groundwater discharges into streams, lakes or springs where the groundwater table intersects lows occupied by these water bodies. The apparent direction (based on hydraulic gradient) of groundwater flow from the release is to the south and southeast, towards the unnamed intermittent creek associated with the Spur Creek. Analytical data indicates this unnamed creek may be impacted with petroleum contamination.

## 3.1 LOCAL SUBSURFACE CONDITIONS

Piedmont residual soils were encountered during drilling activities conducted at the site. The soils encountered in our borings generally consisted of micaceous fine sandy clayey silts. Residual soils were underlain by coarser grained saprolitic soils at depths of approximately 20' feet BGS. Partially weathered rock was encountered at a depth of 32' feet BGS during the installation of monitoring well

DMW-39. Mud-rotary refusal was encountered at 35' BGS during the installation of DMW-39 and the well is set on top of a potential confining formation. Test Boring Records, which depict the materials encountered in each boring, are located in Appendix A.

On February 18th, 2014, stabilized groundwater levels were measured in the surrounding monitoring wells. Depth to groundwater ranged from 0.00 to 20.79 feet BGS in the wells measured. The groundwater measurements are summarized in tabular form in Table 2 and on Figure 5. A groundwater contour map illustrating the groundwater flow direction at the site is also depicted on Figure 5.

Groundwater levels may fluctuate several feet with seasonal and rainfall variations and with change in the water level of adjacent drainage features. Normally, the highest groundwater levels occur in late winter and spring. The lowest levels occur in late summer and fall.

The above descriptions provide a general summary of the subsurface conditions encountered. The attached Test Boring Records (Appendix E) contain detailed information recorded at each new monitoring well location. The Test Boring Records represent our interpretation of the field logs based on examination of the field samples. The lines designating the interfaces between various strata represent approximate boundaries, and the transition between strata may be gradational.

## 4.0 FIELD EXPLORATION

Field exploration conducted at the site included:

- Field screening of groundwater samples collected from the site utilizing direct push techniques and laboratory analysis of samples;
- construction of eighteen (18) groundwater monitoring wells;
- repair of two monitoring wells;
- comprehensive sampling of the entire well network, nearby water supply wells, and surface water bodies;
- chemical analyses of groundwater samples; and,
- a comprehensive survey of subject site.

The monitoring well locations were selected based on the analytical results of groundwater field screening, property access, existing site conditions, estimated groundwater flow direction, and drilling accessibility.

Following the well installation, a comprehensive survey was conducted by Construction Support Services of Columbia, SC (Jay S. Joshi PLS# 14811) to locate the vertical and horizontal positions of the monitoring wells and relevant structures.

## 4.1 DIRECT PUSH GROUNDWATER FIELD SCREENING

From November 13th, 2013 through December 4th, 2013, fifty-one (51) direct push field screening points were advanced at the site to collect groundwater samples. These temporary borings were installed by W. Walker Environmental Services of West Columbia, South Carolina (S.C. Drilling Certification: William Walker #C 02402). These temporary borings were advanced utilizing an ATV-mounted drilling rig utilizing direct push technologies. The sampling depth for each of the locations was based on the water table depth, the yield of the water bearing zone as evidenced by flow of water into the direct push apparatus, and the ability to reach the watertable. The samples were generally taken at the shallowest bearing zone, with the exception of those taken to determine vertical extent. The total footage for the direct push borings was 1,189 feet. The sample locations are presented on Figure 3. To prevent cross-contamination between borings the reusable down-hole portion of the direct push sampling device was cleaned between borings. New Teflon tubing was utilized at each location. Following the collection of the groundwater samples, the hole left open by the direct push sampling device was abandoned with a bentonite/portland grout slurry. 1903 forms documenting the depth and abandonment of the direct push borings are attached in Appendix D.

The groundwater samples obtained were transported to Shealy Environmental Services, Inc of West Columbia, SC (SCDHEC Laboratory Certification #32010) for analysis for BTEX, naphthalene, and methyl-tertiary butyl ether (EPA Method 8260B). Analytical results for laboratory samples collected from the direct push borings are summarized in Table 1, Figure 3, and laboratory reports are included in Appendix B.

## 4.2 MONITORING WELL INSTALLATION

From January 26th, 2014 to February 6th, 2014, eighteen (18) monitoring wells were installed at the subject site. These wells were installed by Environmental Drilling and Probing Services, LLC. of Charlotte, North Carolina (S.C. Drilling Certification: David Brown #B 02053). Monitoring wells MW-12R, and MW-24 through MW-35 were installed as single cased, watertable bracketing monitoring wells. These watertable bracketing monitoring wells utilize a ten foot screen.

Monitoring wells DMW-36 through DMW-40 were installed as double cased "deep" monitoring wells. During construction, a 6 ¼-inch outer casing was advanced to the desired depth and grouted in-place. The grout was allowed to cure and the remainder of the depth of the borehole was achieved using mud-rotary techniques.

The following table presents well installation details:

| Well Number | Single Cased | Double Cased | Screened Interval | Total Depth (ft) |
|---|---|---|---|---|
| MW-12R | X | | 15.0-25.0 | 25.02 |
| MW-24 | X | | 2.0-12.0 | 12.31 |
| MW-25 | X | | 2.0-12.0 | 12.46 |
| MW-26 | X | | 2.0-12.0 | 11.44 |
| MW-27 | X | | 2.0-12.0 | 12.30 |
| MW-28 | X | | 14.0-24.0 | 23.73 |
| MW-29 | X | | 15.0-25.0 | 25.50 |
| MW-30 | X | | 14.0-24.0 | 24.33 |
| MW-31 | X | | 14.0-24.0 | 23.88 |
| MW-32 | X | | 14.0-24.0 | 23.85 |
| MW-33 | X | | 17.0-27.0 | 27.22 |
| MW-34 | X | | 5.0-15.0 | 15.11 |

| Well Number | Single Cased | Double Cased | Screened Interval | Total Depth (ft) |
|---|---|---|---|---|
| MW-35 | X | | 18.0-28.0 | 27.94 |
| DMW-36 | | X | 55.0-60.0 | 60.72 |
| DMW-37 | | X | 45.0-50.0 | 50.23 |
| DMW-38 | | X | 45.0-50.0 | 49.55 |
| DMW-39 | | X | 30.0-35.0 | 34.85 |
| DMW-40 | | X | 45.0-50.0 | 50.53 |

The soils encountered during drilling activities generally consisted of micaceous sandy clayey silts near surface, underlain by more coarse sandy silts with depth. Representative portions of soil samples were screened with a Photo Ionization Detector (PID) and classified by MECI personnel. Test boring records showing soil descriptions and screening result are attached in Appendix E.

Drill cuttings were containerized and transported to Abbeville County Landfill by MECI personnel. A total of 5.02 tons was disposed of in this manner. A disposal manifest for these soils is presented in Appendix G.

Following completion of the monitoring wells, the wells were developed by purging until they were determined to be functioning properly and turbidity was reduced. These wells were developed utilizing a Whale-Mega Purger well pump. The drum of purge water was treated by MECI personnel using a granular activated carbon drum. A total of 165.0 gallons of purge/development water was disposed of in this manner. A disposal manifest for the treated purge water is presented in Appendix G.

### 4.3 MONITORING WELL REPAIR

During well installation activities, new well pads were replaced on monitoring wells MW-8 and MW-15 to insure the security of the monitoring wells. In addition, the well vault from MW-8 was replaced as well. The well repair was completed under the direction of Mr. David Brown (SC Driller's License # B 02053) Environmental Drilling and Probing Services, LLC of Charlotte, NC.

### 4.4 MONITORING WELL SAMPLING AND CHEMICAL ANALYSES

On February 18, 2014, MECI personnel collected groundwater samples from the thirty-nine (39) monitoring wells at the subject site. Monitoring wells MW-3 was gauged and determined to contain 0.01 feet of measurable free phase petroleum product. All newly installed monitoring wells and pre-existing monitoring wells were purged prior to sample collection. Thirty-nine (39) monitoring wells were purged prior to sample collection.

Purging of the monitoring wells was completed utilizing a prepackaged, clear, disposable polyethylene bailer and nylon rope. Purging was completed by bailing three to five well volumes of water from the well, until pH, conductivity, dissolved oxygen, and turbidity stabilized or until all available water was evacuated from the well, whichever occurred first. A new set of nitrile gloves were worn at each monitoring well, and at all times samples were handled. Field measurements of turbidity, pH, conductivity, dissolved oxygen, and water temperature were obtained before the well sampling process. MECI utilized YSI550A meters for DO (mg/L) and temperature readings (°C), YSI63 meters for pH and conductivity (uS) readings, and a MicroTPI/TPW Turbidimeter for turbidity readings (NTU). The attached Field Data Information Sheets presents the results of the field measurements obtained during sampling processes. All wells were sampled in accordance with SCDHEC's Quality Assurance Program Plan for the Underground Storage Tank Management

Division (QAPP, Revision 2.0) and MECI's Standard Operating Procedures (MECI SOP, January 2014). Groundwater samples obtained were sent to Shealy Environmental Services, Inc. of West Columbia, SC (SCDHEC Laboratory Certification #32010) for analysis.

The following sampling matrix contains well development and requested analyses for each well:

| Monitoring Well | Purge | No Purge | Gauge Only | BTEX, Naphthalene, MTBE (EPA Method 8260-B) | EDB (EPA Method 8011) | 1,2 DCA (EPA Method 8260-B) | 8 Oxygenates (EPA Method 8260-B) | Total Lead (EPA Method 6010) | Filtered Lead (EPA Method 6010) | Sulfate (EPA Method 375.2) | Nitrate (EPA Method 335.2) | Methane (RSK Method) | PAH's (EPA Method 8270) |

The results of the laboratory analyses are summarized in Tables 3, Table 3A and presented in Appendix B.

Purge water produced by the purging process was treated on-site utilizing a granular activated carbon unit. A total of 224.0 gallons of purge water was disposed of in this manner. A disposal manifest for the referenced purge water is presented in Appendix G.

### 4.5 WATER SUPPLY WELL SAMPLING AND CHEMICAL ANALYSES

On February 18, 2014, MECI collected samples from ten (10) water supply wells. As discussed in Section 2.0, water supply well CP-WW is abandoned and the Gin House-WW could not be sampled due to the well being locked inside a fence and the property owner was unable to be located.

The samples obtained from the water supply wells were analyzed for volatile organic compounds including BTEX, naphthalene, methyl-tertiary-butyl-ether, 1,2 DCA, 8 oxygenates (EPA Method 8260B) and EDB (EPA method 8011). Results of the laboratory analyses are discussed in Section 5.2 and summarized in Table 3 & 3A. The analytical results are also presented in Appendix B.

## 4.6 SURFACE WATER SAMPLING AND CHEMICAL ANALYSIS

Two surface water samples were collected on February 18, 2014. SW-1 and SW-2 were collected from an unnamed intermittent creek associated with the Spur Creek. Surface water samples were collected adjacent to monitoring well MW-25 (SW-1) and approximately 250' feet southeast of MW-25 (SW-2). This creek may act as a point of local groundwater discharge.

The samples obtained from the surface water locales were analyzed for volatile organic compounds including BTEX, naphthalene, methyl-tertiary-butyl-ether, 1,2 DCA, 8 oxygenates (EPA Method 8260B) and EDB (EPA method 8011). Results of the laboratory analyses are discussed in Section 5.2 and summarized in Table 3 & 3A. The analytical results are also presented in Appendix B.

## 4.7 SITE SURVEY

Following the well installation, a comprehensive survey was conducted by Construction Support Services of Columbia, SC (Jay S. Joshi PLS# 14811) dated March 7, 2014 to locate the vertical and horizontal positions of the monitoring well network and relevant structures. A signed/stamped copy of the comprehensive survey is attached in Appendix A. See Table 2 and Figure 5 for monitoring well elevation data.

## 5.0 TEST RESULTS AND EVALUATION

The following sections discuss groundwater test results for the subject site.

## 5.1 GROUNDWATER ANALYTICAL RESULTS

As discussed in Section 4.4, groundwater samples obtained from the monitoring wells during the February 18, 2014 comprehensive groundwater sampling event were analyzed for dissolved phase petroleum constituents. Free phase petroleum product was detected in MW-3 at a thickness of 0.01 feet. Groundwater samples beneath the free product layer were not collected from MW-3 during the subject sampling event. The analytical results indicate petroleum impact to the surficial aquifer ("Shallow" Zone), with the highest dissolved concentrations being detected in the area of OMW-1 and MW-1R. Of the thirty-nine monitoring wells sampled, fourteen monitoring wells (OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-19, MW-20, MW-22, MW-25, MW-31, MW-35, DMW-39, and DMW-40) detected petroleum constituents above Risked Based Screening Levels (RBSL's). Petroleum constituents detected above the established RBSL include:

| ***Compound*** | ***RBSL (ug/l)*** | ***Wells Above RBSL*** |
|---|---|---|
| Benzene | 5 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-22, MW-35, & DMW-40 |
| Toluene | 1,000 | OMW-1, MW-1R, MW-2, & MW-10 |
| Ethylbenzene | 700 | OMW-1, MW-1R, MW-2, & MW-10 |
| Total Xylenes | 10,000 | OMW-1 & MW-1R |
| Naphthalene | 25 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-13R, MW-22, MW-35, & DMW-40 |
| MTBE | 40 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-19, MW-20, MW-22, MW-25, MW-31, MW-35, DMW-39 & DMW-40 |
| EDB | 0.05 | OMW-1, MW-1R, MW-4, & MW-10 |

In addition, the analytical results also detected petroleum constituents above the laboratory method detection limit in monitoring wells MW-5, MW-7, MW-9, MW-16, MW-21, MW-23, MW-26, MW-27, MW-29, MW-33, MW-34, DMW-36, and DMW-37; however the concentrations detected did not exceed the RBSL. The results of the analyses for each monitoring well and specific parameters are listed on Table 3, Table 3A, and provided in Appendix B.

## 5.2 WATER SUPPLY WELL ANALYTICAL RESULTS

As discussed in section 4.5, water samples were obtained from ten water supply wells during the February 18, 2014 groundwater sampling event. The samples obtained from the above mentioned water supply wells were analyzed for petroleum constituents. The laboratory results from the samples obtained from CLS-WW, CP-WW2, EMS-WW, Café-WW, Old Service Station-WW, Scott-WW, Farm-WW, Major-WW, and Driver-WW did not indicate petroleum impact and all petroleum compounds were below detection limits. MTBE was detected above the method detection limit (1.8 micrograms per liter) in the sample obtained from the McCullough-WW; however this detection is below the established RBSL for MTBE. The results of the analysis for the water supply well and specific parameters are listed on Table 3, Table 3A, and provided in the laboratory reports (Appendix B).

## 5.3 SURFACE WATER SAMPLING AND CHEMICAL ANALYSIS

During the February 18, 2014 sampling event, two samples were collected from the nearby surface water (SW-1 & SW-2). Samples collected at SW-1 and SW-2 indicates MTBE concentrations above the method detection limit, but below the established RBSL. MTBE concentrations were detected at 1.5 micrograms per liter in SW-1 and at 1.4 micrograms per liter in SW-2. The results of the analysis for the surface water and specific parameters are listed on Table 3, Table 3A, and provided in the laboratory reports (Appendix B).

## 5.4 GROUNDWATER MOVEMENT

Groundwater movement is often related to topography, lithology, and elevation of recharge and discharge areas and man-made influences. Referenced groundwater elevations were determined by measuring the top of the monitoring well casing relative to a nearby datum elevation (see Figure 5) measuring the water level in the monitoring well, and computing the reference elevation of the groundwater at the time of measurement. Groundwater levels typically fluctuate with seasonal and rainfall variations.

Directions of groundwater flow were interpolated between monitoring wells by comparing the groundwater elevations at those locations considering the factors listed above. Locally, in the surficial aquifer, groundwater discharges into streams, lakes or springs where the groundwater table intersects lows occupied by these water bodies.

Groundwater elevation data from the February 18, 2014, gauging event was plotted and a groundwater contour map of the "shallow" aquifer was prepared. The data used to prepare the groundwater contour map (groundwater elevations in site monitoring wells) are summarized on Figure 5. The groundwater flow directions from the ""Shallow" surficial aquifer appear to be moving to south-southeast toward unnamed intermittent creek associated with the Spur Creek.

## 6.0 ASSESSMENT SUMMARY & RECOMMENDATIONS

Based on the results of our assessment activities, it appears that impact to the surficial aquifer has occurred due to a release of petroleum hydrocarbons. Free phase petroleum product was detected in monitoring well MW-3 during the February 18, 2014 sampling event. The analytical results indicate petroleum impact to the "shallow" surficial aquifer, with the highest dissolved concentrations being detected in the area of the former UST basin (OMW-01 & MW-1R). Additionally, the highest concentrations of dissolved phase petroleum constituents to the "deep" zone were detected in the area of DMW-40. Groundwater appears to be moving to the south-southeast toward unnamed intermittent creek associated with the Spur Creek.

Free phase petroleum product was detected in MW-3 at a thickness of 0.01 feet. Groundwater samples beneath the free product layer were not collected from MW-3 during the subject sampling event. The analytical results indicate petroleum impact to the surficial aquifer ("Shallow" Zone), with the highest dissolved concentrations being detected in the area of OMW-1 and MW-1R. Of the thirty-nine monitoring wells sampled, fourteen monitoring wells (OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-19, MW-20, MW-22, MW-25, MW-31, MW-35, DMW-39, and DMW-40) detected petroleum constituents above Risked Based Screening Levels (RBSL's). Petroleum constituents detected above the established RBSL include:

| ***Compound*** | ***RBSL (ug/l)*** | ***Wells Above RBSL*** |
|---|---|---|
| Benzene | 5 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-22, MW-35, & DMW-40 |
| Toluene | 1,000 | OMW-1, MW-1R, MW-2, & MW-10 |
| Ethylbenzene | 700 | OMW-1, MW-1R, MW-2, & MW-10 |
| Total Xylenes | 10,000 | OMW-1 & MW-1R |
| Naphthalene | 25 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-13R, MW-22, MW-35, & DMW-40 |
| MTBE | 40 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-19, MW-20, MW-22, MW-25, MW-31, MW-35, DMW-39 & DMW-40 |
| EDB | 0.05 | OMW-1, MW-1R, MW-4, & MW-10 |

In addition, the analytical results also detected petroleum constituents above the laboratory method detection limit in monitoring wells MW-5, MW-7, MW-9, MW-16, MW-21, MW-23, MW-26, MW-27, MW-29, MW-33, MW-34, DMW-36, and DMW-37; however the concentrations detected did not exceed the RBSL.

Figures 4 (Benzene Isopleth), 4A (Toluene Isopleth), 4B (Ethylbenzene Isopleth), 4C (Total Xylenes Isopleth), 4D (Naphthalene Isopleth), and 4E (MTBE Isopleth) depict graphically the concentrations and approximate extent of each listed petroleum compound in the surficial aquifer at the site. Figure 4F presents the 8 oxygenates analytical data from all monitoring wells installed in conjunction with the subject UST release.

Based on current analytical results, the contaminant plume emanating from the subject site appears to be defined downgradient, both horizontally and vertically. The plume is not defined (sidegradient) to the west of MW-31/DMW-39; however this is due to property access issues with a very large tract of agricultural land. MECI recommends continued monitoring of the monitoring well network and

nearby receptors. Furthermore, MECI recommends a series of extended AFVR events be conducted on monitoring wells exhibiting free phase petroleum product and elevated concentrations of dissolved phase petroleum constituents.

## 7.0 QUALIFICATIONS OF REPORT

The activities and evaluative approaches used in this assessment are consistent with those normally employed in hydrogeological assessment and waste management projects of this type. Our evaluation of site conditions has been based on our understanding of the site, project information provided to us, and data obtained in our exploration. The general subsurface conditions utilized in our evaluation have been based on interpretation of subsurface data between borings. Contents of this report are intended for the sole use of Mr. Frank Crawford, SCDHEC, and MECI under mutually agreed upon terms and conditions. If other parties wish to rely on this report please contact MECI prior to their use of this information so that a mutual understanding and agreement of the terms and conditions of our services can be established.

# Groundwater CoC Site Map
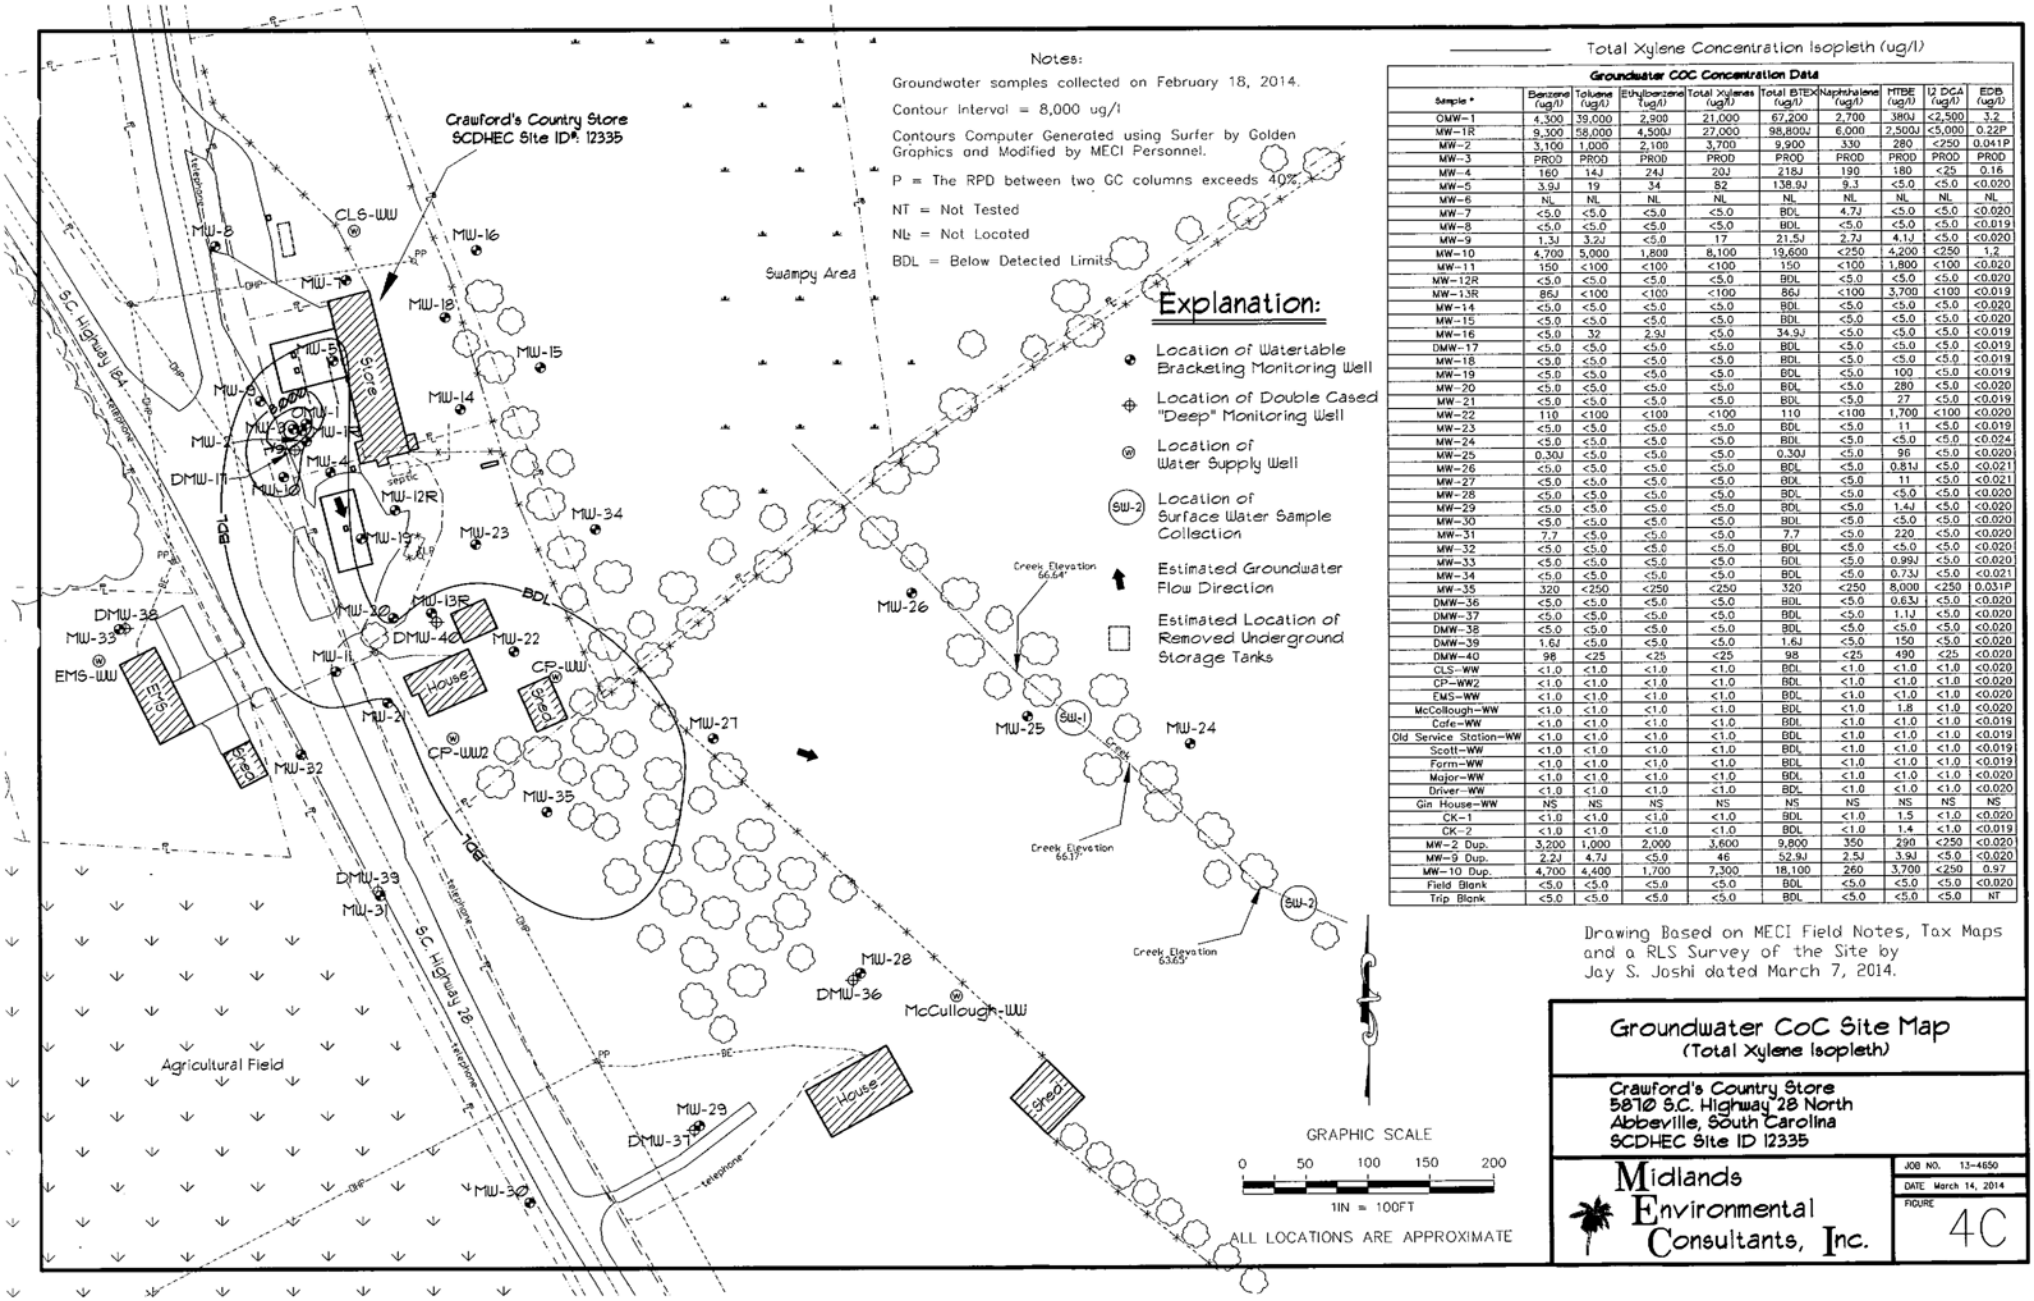
(Ethylbenzene Isopleth)

Crawford's Country Store
5810 S.C. Highway 28 North
Abbeville, South Carolina
SCDHEC Site ID 12335

Midlands Environmental Consultants, Inc.

JOB NO. 13-4650
DATE March 14, 2014
FIGURE 4B



Notes:

Groundwater samples collected on February 18, 2014.

Contour Interval = 8,000 ug/l

Contours Computer Generated using Surfer by Golden Graphics and Modified by MECI Personnel.

P = The RPD between two GC columns exceeds 40%

NT = Not Tested

NL = Not Located

BDL = Below Detected Limits

## Explanation:

- Location of Watertable Bracketing Monitoring Well
- Location of Double Cased "Deep" Monitoring Well
- Location of Water Supply Well
- Location of Surface Water Sample Collection
- Estimated Groundwater Flow Direction
- Estimated Location of Removed Underground Storage Tanks
- Total Xylene Concentration Isopleth (ug/l)

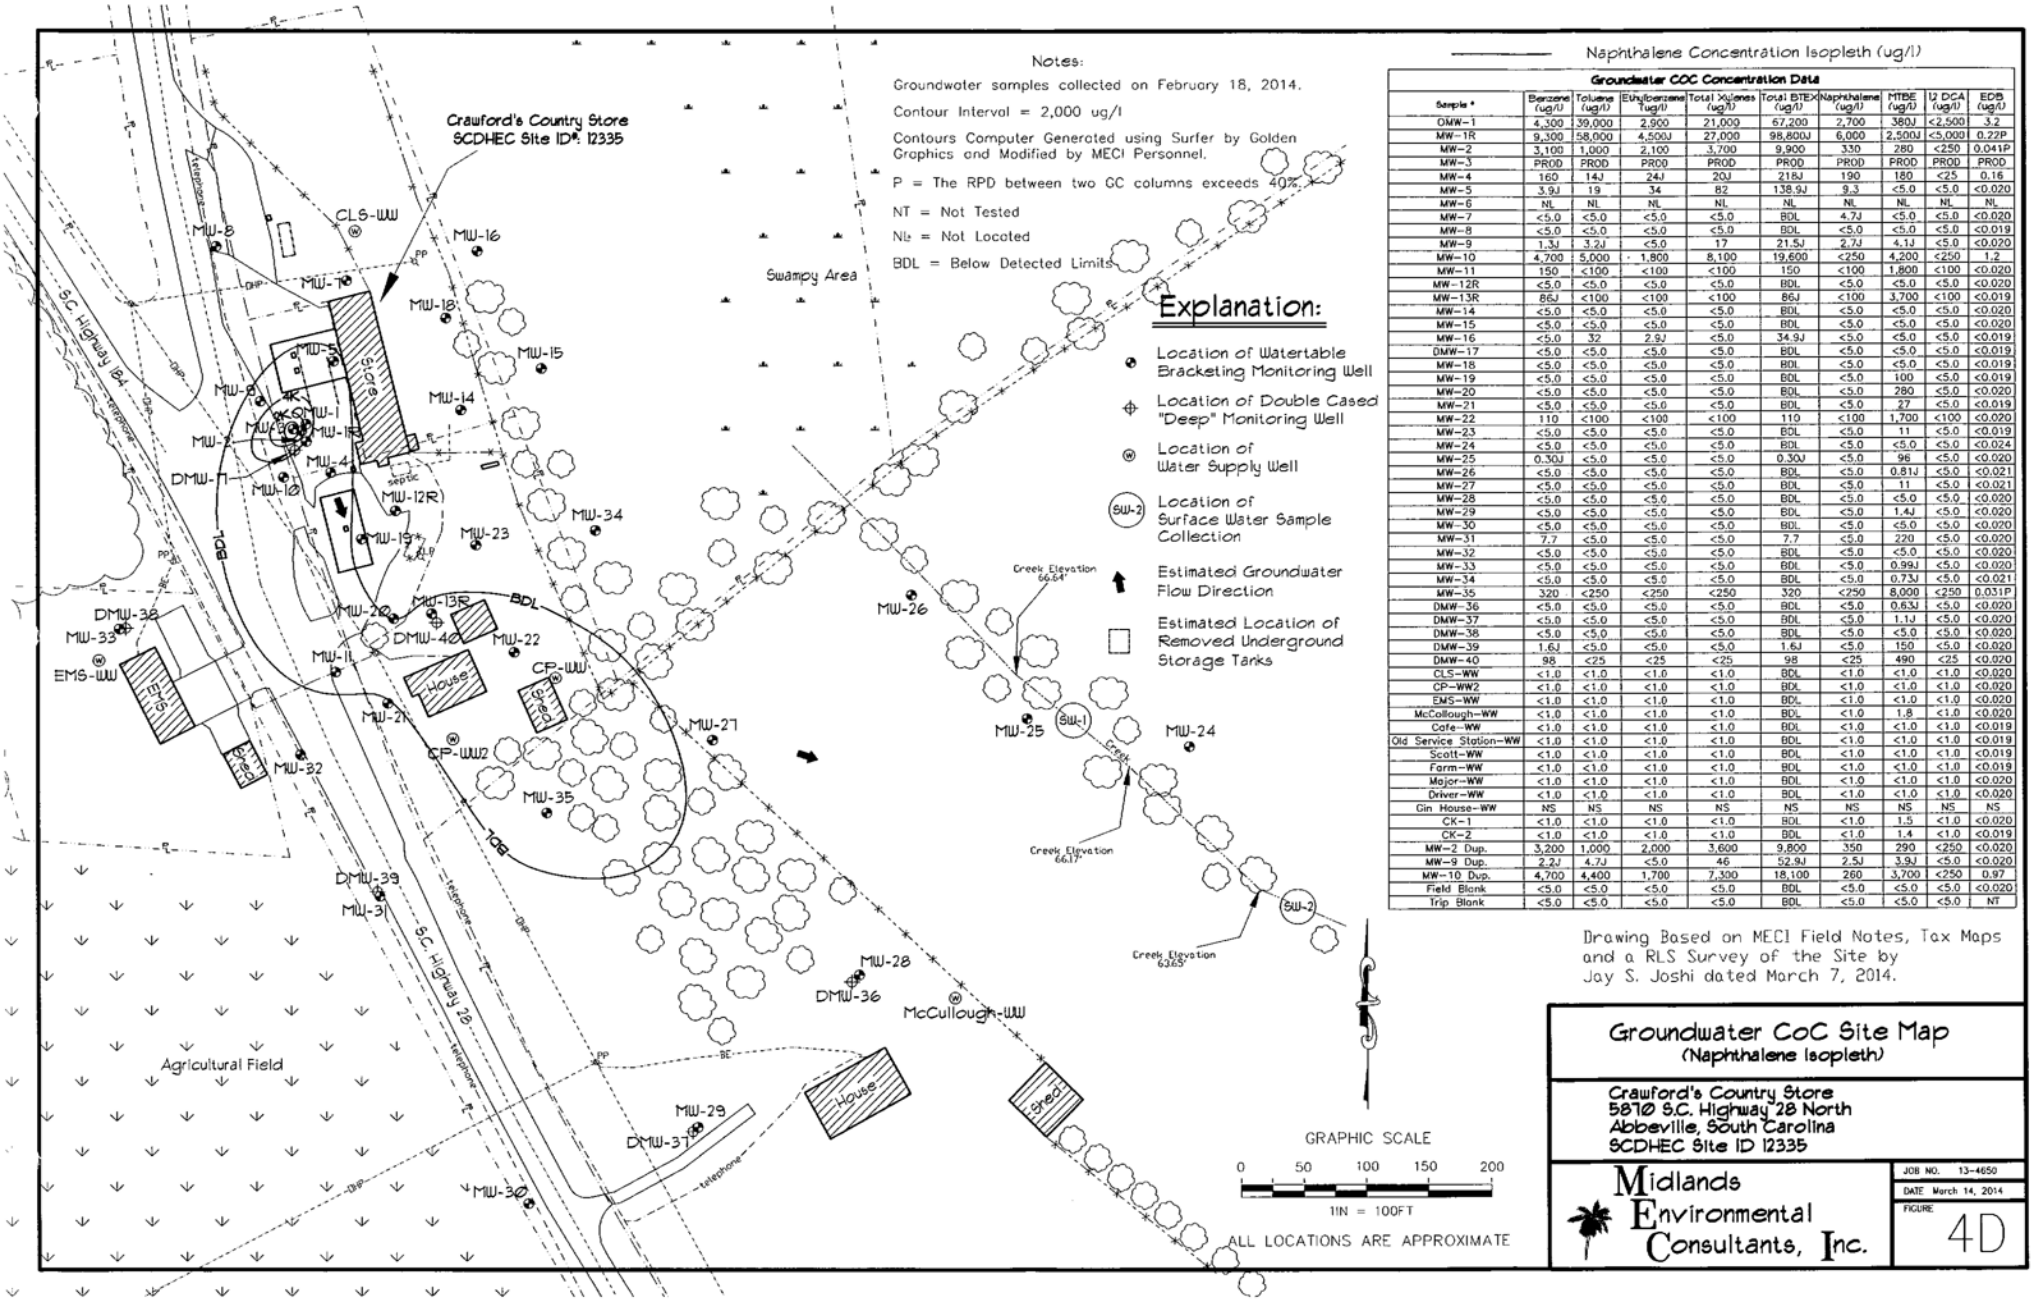
# Groundwater CoC Site Map
## (Total Xylene Isopleth)

Crawford's Country Store
5870 S.C. Highway 28 North
Abbeville, South Carolina
SCDHEC Site ID 12335

Midlands Environmental Consultants, Inc.

JOB NO. 13-4650
DATE March 14, 2014
FIGURE 4C



Notes:

Groundwater samples collected on February 18, 2014.

Contour Interval = 2,000 ug/l

Contours Computer Generated using Surfer by Golden Graphics and Modified by MECI Personnel.

P = The RPD between two GC columns exceeds 40%

NT = Not Tested

NL = Not Located

BDL = Below Detected Limits

## Explanation:

- Location of Watertable Bracketing Monitoring Well
- Location of Double Cased "Deep" Monitoring Well
- Location of Water Supply Well
- (SW-2) Location of Surface Water Sample Collection
- Estimated Groundwater Flow Direction
- Estimated Location of Removed Underground Storage Tanks

Naphthalene Concentration Isopleth (ug/l)

# SHEALY ENVIRONMENTAL SERVICES, INC.

## Report of Analysis

**Midlands Environmental Consultants, Inc.**
235 Dooley Rd
Lexington, SC 29073
Attention: Bryan Shane

Project Name: **Crawfords Country Store**

Project Number: **13-4650**

Lot Number: **OK15025**

Date Completed: **11/18/2013**

**Kelly M. Maberry**
Project Manager

This report shall not be reproduced, except in its entirety, without the written approval of Shealy Environmental Services, Inc.

The following non-paginated documents are considered part of this report: Chain of Custody Record and Sample Receipt Checklist.

## Case Narrative

## Midlands Environmental Consultants, Inc.

### Lot Number: OK15025

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

The VOC data is screening only. Laboratory QC may not pass and samples may be analyzed outside of tune time.

# Sample Receipt Checklist (SRC)

Client: _____ Cooler Inspected by/date: _____ Lot # _____

Means of receipt: ☐ SESI ☐ Client ☐ UPS ☐ FedEx ☐ Airborne Esp ☐ Other

| | | | |
|---|---|---|---|
| Yes ☐ | No ☐ | | 1. Were custody seals present on the cooler? |
| Yes ☐ | No ☐ | | 2. If custody seals were present, were they intact and unbroken? |

Cooler ID Original temperature upon receipt/Derived (corrected) temperature upon receipt:

/ / °C / / °C / / °C / / °C

Method: ☐ Temperature Blank ☐ Against Bottles IR Gun ID: _____ IR Gun Correction Factor: _____°C

Method of coolant: ☐ Wet Ice ☐ Blue Ice ☐ Dry Ice ☐ None

If response is No or Yes for 14, 15, 16), an explanation/resolution must be provided.

| | | | |
|---|---|---|---|
| Yes ☐ | No ☐ | NA ☐ | 3. If temperature of any cooler exceeded 6.0°C, was Project Manager notified? PM notified by SRC, phone, note (circle one), other: _____. (For coolers received via commercial courier, PMs are to be notified immediately |
| Yes ☐ | No ☐ | NA ☐ | 4. Is the commercial courier's packing slip attached to this form? |
| Yes ☐ | No ☐ | | 5. Were proper custody procedures (relinquished/received) followed? |
| Yes ☐ | No ☐ | NA ☐ | 5a Were samples relinquished by client to commercial courier? |
| Yes ☐ | No ☐ | | 6. Were sample IDs listed? |
| Yes ☐ | No ☐ | | 7. Was collection date & time listed? |
| Yes ☐ | No ☐ | | 8. Were tests to be performed listed on the COC? |
| Yes ☐ | No ☐ | | 9. Did all samples arrive in the proper containers for each test? |
| Yes ☐ | No ☐ | | 10. Did all container label information (ID, date, time) agree with COC? |
| Yes ☐ | No ☐ | | 11. Did all containers arrive in good condition (unbroken, lids on, etc.)? |
| Yes ☐ | No ☐ | | 12. Was adequate sample volume available? |
| Yes ☐ | No ☐ | | 13. Were all samples received within ½ the holding time or 48 hours, whichever comes first? |
| Yes ☐ | No ☐ | | 14. Were any samples containers missing? |
| Yes ☐ | No ☐ | | 15. Were there any excess samples not listed on COC? |
| Yes ☐ | No ☐ | NA ☐ | 16. Were bubbles present >"pea-size" (¼" or 6mm in diameter) in any VOA vials? |
| Yes ☐ | No ☐ | NA ☐ | 17. Were all metals/O&G/HEM/nutrient samples received at a pH of <2? |
| Yes ☐ | No ☐ | NA ☐ | 18. Were all cyanide and/or sulfide samples received at a pH >12? |
| Yes ☐ | No ☐ | NA ☐ | 19. Were all applicable NH3/TKN/cyanide/phenol (<0.2mg/L) samples free of residual chlorine? |
| Yes ☐ | No ☐ | NA ☐ | 20. Were collection temperatures documented on the COC for NC samples? |
| Yes ☐ | No ☐ | NA ☐ | 21. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc...) correctly transcribed from the COC into the comment section in LIMS? |

**Sample Preservation** (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with _____ ($H_2SO_4$,$HNO_3$,HCl,NaOH) with the SR # (number)

Sample(s) _____ were received with bubbles >6 mm in diameter.

Sample(s) _____ were received with TRC >0.2 mg/L for NH3/ TKN/ cyanide/ phenol

Sample labels verified by: _____ Date: _____

**Corrective Action taken, if necessary:**

Was client notified: Yes ☐ No ☐ Did client respond: Yes ☐ No ☐

SESI employee: _____ Date of response: _____

Comments: _____

# SHEALY ENVIRONMENTAL SERVICES, INC.

## Report of Analysis

**Midlands Environmental Consultants, Inc.**
235 Dooley Rd
Lexington, SC 29073
Attention: Bryan Shane

Project Name: **Crawfords Country Store**

Project Number: **13-4650**

Lot Number: **OL06074**

Date Completed: **12/10/2013**

**Kelly M. Maberry**
Project Manager

This report shall not be reproduced, except in its entirety, without the written approval of Shealy Environmental Services, Inc.

The following non-paginated documents are considered part of this report: Chain of Custody Record and Sample Receipt Checklist.

## Case Narrative

## Midlands Environmental Consultants, Inc.

### Lot Number: OL06074

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

The VOC data is screening only. Laboratory QC may not pass and samples may be analyzed outside of tune time.

## Sample Receipt Checklist (SRC)

Client: MeCl Cooler Inspected by/date: BWP 12-6-13 Lot #: D000874

Means of receipt: ☑ SESI ☐ Client ☐ UPS ☐ FedEx ☐ Airborne Exp ☐ Other

| | | | |
|---|---|---|---|
| Yes ☐ | No ☑ | | 1. Were custody seals present on the cooler? |
| Yes ☐ | No ☐ | | 2. If custody seals were present, were they intact and unbroken? |

Cooler ID/Original temperature upon receipt/Derived (corrected) temperature upon receipt:
10@10.3 °C / / °C / / °C / / °C

Method: ☐ Temperature Blank ☑ Against Bottles IR Gun ID: #3 IR Gun Correction Factor: 0.3 °C
Method of coolant: ☑ Wet Ice ☐ Blue Ice ☐ Dry Ice ☐ None

If response is No (or Yes for 14, 15, 16), an explanation/resolution must be provided.

| | | | |
|---|---|---|---|
| Yes ☐ | No ☐ | NA ☑ | 3. If temperature of any cooler exceeded 6.0°C, was Project Manager notified? PM notified by SRC, phone, note (circle one), other: _____. (For coolers received via commercial courier, PMs are to be notified immediately. |
| Yes ☐ | No ☐ | NA ☑ | 4. Is the commercial courier's packing slip attached to this form? |
| Yes ☑ | No ☐ | | 5. Were proper custody procedures (relinquished/received) followed? |
| Yes ☐ | No ☐ | NA ☑ | 5a Were samples relinquished by client to commercial courier? |
| Yes ☑ | No ☐ | | 6. Were sample IDs listed? |
| Yes ☑ | No ☐ | | 7. Was collection date & time listed? |
| Yes ☑ | No ☐ | | 8. Were tests to be performed listed on the COC? |
| Yes ☑ | No ☐ | | 9. Did all samples arrive in the proper containers for each test? |
| Yes ☑ | No ☐ | | 10. Did all container label information (ID, date, time) agree with COC? |
| Yes ☑ | No ☐ | | 11. Did all containers arrive in good condition (unbroken, lids on, etc.)? |
| Yes ☑ | No ☐ | | 12. Was adequate sample volume available? |
| Yes ☑ | No ☐ | | 13. Were all samples received within ½ the holding time or 48 hours, whichever comes first? |
| Yes ☐ | No ☑ | | 14. Were any samples containers missing? |
| Yes ☐ | No ☑ | | 15. Were there any excess samples not listed on COC? |
| Yes ☐ | No ☑ | NA ☐ | 16. Were bubbles present >"pea-size" (¼"or 6mm in diameter) in any VOA vials? |
| Yes ☐ | No ☐ | NA ☑ | 17. Were all metals/O&G/HEM/nutrient samples received at a pH of <2? |
| Yes ☐ | No ☐ | NA ☑ | 18. Were all cyanide and/or sulfide samples received at a pH >12? |
| Yes ☐ | No ☐ | NA ☑ | 19. Were all applicable NH3/TKN/cyanide/phenol (<0.2mg/L) samples free of residual chlorine? |
| Yes ☐ | No ☐ | NA ☑ | 20. Were collection temperatures documented on the COC for NC samples? |
| Yes ☐ | No ☐ | NA ☑ | 21. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS? |

**Sample Preservation** (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with _____ ($H_2SO_4$,$HNO_3$,HCl,NaOH) with the SR # (number)

Sample(s) _____ were received with bubbles >6 mm in diameter.

Sample(s) _____ were received with TRC >0.2 mg/L for NH3/TKN/cyanide/phenol

Sample labels verified by: _____ Date: _____

**Corrective Action taken, if necessary:**

Was client notified: Yes ☐ No ☐ Did client respond: Yes ☐ No ☐

SESI employee: _____ Date of response: _____

Comments: _____

Project Manager

This report shall not be reproduced, except in its entirety, without the written approval of Shealy Environmental Services, Inc.

The following non-paginated documents are considered part of this report: Chain of Custody Record and Sample Receipt Checklist.

## Case Narrative

## Midlands Environmental Consultants, Inc.

### Lot Number: PB20024

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Sample Receiving
Samples -046 and -050 for volatiles analysis contained vials with air bubbles greater than ¼" or 6mm in diameter. The laboratory uses these vials for screening and the vials without bubbles for analysis whenever possible. Condition of samples is documented on the Sample Receipt Checklist (SRC).

GC/MS Volatiles
Batch 40814 did not include a MS/MSD. A LCS/LCSD was analyzed in its place.

The MS/MSD associated with sample -004 had several compounds recovered outside of the acceptance limits and several RPDs exceeded method control limits. The LCS/LCSD were recovered within the required acceptance limits; therefore, this demonstrates a matrix effect and data quality is not impacted.

The MS/MSD associated with sample -047 had tert-butyl formate recovered outside of the acceptance limits. The LCS/LCSD were recovered within the required acceptance limits; therefore, this demonstrates a matrix effect and data quality is not impacted.

EDB/DBCP
The method blank associated with batch 40856 had the surrogate recovered above the acceptance limits. This reflects a high bias for compounds associated with this surrogate. There were no detections in the samples associated with this method blank; therefore, there is no impact on data quality and no corrective action is required.

The sample results for -002, -003 and -034 have a P qualifier because the relative percent difference (RPD) between the two dissimilar phase GC columns exceeds 40%. Section 7.10.4 of SW-846 method 8000B states the higher of the two results is reported; however the lower results are reported for these samples. The higher result for sample -002 was 1.2 ug/L. The higher result for sample -003 was 0.95 ug/L. The higher result for sample -034 was 0.25 ug/L.

## Sample Summary

PQL = Practical quantitation limit
ND = Not detected at or above the MDL
P = The RPD between two GC columns exceeds 40%
J = Estimated result < PQL and ≥ MDL
N = Recovery is out of criteria
+ = RPD is out of criteria

Where applicable, all soil sample analysis are reported on a dry weight basis unless flagged with a "W"

**Note: Calculations are performed before rounding to avoid round-off errors in calculated results**

## Sample Receipt Checklist (SRC)

Client: _____ Cooler Inspected by/date: ECC 12/20/14 Lot #: PB-2006

Means of receipt: ☐ SESI ☐ Client ☐ UPS ☐ FedEx ☐ Airborne Exp ☐ Other

| | | |
|---|---|---|
| Yes ☐ | No ☐ | 1. Were custody seals present on the cooler? |
| Yes ☐ | No ☐ | 2. If custody seals were present, were they intact and unbroken? |

Cooler ID/Original temperature upon receipt/Derived (corrected) temperature upon receipt:

A / 4 °C / / °C B / 3.6 (4.0) °C / / °C

Method: ☐ Temperature Blank ☐ Against Bottles IR Gun ID: #3 IR Gun Correction Factor: +0.1°C

Method of coolant: ☐ Wet Ice ☐ Blue Ice ☐ Dry Ice ☐ None

If response is No (or Yes for 13, 15, 16), an explanation/resolution must be provided.

| | | | |
|---|---|---|---|
| Yes ☐ | No ☐ | NA ☐ | 3. If temperature of any cooler exceeded 6.0°C, was Project Manager notified? PM notified by SRC, phone, note (circle one), other: _____. (For coolers received via commercial courier, PMs are to be notified immediately. |
| Yes ☐ | No ☐ | NA ☐ | 4. Is the commercial courier's packing slip attached to this form? |
| Yes ☐ | No ☐ | | 5. Were proper custody procedures (relinquished/received) followed? |
| Yes ☐ | No ☐ | NA ☐ | 5a Were samples relinquished by client to commercial courier? |
| Yes ☐ | No ☐ | | 6. Were sample IDs listed? |
| Yes ☐ | No ☐ | | 7. Was collection date & time listed? |
| Yes ☐ | No ☐ | | 8. Were tests to be performed listed on the COC? |
| Yes ☐ | No ☐ | | 9. Did all samples arrive in the proper containers for each test? |
| Yes ☐ | No ☐ | | 10. Did all container label information (ID, date, time) agree with COC? |
| Yes ☐ | No ☐ | | 11. Did all containers arrive in good condition (unbroken, lids on, etc.)? |
| Yes ☐ | No ☐ | | 12. Was adequate sample volume available? |
| Yes ☐ | No ☐ | | 13. Were all samples received within ½ the holding time or 48 hours, whichever comes first? |
| Yes ☐ | No ☐ | | 14. Were any sample containers missing? |
| Yes ☐ | No ☐ | | 15. Were there any excess samples not listed on COC? |
| Yes ☐ | No ☐ | NA ☐ | 16. Were bubbles present >"pea-size" (¼" or 6mm in diameter) in any VOA vials? |
| Yes ☐ | No ☐ | NA ☐ | 17. Were all metals/O&G/HEM/nutrient samples received at a pH of < 2? |
| Yes ☐ | No ☐ | NA ☐ | 18. Were all cyanide and/or sulfide samples received at a pH >12? |
| Yes ☐ | No ☐ | NA ☐ | 19. Were all applicable NH3/TKN/cyanide/phenol (<0.2mg/L) samples free of residual chlorine? |
| Yes ☐ | No ☐ | NA ☐ | 20. Were collection temperatures documented on the COC for NC samples? |
| Yes ☐ | No ☐ | NA ☐ | 21. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS? |

**Sample Preservation** (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with _____ ($H_2SO_4$,$HNO_3$,HCl,NaOH) with the SR # (number)

Sample(s) 1-2 (A) 1-2 (B) were received with bubbles >6 mm in diameter.

Sample(s) _____ were received with TRC >0.2 mg/L for NH3/ TKN/ cyanide/ phenol

Sample labels verified by: _____ Date: 12/20/14

**Corrective Action taken, if necessary:**

Was client notified: Yes ☐ No ☐ Did client respond: Yes ☐ No ☐

SESI employee: _____ Date of response: _____

Comments: _____

2600 Bull Street, Columbia, SC 29201-1708; (803) 898-4300

**1. WELL OWNER INFORMATION:**
Name: SCDHEC (last) (first)
Address: 2600 Bull Street
City: Columbia State: SC Zip: 29201-1708
Telephone: Work: (803) 898-2544 Home:

**2. LOCATION OF WELL:** COUNTY: Abbeville
Name: Crawford's Country Store
Street Address: 5870 Highway 28 North
City: Abbeville Zip: 29620-0000
Latitude: Longitude:

**3. PUBLIC SYSTEM NAME:** 12335 **PUBLIC SYSTEM NUMBER:** GPW-3

**4. ABANDONMENT:** ☑ Yes ☐ No
Give Details Below
Grouted Depth: from 0.0 ft. to 14.0 ft.

| Formation Description | *Thickness of Stratum | Depth to Bottom of Stratum |
|---|---|---|
| DIRECT PUSH WATER SAMPLE | | |
| (NO SOIL TAKEN) | 14.0 | 14.0 |
| | | |
| | | |
| | | |
| | | |
| | | |
| Temporary Boring Abandoned by | | |
| William Walker Environmental | | |
| via tremie pipe with Portland- | | |
| Bentonite Cement Slurry on | | |
| 11/13/2013. | | |
| *Indicate Water Bearing Zones (Use a 2nd sheet if needed) | | |

**5. REMARKS:**
GPW-3

**6. TYPE:** ☐ Mud Rotary ☐ Jetted ☐ Bored ☐ Dug ☐ Air Rotary ☐ Driven ☐ Cable tool ☑ Other

**7. PERMIT NUMBER:** UMW-25248

**8. USE:**
☐ Residential ☐ Public Supply ☐ Process
☐ Irrigation ☐ Air Conditioning ☐ Emergency
☐ Test Well ☑ Monitor Well ☐ Replacement

**9. WELL DEPTH** (completed) 14.0 ft. Date Started: 11/13/2013 Date Completed: 11/13/2013

**10. CASING:** ☐ Threaded ☐ Welded
Diam.: ____
Type: ☐ PVC ☐ Galvanized ☐ Steel ☐ Other
____ in. to ____ ft. depth
____ in. to ____ ft. depth
Height: Above/Below
Surface ____ ft.
Weight ____ lb./ft.
Drive Shoe? ☐ Yes ☐ No

**11. SCREEN:**
Type: ____ Diam.: ____
Slot/Gauge: ____ Length: ____
Set Between: ____ ft. and ____ ft. NOTE: MULTIPLE SCREENS
____ ft. and ____ ft. USE SECOND SHEET
Sieve Analysis ☐ Yes (please enclose) ☐ No

**12. STATIC WATER LEVEL** ____ ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
____ ft. after ____ hrs. Pumping ____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: ____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐ No Bacterial Analysis ☐ Yes ☐ No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☐ Yes ☐ No
Installed from ____ ft. to ____ ft.
Effective size ____ Uniformity Coefficient ____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other ____
Depth: From 0.0 ft. to 14.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type ____
Well Disinfected ☐ Yes ☐ No Type: ____ Amount: ____

**18. PUMP:** Date installed: ____ Not installed ☐
Mfr. Name: ____ Model No.: ____
H.P. ____ Volts ____ Length of drop pipe ____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

**15. ARTIFICIAL FILTER** (filter pack) ☐ Yes ☐ No
Installed from ____ ft. to ____ ft.
Effective size ____ Uniformity Coefficient ____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other ____
Depth: From 0.0 ft. to 24.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type ____
Well Disinfected ☐ Yes ☐ No Type: ____ Amount: ____

**18. PUMP:** Date installed: ____ Not installed ☐
Mfr. Name: ____ Model No.: ____
H.P. ____ Volts ____ Length of drop pipe ____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

**5. REMARKS:**
GPW-16

**6. TYPE:** ☐ Mud Rotary ☐ Jetted ☐ Bored ☐ Dug ☐ Air Rotary ☐ Driven ☐ Cable tool ☑ Other

**7. PERMIT NUMBER:** UMW-25248

**8. USE:**
☐ Residential ☐ Public Supply ☐ Process
☐ Irrigation ☐ Air Conditioning ☐ Emergency
☐ Test Well ☑ Monitor Well ☐ Replacement

**9. WELL DEPTH** (completed) Date Started: 11/14/2013
14.0 ft. Date Completed: 11/14/2013

**10. CASING:** ☐ Threaded ☐ Welded
Diam.: ____
Type: ☐ PVC ☐ Galvanized ☐ Steel ☐ Other
____ in. to ____ ft. depth
____ in. to ____ ft. depth
Height: Above/Below
Surface ____ ft.
Weight ____ lb./ft.
Drive Shoe? ☐ Yes ☐ No

**11. SCREEN:**
Type: ____ Diam.: ____
Slot/Gauge: ____ Length: ____
Set Between: ____ ft. and ____ ft. NOTE: MULTIPLE SCREENS
____ ft. and ____ ft. USE SECOND SHEET
Sieve Analysis ☐ Yes (please enclose) ☐ No

**12. STATIC WATER LEVEL** ____ ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
____ ft. after ____ hrs. Pumping ____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: ____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐ No Bacterial Analysis ☐ Yes ☐ No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☐ Yes ☐ No
Installed from ____ ft. to ____ ft.
Effective size ____ Uniformity Coefficient ____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other ____
Depth: From 0.0 ft. to 14.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type ____
Well Disinfected ☐ Yes ☐ No Type: ____ Amount: ____

**18. PUMP:** Date installed: ____ Not installed ☐
Mfr. Name: ____ Model No.: ____
H.P. ____ Volts ____ Length of drop pipe ____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

**1. WELL OWNER INFORMATION:**
Name: SCDHEC (last) (first)
Address: 2600 Bull Street
City: Columbia State: SC Zip: 29201-1708
Telephone: Work: (803) 898-2544 Home:

**2. LOCATION OF WELL:** COUNTY: Abbeville
Name: Crawford's Country Store
Street Address: 5870 Highway 28 North
City: Abbeville Zip: 29620-0000
Latitude: Longitude:

**3. PUBLIC SYSTEM NAME:** 12335 **PUBLIC SYSTEM NUMBER:** GPW-23

**4. ABANDONMENT:** ☑ Yes ☐ No
Give Details Below
Grouted Depth: from 0.0 ft. to 28.0 ft.

| Formation Description | *Thickness of Stratum | Depth to Bottom of Stratum |
|---|---|---|
| DIRECT PUSH WATER SAMPLE | | |
| (NO SOIL TAKEN) | 28.0 | 28.0 |
| | | |
| | | |
| | | |
| | | |
| | | |
| Temporary Boring Abandoned by | | |
| William Walker Environmental | | |
| via tremie pipe with Portland- | | |
| Bentonite Cement Slurry on | | |
| 11/14/2013. | | |
| *Indicate Water Bearing Zones (Use a 2nd sheet if needed) | | |

**5. REMARKS:**
GPW-23

**6. TYPE:** ☐ Mud Rotary ☐ Jetted ☐ Bored ☐ Dug ☐ Air Rotary ☐ Driven ☐ Cable tool ☑ Other

**7. PERMIT NUMBER:** UMW-25248

**8. USE:**
☐ Residential ☐ Public Supply ☐ Process
☐ Irrigation ☐ Air Conditioning ☐ Emergency
☐ Test Well ☑ Monitor Well ☐ Replacement

**9. WELL DEPTH** (completed) 28.0 ft. Date Started: 11/14/2013 Date Completed: 11/14/2013

**10. CASING:** ☐ Threaded ☐ Welded
Diam.: ____
Type: ☐ PVC ☐ Galvanized ☐ Steel ☐ Other
____ in. to ____ ft. depth
____ in. to ____ ft. depth
Height: Above/Below Surface ____ ft.
Weight ____ lb./ft.
Drive Shoe? ☐ Yes ☐ No

**11. SCREEN:**
Type: ____ Diam.: ____
Slot/Gauge: ____ Length: ____
Set Between: ____ ft. and ____ ft. NOTE: MULTIPLE SCREENS
____ ft. and ____ ft. USE SECOND SHEET
Sieve Analysis ☐ Yes (please enclose) ☐ No

**12. STATIC WATER LEVEL** ____ ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
____ ft. after ____ hrs. Pumping ____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: ____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐ No Bacterial Analysis ☐ Yes ☐ No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☐ Yes ☐ No
Installed from ____ ft. to ____ ft.
Effective size ____ Uniformity Coefficient ____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other ____
Depth: From 0.0 ft. to 28.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type ____
Well Disinfected ☐ Yes ☐ No Type: ____ Amount: ____

**18. PUMP:** Date installed: ____ Not installed ☐
Mfr. Name: ____ Model No.: ____
H.P. ____ Volts ____ Length of drop pipe ____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

**12. STATIC WATER LEVEL** ____ ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
____ ft. after ____ hrs. Pumping ____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: ____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐ No Bacterial Analysis ☐ Yes ☐ No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☐ Yes ☐ No
Installed from ____ ft. to ____ ft.
Effective size ____ Uniformity Coefficient ____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other ____
Depth: From 0.0 ft. to 30.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type ____
Well Disinfected ☐ Yes ☐ No Type: ____ Amount: ____

**18. PUMP:** Date installed: ____ Not installed ☐
Mfr. Name: ____ Model No.: ____
H.P. ____ Volts ____ Length of drop pipe ____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

| **5. REMARKS:** GPW-36 | | |

**6. TYPE:** ☐ Mud Rotary ☐ Jetted ☐ Bored ☐ Dug ☐ Air Rotary ☐ Driven ☐ Cable tool ☑ Other

**7. PERMIT NUMBER:** UMW-25248

**8. USE:** ☐ Residential ☐ Public Supply ☐ Process ☐ Irrigation ☐ Air Conditioning ☐ Emergency ☐ Test Well ☑ Monitor Well ☐ Replacement

**9. WELL DEPTH** (completed) 38.0 ft. Date Started: 12/3/2013 Date Completed: 12/3/2013

**10. CASING:** ☐ Threaded ☐ Welded
Diam.: ____
Type: ☐ PVC ☐ Galvanized ☐ Steel ☐ Other
____ in. to ____ ft. depth
____ in. to ____ ft. depth
Height: Above/Below
Surface ____ ft.
Weight ____ lb./ft.
Drive Shoe? ☐ Yes ☐ No

**11. SCREEN:**
Type: ____ Diam.: ____
Slot/Gauge: ____ Length: ____
Set Between: ____ ft. and ____ ft.
____ ft. and ____ ft.
NOTE: MULTIPLE SCREENS USE SECOND SHEET
Sieve Analysis ☐ Yes (please enclose) ☐ No

**12. STATIC WATER LEVEL** ____ ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
____ ft. after ____ hrs. Pumping ____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: ____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐ No Bacterial Analysis ☐ Yes ☐ No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☐ Yes ☐ No
Installed from ____ ft. to ____ ft.
Effective size ____ Uniformity Coefficient ____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other ____
Depth: From 0.0 ft. to 38.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type ____
Well Disinfected ☐ Yes ☐ No Type: ____ Amount: ____

**18. PUMP:** Date installed: ____ Not installed ☐
Mfr. Name: ____ Model No.: ____
H.P. ____ Volts ____ Length of drop pipe ____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

NOTE: MULTIPLE SCREENS USE SECOND SHEET
Sieve Analysis ☐ Yes (please enclose) ☐ No

**12. STATIC WATER LEVEL** ____ ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
____ ft. after ____ hrs. Pumping ____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: ____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐No Bacterial Analysis ☐ Yes ☐ No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☐ Yes ☐ No
Installed from ____ ft. to ____ ft.
Effective size ____ Uniformity Coefficient ____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other ____
Depth: From 0.0 ft. to 25.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type ____
Well Disinfected ☐ Yes ☐ No Type: ____ Amount: ____

**18. PUMP:** Date installed: ____ Not installed ☐
Mfr. Name: ____ Model No.: ____
H.P. ____ Volts ____ Length of drop pipe ____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

## Bureau of Water
2600 Bull Street, Columbia, SC 29201-1708; (803) 898-4300

**1. WELL OWNER INFORMATION:**
Name: SCDHEC (last) (first)
Address: 2600 Bull Street
City: Columbia State: SC Zip: 29201-1708
Telephone: Work: (803) 898-4300 Home:

**2. LOCATION OF WELL:** **COUNTY:** Abbeville
Name: Crawford's Country Store
Street Address: 5870 Highway 28 North
City: Abbeville Zip: 29620-0000
Latitude: Longitude:

**3. PUBLIC SYSTEM NAME:** 12335 **PUBLIC SYSTEM NUMBER:** MW-12R

**4. ABANDONMENT:** ☐ Yes ☑ No
Give Details Below
Grouted Depth: from _____ ft. to _____ ft.

| Formation Description | *Thickness of Stratum | Depth to Bottom of Stratum |
|---|---|---|
| Grass with Topsoil | 0.5 | 0.5 |
| Orange, Sandy Clayey SILT | 10.5 | 11.0 |
| Brown, Sandy Clayey SILT | 14.0 | 25.0 |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| *Indicate Water Bearing Zones (Use a 2nd sheet if needed) | | |

**5. REMARKS:**
MW-12R

**6. TYPE:** ☐ Mud Rotary ☐ Jetted ☐ Bored ☐ Dug ☐ Air Rotary ☐ Driven ☐ Cable tool ☑ Other

**7. PERMIT NUMBER:** UMW-25248

**8. USE:**
☐ Residential ☐ Public Supply ☐ Process
☐ Irrigation ☐ Air Conditioning ☐ Emergency
☐ Test Well ☑ Monitor Well ☐ Replacement

**9. WELL DEPTH** (completed) 25.0 ft. Date Started: 1/27/2014 Date Completed: 1/27/2014

**10. CASING:** ☑ Threaded ☐ Welded
Diam.: 2 Inch
Type: ☑ PVC ☐ Galvanized ☐ Steel ☐ Other
2.0 in. to 15.0 ft. depth
_____ in. to _____ ft. depth
Height: Above/Below
Surface _____ ft.
Weight _____ lb./ft.
Drive Shoe? ☐ Yes ☐ No

**11. SCREEN:**
Type: Schedule 40 PVC Diam.: 2 Inch
Slot/Gauge: 0.010 Length: 10.0 Feet
Set Between: 15.0 ft. and 25.0 ft. **NOTE: MULTIPLE SCREENS**
_____ ft. and _____ ft. **USE SECOND SHEET**
Sieve Analysis ☐ Yes (please enclose) ☐ No

**12. STATIC WATER LEVEL** 17.17 ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
_____ ft. after _____ hrs. Pumping _____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: _____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐ No Bacterial Analysis ☐ Yes ☐ No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☑ Yes ☐ No
Installed from 13.0 ft. to 25.0 ft.
Effective size _____ Uniformity Coefficient _____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other _____
Depth: From 0.0 ft. to 11.0 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type _____
Well Disinfected ☐ Yes ☐ No Type: _____ Amount: _____

**18. PUMP:** Date installed: _____ Not installed ☐
Mfr. Name: _____ Model No.: _____
H.P. _____ Volts _____ Length of drop pipe _____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

**9. WELL DEPTH** (completed) 12.0 ft. Date Started: 1/26/2014 Date Completed: 1/26/2014

**10. CASING:** ☑ Threaded ☐ Welded
Diam.: 2 Inch
Type: ☑ PVC ☐ Galvanized ☐ Steel ☐ Other
2.0 in. to 2.0 ft. depth
_____ in. to _____ ft. depth
Height: Above/Below Surface _____ ft.
Weight _____ lb./ft.
Drive Shoe? ☐ Yes ☐ No

**11. SCREEN:**
Type: Schedule 40 PVC Diam.: 2 Inch
Slot/Gauge: 0.010 Length: 10.0 Feet
Set Between: 2.0 ft. and 12.0 ft.
_____ ft. and _____ ft.
NOTE: MULTIPLE SCREENS USE SECOND SHEET
Sieve Analysis ☐ Yes (please enclose) ☐ No

**12. STATIC WATER LEVEL** 3.24 ft. below land surface after 24 hours

**13. PUMPING LEVEL** Below Land Surface.
_____ ft. after _____ hrs. Pumping _____ G.P.M.
Pumping Test: ☐ Yes (please enclose) ☐ No
Yield: _____

**14. WATER QUALITY**
Chemical Analysis ☐ Yes ☐No Bacterial Analysis ☐ Yes ☐No
Please enclose lab results.

**15. ARTIFICIAL FILTER** (filter pack) ☑ Yes ☐ No
Installed from 1.0 ft. to 12.0 ft.
Effective size _____ Uniformity Coefficient _____

**16. WELL GROUTED?** ☑ Yes ☐ No
☐ Neat Cement ☐ Bentonite ☑ Bentonite/Cement ☐ Other _____
Depth: From 0.0 ft. to 0.5 ft.

**17. NEAREST SOURCE OF POSSIBLE CONTAMINATION:** ____ ft. ____ direction
Type _____
Well Disinfected ☐ Yes ☐ No Type: _____ Amount: _____

**18. PUMP:** Date Installed: _____ Not installed ☐
Mfr. Name: _____ Model No.: _____
H.P. _____ Volts _____ Length of drop pipe _____ ft. Capacity ____ gpm
TYPE: ☐ Submersible ☐ Jet (shallow) ☐ Turbine ☐ Jet (deep) ☐ Reciprocating ☐ Centrifugal

Midlands Environmental Consultants, Inc.

March 14, 2014

Re: Treatment of Purge Water
Crawford's Country Store
Abbeville, South Carolina
SCDHEC Site ID Number 12335
MECI Project Number 13-4650

To Whom It May Concern;

Midlands Environmental Consultants, Inc. is providing the following letter as certification that treatment of the referenced purge water complied with the conditions of "Proposed Conditions for Use of Portable Activated Carbon Units for the Treatment of Small Volumes of Petroleum Hydrocarbon Contaminated Groundwater", as described in the following:

Applicability:

Groundwater treated was obtained as a result development of wells and sampling.

Conditions:

1. The purge/bail water from all wells is mixed before usage of the Activated Carbon Unit.
2. No free-product was detected in any of the purge water drums.
3. Analytical results of from well sampling show average concentrations of petroleum hydrocarbon constituents less than 5000 parts per billion (ppb) Benzene and less than 20,000 ppb total BTEX.
4. The existing carbon pack will be replaced/reactivated every 5,000 gallons.
5. Record of usage is maintained by Contractor.
6. Any and all recommendations and conditions issued by the Manufacturer have been adhered to.
7. Any and all recommendations and conditions (even on a site by site basis) issued by the SCDHEC must be adhered to.

All purge waters were treated on-site using an up-flow treatment drum loaded with 30 pounds of activated carbon. Carbon will be loaded to a maximum of 3 pounds of total organic compounds or 5,000 gallons of development/purge water, whichever occurs first.

Post Office Box 854, Lexington SC 29071 • 231 Dooley Road, Lexington, SC 29073
Telephone: (803) 808-2043 • fax: (803) 808-2048

**165.0 gallons of water was disposed on February 7th, 2014 during the development of the newly installed monitoring wells.**

**224.0 gallons of wastewater was disposed on February 18th, 2014 during the sampling/purging of the monitoring well network.**

**A total of 389.0 gallons were treated on at the referenced site.**

Midlands Environmental also tracks cumulative organic compounds adsorbed on the activated carbon to ensure the capacity of carbon mass is not over-charged. This data is available upon request.

Should you have any questions or comments, please contact the undersigned.

Sincerely,
Midlands Environmental Consultants, Inc.

Kyle V. Pudney
Staff Biologist

## Project Location

**Primary County:** Abbeville *SCDOT Street Fi*

| County | Road Name | |
|---|---|---|
| Abbeville | SC 28 NORTH | Delete |

Add Road

**1. Type of Encroachment:** ENVIRONMENTAL

Construction of five temporary direct push borings and installation of three groundwater monitoring wells as directed by SCDHEC.

**2. Description of Location:**

Along the the western shoulder of SC Highway 28 North/SC Highway 184, off roadside, out of wheel path within SCDOT Right of Way.

(Attach sketch indicating roadway features such as: pavement width, shoulder width, sidewalk and curb and gutter location, significant drainage structure, north arrow, right of way width, and location of the proposed encroachment with respect to the roadway centerline and the nearest intersecting road on the State system.)

Customer Agreement

3. The undersigned applicant hereby requests the SCDOT to permit encroachment on the SCDO
way as described herein. It is expressly understood that the encroachment, if and when constru
shall be
installed in accordance with the sketch attached hereto and made a part hereof. The applicant
comply with and be bound by the SCDOT's "A Policy for Accommodating Utilities on Highwa
of
way", "Standard Specifications for Highway Construction", the "General Provisions" and "Sp
Provisions", attached hereto or made a part hereof by reference, during the installation, opera
maintenance of said encroachment within the SCDOT's Right of Way. DISCHARGES OF STO
WATER AND NON-STORM WATER: Work within State Highway right-of-way shall be cond
compliance with all applicable requirements of the National Pollutant Discharge Elimination S
(NPDES) permit(s) issued to the Department of Transportation (Department), to govern the di
storm water and non-storm water from its properties. Work shall also be in compliance with al
applicable Federal, State and Local laws and regulations, and with the Department's Encroach
Permits
Manual and encroachment permit. The encroachment permit will not be issued until the applic
received an NPDES construction permit from SC Department of Health and Environmental C
The applicant agrees to comply with all current SCDOT Standards Specifications for Highway Const
including
all Supplemental Technical Specifications. The applicant hereby further agrees, and binds his/her/its
personal
representatives, successors, assigns, to assume any and all liability for accidents or injuries to persons
damage to
property, including the highway, that may be caused by the construction, maintenance, use, moving o
removing of the
physical appurtenances contemplated herein, and the applicant agrees to indemnify and hold SCDOT
from
and against any and all claims for personal injury and/or property damage which may be sustained by
by reason
of the construction, maintenance or existence of said encroachment on the SCDOT's right of way.

General Provisions

## Application for Encroachment Permit
## General Provisions

1. **DEFINITIONS:** The word "Permittee" used herein shall mean the name of the person, firm corporation to whom this permit is addressed, his, her, its, heirs, personal representatives, s and assigns. The word "DEPARTMENT" shall mean the South Carolina Department of Transportation.
2. **NOTICE PRIOR TO STARTING WORK:** Before starting the work contemplated herein w limits of the highway right of way, the Department's Resident Maintenance Engineer in the which the proposed work is located shall be notified 24 hours in advance so that he may be while the work is under way.
3. **PERMIT SUBJECT TO INSPECTION:** This permit shall be kept at the site of the work at while said work is under way and must be shown to any representative of the Department o enforcement officer on demand.
4. **PROTECTION OF HIGHWAY TRAFFIC:** The applicant shall be responsible for the prote the highway traffic at all times during the construction, maintenance, removing or moving encroachment permitted herein. Detours, barricades, warning signs and flagmen, as necessa be provided by and at the expense of the Permittee and shall be in accordance with the "Ma Uniform Traffic Control Devices" (MUTCD). The work shall be planned and carried out se there will be the least possible inconvenience to the motoring public. The Permittee agrees t all rules and regulations of the Department while carrying on the work contemplated herei take all other precautions that circumstances warrant.
5. **STANDARDS OF CONSTRUCTION:** All work shall conform to the Department's standar construction and shall be performed in a workman-like manner. The applicant shall make provisions for maintaining the proper drainage of the highway as it may be affected by the encroachment permitted herein. All work shall be subject to the supervision and satisfactio Department.
6. **FUTURE MOVING OF PHYSICAL APPURTENANCES:** If, in the opinion of the State Hi Engineer, it should ever become necessary to move or remove the physical appurtenances, o part thereof contemplated herein, on account of change in location of the highway, widening highway, or for any other sufficient reason, such moving shall be done on demand of the De at the expense of the Permittee.

7. RESTORATION OF HIGHWAY FACILITIES UPON MOVING OR REMOVING OF PE APPURTENANCES: If, and when, the physical appurtenances contemplated herein shall b or removed, either on the demand of the Department or at the option of the Permittee, the h and facilities shall immediately be restored to their original condition at the expense of the I
8. COSTS: All work in connection with the construction, maintenance, moving or removing o physical appurtenances contemplated herein shall be done by and at the expense of the Perr
9. ADDITIONAL PERMISSIONS: (a) It distinctly understood that this permit does not in any way grant or release any rights lawful possessed by the abutting property owners. The Permittee shall secure any such rights, as n from said abutting property owners. (b) The Permittee responsible for obtaining all other approvals or permits necessary for installation of the encroachment from other government entities. (c) Th be no excavation of soil nearer than two feet to any public utility line or appurtenant facility with the consent of the owner thereof, or except upon special permission of this Departmen opportunity to be heard is given the owner of such line or appurtenant facility.
10. ADDITIONAL WORK PERFORMANCE: (a) All crossi the highway shall be constructed in accordance with "Specifications for Overhead Crossing and Power Transmission Lines and Telegraph Lines over each other and over Highway Rig Way in South Carolina," as approved by the Public Service Commission of South Carolina effective as of date of this permit.
(b) All tunneling, boring, or jacking shall be done in such a way as not to disturb the highw surfacing. (c) No pavement shall be cut unless specifically authorized herein. (d) No excavation shall be nearer than three fee edge of pavement unless specifically authorized herein.
(e) Underground facilities will be located at minimum depths as defined in the "Utility Accommodations Manual" for the transmittant, generally as follows: 4 feet minimum for h or dangerous transmittant, 3 feet minimum for other lines. The Department may approve s depths if adequate protection is provided. Such approval must be obtained in writing. (f) Service and other small diameter pipes sha jacked, driven, or otherwise forced underneath the pavements on any surfaced road withou disturbing the pavement. The section under the highway pavement and within a distance of feet on either side shall be continuous without joints.
11. ACCESS:
(a) Permittee is responsible for maintaining reasonable access to private driveways during construction. (b) It is expressly provided that, with respect to any limited access highway, th Permittee shall not have or gain access from the main traveled way of the highway, or the o ramps to such facility, except upon approval by the Department.
12. DRIVEWAYS:
(a) The existing crown of the highway shall be continued to the outside shoulder line of the highway. (b) If the driveway or approach is concrete pavement, the pavement shall be constructed at least 6 inches thick and with a minimum of class 2500 concrete. There shall b bituminous expansion joint, not less than 3/4 inches in thickness, placed between the highwa and the paving of the approach for the full width of the approach.
13. BEAUTIFICATION:
(a) All trees, plants, flowers, etc. shall be placed in accordance with the provisions specifical stipulated

herein.

(b) All trees, plants, flowers, etc. shall be maintained by, and at the expense of, the Permittee provisions of this permit shall become null and void, if and when said Permittee ceases to m said trees, plants, flowers, etc.

14. AS-BUILT PLANS:

(a) The applicant shall provide the Department with survey-quality as-built plans in accord the requirements set forth in the Department's "A Policy for Accommodating Utilities on H Rights of Way".

Contractor: SCDHEC - UST Division UST Contractor Certification Number: UCC-0116

Facility Name: Crawfords Country Store UST Permit #: 12335
Facility Address: 5870 Hwy 28 N
Responsible Party: Frank Crawford Phone: (864)446-2000
RP Address: 5870 Hwy 28 N, Abbeville, SC 29620-3447
Property Owner (if different):
Property Owner Address: 5870 Hwy 28 N, Abbeville, SC 29620-3447
Current Use of Property: Active gas station (5 USTs currently in use)

**Scope of Work** (Please check all that apply)

☐ IGWA ☐ Tier II ☑ Groundwater Sampling ☐ GAC
☐ Tier I ☐ Monitoring Well Installation ☑ Other Stream Sampling

**Analyses** (Please check all that apply)

Groundwater/Surface Water:

☑ BTEXNMDCA (8260B) ☐ Lead ☐ BOD ☐ Methane
☑ Oxygenates (8260B) ☐ 8 RCRA Metals ☐ Nitrate ☑ Ethanol
☑ EDB (8011) ☐ TPH ☐ Sulfate ☐ Dissolved Iron
☐ PAH (8270D) ☐ pH ☐ Other

Soil:

☐ BTEXN ☐ 8 RCRA Metals ☐ TPH-DRO (3550B/8015B) ☐ Grain Size
☐ PAH ☐ Oil & Grease (9071) ☐ TPH-GRO (5030B/8015B) ☐ TOC

Air:

☐ BTEXN

**Sample Collection** (Estimate the number of samples of each matrix that are expected to be collected.)

____ Soil 1 Water Supply Wells ____ Air 1 Field Blank
____ Monitoring Wells 2 Surface Water 1 Duplicate 1 Trip Blank

**Field Screening Methodology**

Estimate number and total completed depth for each point, and include their proposed locations on the attached map.
# of shallow points proposed: Estimated Footage: feet per point
# of deep points proposed: Estimated Footage: feet per point
Field Screening Methodology:

**Permanent Monitoring Wells**

Estimate number and total completed depth for each well, and include their proposed locations on the attached map.
# of shallow wells: Estimated Footage: feet per point
# of deep wells: Estimated Footage: feet per point
# of recovery wells: Estimated Footage: feet per point
Monitoring Well development method (consistent with SOP):
Comments, if warranted:

UST Permit #: 12335 Facility Name: Crawfords Country Store

**Implementation Schedule** (Number of calendar days from approval)
Field Work Start-Up: April 8, 2014 Field Work Completion: April 8, 2014
Report Submittal: 2 weeks after field work completion # of Copies Provided to Property Owners: 1

**Aquifer Characterization**
Pump Test: ☐ Slug Test: ☐ (Check one and provide explanation below for choice)

**Investigation Derived Waste Disposal**
Soil: _____ Tons Purge Water: _____ Gallons
Drilling Fluids: _____ Gallons Free-Phase Product: _____ Gallons

**Additional Details For This Scope of Work**
For example, list wells to be sampled, wells to be abandoned/repaired, well pads/bolts/caps to replace, details of AFVR event, etc.
Will sample site McCullough-WW and stream (SW-1 & SW-2) for BTEXMNADCA+Oxys+EDB.
Duplicate sample will be collected from WSW.

WSW & Stream located on property of Mr. Jerry McCullough, (864)348-7041. Tax Map # 047-00-00-004

**Compliance With Annual Contractor Quality Assurance Plan (ACQAP)**
Yes Laboratory as indicated in ACQAP? (Yes/No) If no, indicate laboratory information below.
Name of Laboratory: Shealy Environmental Services
SCDHEC Certification Number: _____
Name of Laboratory Director: _____

____ Well Driller as indicated in ACQAO? (Yes/No) If no, indicate driller information below.
Name of Well Driller: _____
SCLLR Certification Number: _____

____ Other variations from ACQAP. Please describe below.

**Attachments**
1. Attach a copy of the relevant portion of the USGS topographic map showing the site location.
2. Prepare a site base map. This map must be accurately scaled, but does not need to be surveyed. The map must include the following:
   - North Arrow
   - Location of property lines
   - Location of buildings
   - Previous soil sampling locations
   - Previous monitoring well locations
   - Proposed soil boring locations
   - Proposed monitoring well locations
   - Legend with facility name and address, UST permit number, and bar scale
   - Streets or highways (indicate names and numbers)
   - Location of all present and former ASTs and USTs
   - Location of all potential receptors
3. Assessment Component Cost Agreement, SCDHEC Form D-3664

Re: Laboratory Analyses Approval
Bid # IFB-5400003038-06/02/11-EMW; PO#4600107190

Dear Ms. Maberry:

Under the terms and conditions of the referenced bid package, analytical sampling has been approved for the referenced facility. The facility has been assigned an individual Cost Agreement (CA) number as listed below. Please reference the CA number and Purchase Order #4600107190 on the appropriate invoice submitted for payment against the facility.

| UST Permit # | Facility | Analyses-Groundwater | CA # |
|---|---|---|---|
| 12335 | Crawfords Country Store | 6-BTEXMN, DCA, Oxygenates, & EDB | 47879 |

If you have any questions or need further assistance, please contact me at (803) 898-0631 or thomadl@dhec.sc.gov.

Sincerely,

Debra L. Thoma

Re: **Water Supply Well & Stream Sampling Results**
Crawfords Country Store
5870 Hwy 28 North, Abbeville, SC 29620
UST Permit # 12335
Petroleum Release Reported December 3, 1991
Additional Assessment Report Received March 19, 2014
Abbeville County

Dear Mr. and Mrs. McCullough:

On February 18, 2014, Midlands Environmental Consultants, Inc., collected groundwater samples from your water supply well and the stream located on your property. This sampling work was directed by the Underground Storage Tank Management Division (UST Division) to evaluate the extent of the underground petroleum release from Crawfords Country Store. The lab results from your water supply well sample indicate that Methy tertiary butyl ether (MTBE) is present at a concentration of 1.8 µg/L, and Diisopropyl ether (DIPE) is present at an estimated concentration of 3.5 µg/L. The safe drinking water standard / Risk Based Screening Level (RBSL) for MTBE is 40 µg/L, and the Action Level for DIPE is 150 µg/L. Based on current scientific evidence, concentrations below RBSL and AL do not pose any risk to your health. Additionally, for the two samples collected from the stream located in your pasture, MTBE was detected at 1.5 µg/L and 1.4 µg/L respectively.

Based on these results, the UST Management Division plans to resample your water supply well and stream on Tuesday, April 8, 2014, to ensure that contaminants remain below the safe drinking water standards. If concentrations increase, a granular activated carbon (GAC) unit can be installed on your well to remove chemicals of concern.

On all correspondence concerning this site, please reference UST Permit # 12335. If there are any questions concerning this correspondence, please feel free to contact me at (803) 898-0607, via fax at (803) 898-0673, or via email at ShullSS@dhec.sc.gov.

Sincerely,

Shane S. Shull, Hydrogeologist

UST DOCKETING

Re: **Water Supply Well & Stream Sampling Results - Update**
Crawfords Country Store
5870 Hwy 28 North, Abbeville, SC 29620
UST Permit # 12335
Petroleum Release Reported December 3, 1991
Additional Assessment Report Received March 19, 2014
Report of Analysis Received April 14, 2014
Abbeville County

Dear Mr. and Mrs. McCullough:

On April 8, 2014, personnel from the Underground Storage Tank Management Division (UST Division) collected groundwater samples from your water supply well and the stream located on your property to monitor chemicals of concern that were detected during the previous sampling event conducted by Midlands Environmental Consultants, Inc. in February 2014. The lab results from your water supply well sample indicate that Methy tertiary butyl ether (MTBE) is present at a concentration of 2.2 µg/L, and Diisopropyl ether (DIPE) is present at an estimated concentration of 3.6 µg/L. The safe drinking water standard / Risk Based Screening Level (RBSL) for MTBE is 40 µg/L, and the Action Level (AL) for DIPE is 150 µg/L. Based on current scientific evidence, concentrations below RBSL and AL do not pose any risk to your health. Additionally, for the two samples collected from the stream located in your pasture, MTBE was detected at an estimated concentration of 0.81 µg/L and 0.74 µg/L respectively.

Based on these results, the UST Management Division plans to continue biannual sampling of your water supply well and stream to ensure that contaminants remain below the safe drinking water standards. A granular activated carbon (GAC) unit can be installed on your well to remove chemicals of concern if you so desire; however, as the chemicals of concern have remained under the safe drinking water standard, the UST Division does not plan to install a GAC at this time.

If you would like to discuss these results, and/or would like to request that a GAC unit to be installed on your water supply well, please contact me at (803) 898-0607, via email at ShullSS@dhec.sc.gov or via fax at (803) 898-0673. On all written correspondence, please reference UST Permit # 12335.

Sincerely,

Shane S. Shull, Hydrogeologist

SCDHEC Site ID Number 12335
MECI Project Number 14-5053
Certified Site Rehabilitation Contractor UCC-0009

Dear Ms. Thrash,

Midlands Environmental Consultants Inc. (MECI) is pleased to submit the attached Site-Specific Work Plan for the referenced site.

On December 11, 2014, MECI personnel performed a site visit to the subject site to evaluate site conditions, locate monitoring wells and identify potential problems for future sampling activities.

If you have any question or comments please feel free to contact us at 803-808-2043.

Sincerely,
**Midlands Environmental Consultants, Inc.**

# Site-Specific Work Plan for Approved ACQAP
# Underground Storage Tank Management Division

To: Ms. Ashleigh Thrash (SCDHEC Project Manager)
From: Mr. Jeff Coleman (Contractor Project Manager)
Contractor: Midlands Environmental Consultants, Inc. UST Contractor Certification Number: 009

Facility Name: Crawford's Country Store UST Permit #: 12335
Facility Address: 5870 Highway 28 North, Abbeville, SC 29620
Responsible Party: Mr. Frank Crawford Phone: 864-446-2000
RP Address: 31 Turtle Pt., Abbeville, SC 29620
Property Owner (if different): SAA
Property Owner Address: SAA
Current Use of Property: Active Gas Station

**Scope of Work** (Please check all that apply)

- ☐ IGWA
- ☐ Tier I
- ☐ Tier II
- ☐ Monitoring Well Installation
- ☑ Groundwater Sampling
- ☑ Other **********96-Hour AFVR**********
- ☐ GAC

**Analyses** (Please check all that apply)

Groundwater/Surface Water:

- ☑ BTEXNMDCA (8260B)
- ☑ Oxygenates (8260B)
- ☑ EDB (8011)
- ☐ PAH (8270D)
- ☑ Lead
- ☐ 8 RCRA Metals
- ☐ TPH
- ☐ pH
- ☐ BOD
- ☐ Nitrate
- ☐ Sulfate
- ☐ Other
- ☐ Methane
- ☐ Ethanol
- ☐ Dissolved Iron

Soil:

- ☐ BTEXN
- ☐ PAH
- ☐ 8 RCRA Metals
- ☐ Oil & Grease (9071)
- ☐ TPH-DRO (3550B/8015B)
- ☐ TPH-GRO (5030B/8015B)
- ☐ Grain Size
- ☐ TOC

Air:

- ☐ BTEXN

**Sample Collection** (Estimate the number of samples of each matrix that are expected to be collected.)

| | | | |
|---|---|---|---|
| ____ Soil | ____ Water Supply Wells | ____ Air | 1 Field Blank |
| 40 Monitoring Wells | 2 Surface Water | 3 Duplicate | 1 Trip Blank |

**Field Screening Methodology**

Estimate number and total completed depth for each point, and include their proposed locations on the attached map.

# of shallow points proposed: _____ Estimated Footage: _____ feet per point
# of deep points proposed: _____ Estimated Footage: _____ feet per point
Field Screening Methodology: _____

**Permanent Monitoring Wells**

Estimate number and total completed depth for each well, and include their proposed locations on the attached map.

# of shallow wells: _____ Estimated Footage: _____ feet per point
# of deep wells: _____ Estimated Footage: _____ feet per point
# of recovery wells: _____ Estimated Footage: _____ feet per point
Monitoring Well development method (consistent with SOP): _____
Comments, if warranted:

_____
_____
_____

UST Permit #: 12335 Facility Name: Crawford's Country Store

**Implementation Schedule** (Number of calendar days from approval)
Field Work Start-Up: 1/2/2015 Field Work Completion: 2/2/2015
Report Submittal: 3/2/2015 # of Copies Provided to Property Owners: 2

**Aquifer Characterization**
Pump Test: ☐ Slug Test: ☐ (Check one and provide explanation below for choice)

**Investigation Derived Waste Disposal**
Soil: _____ Tons Purge Water: 400.0 Gallons
Drilling Fluids: _____ Gallons Free-Phase Product: _____ Gallons

**Additional Details For This Scope of Work**
For example, list wells to be sampled, wells to be abandoned/repaired, well pads/bolts/caps to replace, details of AFVR event, etc.
-During the initial site visit, all monitoring wells were located and found to be in good condition.
-MECI will conduct a 96-Hour AFVR on monitoring wells OMW-1, MW-1R, and MW-3.
-Approximately 45 days following the AFVR event, MECI will conduct a comprehensive sampling event. All monitoring wells will be sampled for BTEX, Naphthalene, MTBE, 1,2 DCA, EDB, and Lead.
-The two (2) surface waters will be sampled for BTEX, Naphthalene, MTBE, 1,2 DCA, and EDB.

**Compliance With Annual Contractor Quality Assurance Plan (ACQAP)**
Yes Laboratory as indicated in ACQAP? (Yes/No) If no, indicate laboratory information below.
Name of Laboratory: _____
SCDHEC Certification Number: _____
Name of Laboratory Director: _____

Yes Well Driller as indicated in ACQAO? (Yes/No) If no, indicate driller information below.
Name of Well Driller: _____
SCLLR Certification Number: _____

N/A Other variations from ACQAP. Please describe below.

**Attachments**
1. Attach a copy of the relevant portion of the USGS topographic map showing the site location.
2. Prepare a site base map. This map must be accurately scaled, but does not need to be surveyed. The map must include the following:
   - North Arrow
   - Location of property lines
   - Location of buildings
   - Previous soil sampling locations
   - Previous monitoring well locations
   - Proposed soil boring locations
   - Proposed monitoring well locations
   - Legend with facility name and address, UST permit number, and bar scale
   - Streets or highways (indicate names and numbers)
   - Location of all present and former ASTs and USTs
   - Location of all potential receptors

SCDHEC Site ID Number 12335
MECI Project Number 14-5053
Certified Site Rehabilitation Contractor UCC-0009

Dear Ms. Thrash,

Midlands Environmental Consultants Inc. (MECI) is pleased to submit the attached Site-Specific Work Plan for the referenced site.

On December 11, 2014, MECI personnel performed a site visit to the subject site to evaluate site conditions, locate monitoring wells and identify potential problems for future sampling activities.

If you have any question or comments please feel free to contact us at 803-808-2043.

Sincerely,
**Midlands Environmental Consultants, Inc.**

Kyle V. Pudney

# Site-Specific Work Plan for Approved ACQAP
# Underground Storage Tank Management Division

To: Ms. Ashleigh Thrash (SCDHEC Project Manager)
From: Mr. Jeff Coleman (Contractor Project Manager)
Contractor: Midlands Environmental Consultants, Inc. UST Contractor Certification Number: 009

Facility Name: Crawford's Country Store UST Permit #: 12335
Facility Address: 5870 Highway 28 North, Abbeville, SC 29620
Responsible Party: Mr. Frank Crawford Phone: 864-446-2000
RP Address: 31 Turtle Pt., Abbeville, SC 29620
Property Owner (if different): SAA
Property Owner Address: SAA
Current Use of Property: Active Gas Station

**Scope of Work** (Please check all that apply)

- ☐ IGWA
- ☐ Tier I
- ☐ Tier II
- ☐ Monitoring Well Installation
- ☑ Groundwater Sampling
- ☑ Other **********96-Hour AFVR**********
- ☐ GAC

**Analyses** (Please check all that apply)

Groundwater/Surface Water:

- ☑ BTEXNMDCA (8260B)
- ☑ Oxygenates (8260B)
- ☑ EDB (8011)
- ☐ PAH (8270D)
- ☑ Lead
- ☐ 8 RCRA Metals
- ☐ TPH
- ☐ pH
- ☐ BOD
- ☐ Nitrate
- ☐ Sulfate
- ☐ Other
- ☐ Methane
- ☐ Ethanol
- ☐ Dissolved Iron

Soil:

- ☐ BTEXN
- ☐ PAH
- ☐ 8 RCRA Metals
- ☐ Oil & Grease (9071)
- ☐ TPH-DRO (3550B/8015B)
- ☐ TPH-GRO (5030B/8015B)
- ☐ Grain Size
- ☐ TOC

Air:

- ☐ BTEXN

**Sample Collection** (Estimate the number of samples of each matrix that are expected to be collected.)

| | | | |
|---|---|---|---|
| ____ Soil | ____ Water Supply Wells | ____ Air | 1 Field Blank |
| 40 Monitoring Wells | 2 Surface Water | 3 Duplicate | 1 Trip Blank |

**Field Screening Methodology**

Estimate number and total completed depth for each point, and include their proposed locations on the attached map.

# of shallow points proposed: _____ Estimated Footage: _____ feet per point
# of deep points proposed: _____ Estimated Footage: _____ feet per point
Field Screening Methodology: _____

**Permanent Monitoring Wells**

Estimate number and total completed depth for each well, and include their proposed locations on the attached map.

# of shallow wells: _____ Estimated Footage: _____ feet per point
# of deep wells: _____ Estimated Footage: _____ feet per point
# of recovery wells: _____ Estimated Footage: _____ feet per point
Monitoring Well development method (consistent with SOP): _____
Comments, if warranted:

_____
_____
_____

UST Permit #: 12335 Facility Name: Crawford's Country Store

**Implementation Schedule** (Number of calendar days from approval)
Field Work Start-Up: 1/2/2015 Field Work Completion: 2/2/2015
Report Submittal: 3/2/2015 # of Copies Provided to Property Owners: 2

**Aquifer Characterization**
Pump Test: ☐ Slug Test: ☐ (Check one and provide explanation below for choice)

**Investigation Derived Waste Disposal**
Soil: _____ Tons Purge Water: 400.0 Gallons
Drilling Fluids: _____ Gallons Free-Phase Product: _____ Gallons

**Additional Details For This Scope of Work**
For example, list wells to be sampled, wells to be abandoned/repaired, well pads/bolts/caps to replace, details of AFVR event, etc.
-During the initial site visit, all monitoring wells were located and found to be in good condition.
-MECI will conduct a 96-Hour AFVR on monitoring wells OMW-1, MW-1R, and MW-3.
-Approximately 45 days following the AFVR event, MECI will conduct a comprehensive sampling event. All monitoring wells will be sampled for BTEX, Naphthalene, MTBE, 1,2 DCA, EDB, and Lead.
-The two (2) surface waters will be sampled for BTEX, Naphthalene, MTBE, 1,2 DCA, and EDB.

**Compliance With Annual Contractor Quality Assurance Plan (ACQAP)**
Yes Laboratory as indicated in ACQAP? (Yes/No) If no, indicate laboratory information below.
Name of Laboratory: _____
SCDHEC Certification Number: _____
Name of Laboratory Director: _____

Yes Well Driller as indicated in ACQAO? (Yes/No) If no, indicate driller information below.
Name of Well Driller: _____
SCLLR Certification Number: _____

N/A Other variations from ACQAP. Please describe below.

**Attachments**
1. Attach a copy of the relevant portion of the USGS topographic map showing the site location.
2. Prepare a site base map. This map must be accurately scaled, but does not need to be surveyed. The map must include the following:
   - North Arrow
   - Location of property lines
   - Location of buildings
   - Previous soil sampling locations
   - Previous monitoring well locations
   - Proposed soil boring locations
   - Proposed monitoring well locations
   - Legend with facility name and address, UST permit number, and bar scale
   - Streets or highways (indicate names and numbers)
   - Location of all present and former ASTs and USTs
   - Location of all potential receptors

Re: **AFVR and Groundwater Sampling Directive**
Crawford's Country Store
5870 Highway 28 North, Abbeville, SC 29620
UST Permit #12335; CA #49349
Release Reported December 3, 1991
Site Specific Work Plan Received December 17, 2014
Abbeville County

Dear Mr. Crawford:

The Underground Storage Tank (UST) Management Division (Division) of the South Carolina Department of Health and Environmental Control (Agency) has reviewed the referenced Site Specific Work Plan submitted on your behalf by Midlands Environmental Consultants, Inc. This scope of work will include an Aggressive Fluid & Vapor Recovery (AFVR) event to remove residual free-phase product and reduce dissolved Chemicals of Concern (CoC), followed by a comprehensive groundwater sampling event. All work should be conducted in accordance with the UST Quality Assurance Program Plan (QAPP), Revision 2.0, and must be conducted in compliance with all applicable regulations. A copy of the Agency's QAPP Rev. 2.0, for the UST Management Division is available at http://www.scdhec.gov/environment/docs/QAPP_Rev-2_April2013.pdf.

AFVR activities at the site should begin immediately upon receipt of this letter. Cost agreement #49349 has been approved for the amount shown on the enclosed cost agreement form for one (1), 96-hour AFVR event and comprehensive groundwater sampling. The AFVR event should be conducted on OMW-1, MW-1R, and MW-3. The stingers shall be lowered at six inch intervals starting at the water table interface to the estimated historical low water table elevation for each well. Stingers should be placed as to maximize FP and/or vapor recovery. Approximately forty-five (45) days after the AFVR event has been completed, plan to conduct comprehensive groundwater sampling. Samples should be taken from all monitoring wells, water supply wells, and surface water locations and analyzed for BTEX, Naphthalene, Oxygenates, 1,2-DCA, MTBE, and EDB. If sampling occurs after February 18, 2015, all wells must be purged prior to sample collection since it will have been more than 12 months since the last sampling event. Sampling and analyses should be conducted in accordance with Appendix E of the QAPP, Rev. 2.0, and to include duplicate samples, field and trip blanks.

**The AFVR & Monitoring Report and invoice are due within 90 days from the date of this letter.** The report submitted at the completion of these activities should include the required information outlined in the QAPP. Please note that all applicable South Carolina certification requirements apply to the services and report preparation. All site rehabilitation activities must be performed and submitted by a South Carolina Certified Underground Storage Tank Site Rehabilitation Contractor.

Midlands Environmental Consultants, Inc. can submit an invoice for direct payment from State Underground Petroleum Environmental Response Bank (SUPERB) Account for pre-approved costs. By law, the SUPERB Account cannot compensate any costs that are not pre-approved. Please note that applicable South Carolina certification requirements regarding the services and report preparation must be satisfied. If the invoice is not submitted within 120 days from the date of this letter, monies allocated to pay this invoice will be uncommitted. This means that the invoice will not be processed for payment until all other committed funds are paid or monies become available.

Please note that Sections 44-2-110(4) and 44-2-130 of the SUPERB Statute state that no costs will be allowed unless prior approval from the Agency is obtained. If for any reason additional tasks will be completed, these additional tasks and the associated cost must be pre-approved by the Agency for the cost to be paid. The Agency reserves the authority to pay only for work properly performed and/or technically justified and will only pay rates in accordance with established criteria. Further, the Agency reserves the right to question and/or reject costs if deemed unreasonable and the right to audit project records at any time during the project or after completion of work.

Please note; if unnecessary dilutions are completed resulting in reporting limits of individual Chemicals of Concern in excess of Risk-Based Screening Levels (RBSLs), the data cannot be used. In those cases, the Division may deny payment for any non-detect analysis where the reporting limit exceeds the RBSL. The UST Management Division encourages the use of 'J' values as necessary so the appropriate action can be determined for a release.

The Agency grants pre-approval for transportation of virgin petroleum impacted soil and groundwater from the referenced site to a permitted treatment facility. The transport and disposal must be conducted in accordance with the QAPP. If the CoC concentrations based on laboratory analysis are below RBSLs, please contact the project manager for approval to dispose of soil and/or groundwater on site. The SUPERB Account will not reimburse for transportation or treatment of soil and/or groundwater with concentrations below RBSLs.

On all correspondence regarding this site, please reference UST Permit #12335 and CA #49349. If you have any questions regarding this correspondence, please contact me by telephone at (803) 898-0607 or by e-mail at thrasham@dhec.sc.gov.

Sincerely,

Ashleigh Thrash

**RESULTS:**
- ☐ Satisfactory
- ☑ Issues

Date: 1/8/15 Project Manager: Asleigh Trash DHEC Field Staff: RYAN ARIAIL

Contractor: Midlands Contractor Field Staff: TODD & PETER

Site Number: 12335 Site Name: Crawfords Country Store

Time Arrived at Site: 11:25 Time Leaving Site: 12:45 Weather Conditions: Sunny/Cold

1. Operator on site? ☐ YES ☑ NO personnel went to get oil in Anderson for AFVR.
2. Proper safety devices employed (e.g. traffic cones, barriers, etc.)? ☑ YES ☐ NO could use more cones around AFVR unit
3. Correct extraction well(s) being used? ☑ YES ☐ NO
4. Vacuum gauge(s) installed on extraction well(s)? ☑ YES ☐ NO
5. Vacuum gauge(s) installed on adjacent monitoring well(s)? ☑ YES ☐ NO floating gauge for 3 wells
6. AFVR unit connected to grounded metal object? ☐ YES ☑ NO
7. Stinger(s) set at target depth(s)? ☐ YES ☐ NO ?
8. Other extraction and monitoring well(s) sealed? ☑ YES ☐ NO
9. Data recorded at appropriate time intervals? ☐ YES ☐ NO ? incomplete field sheets Last two recorded times? ☐ YES ☐ NO
10. Off-gas treatment (if applicable)? ☑ YES ☑ NO
11. Complete Data Records:
    - ☐ Stinger Depth ? Not recorded in presented field sheets
    - ☑ Airflow Rate/Velocity
    - ☑ Vacuum Readings for Extraction Well(s)
    - ☑ Vacuum Readings for Adjacent Monitoring Well(s)
    - ☑ Water Level Measurement for Adjacent Monitoring Well(s)
    - ☑ Pre-treatment Vapor Concentration Measurements
    - ☑ Post-treatment Vapor Concentration Measurements

UST 32nd DOCKETING

Signature: Ryan Ariail Date: 1/8/15

Notes: operator was not present when we arrived on-site. generator was running on AFVR unit but system not on. According to field personnel (arrived back on-site @ 11:40) they had to go to Anderson to pick Dekka oil for AFVR unit.

Notes (continued): Time was not documented in field sheets when Midlands shut system off due to mechanical issues. (System frozen)

- Field sheets were incomplete when presented to PM.
- Ask field personnel to contact PM when AFVR got up and running.
- Also requested field personnel put out more traffic cones. parking lot was congested with customers.
- Requested that drain valve on off-gas GAC unit be closed at all times unless draining condensed fluid. Valve was open entire event leading to drainage flowing onto ground. (concrete parking lot).
- Contacted MECI QA Manager about issues, assured they would be corrected and unit was going to manufactor for maintenance after event.

Certified Site Rehabilitation Contractor UCC-0009

Dear Ms. Thrash,

On behalf of Mr. Frank Crawford, Midlands Environmental Consultants, Inc. (MECI) is pleased to submit the attached Aggressive Fluid Vapor Recovery Report for the referenced site. This describes the aggressive fluid vapor recovery activities conducted at the site in general accordance with South Carolina Department of Health and Environmental Control (SCDHEC) guidelines set forth in the UST Quality Assurance Program Plan (QAPP), Revision 2.0.

**AGGRESSIVE FLUID VAPOR RECOVERY**

A site visit was conducted at Crawford's Country Store on December 11, 2014 to locate/gauge monitoring wells and to evaluate current site conditions. MECI personnel commenced a 96-Hour Aggressive Fluid Vapor Recovery (AFVR) event at Crawford's Country Store on January 5th, 2015 and completed the event on January 9th, 2015. The event was conducted on monitoring wells OMW-1, MW-1R and MW-3 to reduce elevated dissolved CoC concentrations at the referenced site. Prior to the AFVR event, MECI personnel gauged each monitoring well for free phase petroleum product utilizing a Heron H.Oil Oil/Water Interface Meter. The following table presents depth to product, depth to water, and product thickness measurements obtained prior to the commencement of the 96-Hour:

| *Pre-AFVR Well Data* | | | |
|---|---|---|---|
| ***Well ID#*** | ***Depth to Product (ft.)*** | ***Depth to Water (ft.)*** | ***Product Thickness (ft.)*** |
| OMW-1 | Not Detected | 19.15 | Not Detected |
| MW-1R | Not Detected | 18.26 | Not Detected |
| MW-3 | Not Detected | 19.21 | Not Detected |

Post Office Box 854, Lexington SC 29071 • 231 Dooley Road, Lexington, SC 29073
Telephone: (803) 808-2043 • fax: (803) 808-2048

The event was continuously conducted for Seventy-two and a half (72.5) hours by MECI personnel utilizing a vacuum extraction unit until mechanical failure suspended the event at 10:30am on January 8, 2015. MECI personnel had to retrieve dekker oil from nearby and move the AFVR unit into the sun in order to thaw out some of the frozen AFVR components as a result of cold weather. The event was continued at 2pm on January 8th, 2015 and operated until 2pm on January 9th, 2015 to complete the entire ninety-six (96) hour event. Following the extended AFVR event, free product and groundwater levels were measured and recorded. The following table presents the post-AFVR free product and groundwater measurements obtained after completion of the AFVR event:

| ***Post-AFVR Well Data*** | | | |
|---|---|---|---|
| ***Well ID#*** | ***Depth to Product (ft.)*** | ***Depth to Water (ft.)*** | ***Product Thickness (ft.)*** |
| OMW-1 | Not Detected | 19.29 | Not Detected |
| MW-1R | Not Detected | 19.13 | Not Detected |
| MW-3 | Not Detected | 19.22 | Not Detected |

MECI treated the off gas produced during the AFVR event using an activated carbon filter system, which achieved an average calculated reduction rate of 99.41% throughout the duration of the referenced event. Calculated total petroleum hydrocarbons removed during the event were 34.25 pounds or approximately 5.92 equivalent gallons. The average rate of removal for the hydrocarbons was calculated to be 0.36 pounds per hour. Concentrations of off gas (Pre-Treatment) produced during the event were recorded from 50 parts per million by volume (PPM) to 502 PPM. Vacuum readings were recorded at a range of 20.0 to 22.0 inches of mercury during the event. A complete compilation of measurements recorded is presented in attached Table 1.

Differential pressures and groundwater levels were measured and recorded for selected site monitoring wells at regular intervals. This data is summarized in the attached Table 2. Monitoring well locations are depicted on attached Figure 2.

A total of 1,688 gallons of liquid was removed from the site during this event. Free Phase Petroleum product was not observed in the holding tanks at the end of the event. The fluids produced were transported to VLS Recovery Services, LLC of Mauldin, SC for disposal. A disposal manifest for these fluids is attached at the end of this report.

## QUALIFICATIONS OF REPORT

The activities and evaluative approaches used in this assignment are consistent with those normally employed in enhanced fluid recovery events and waste management projects of this type. Contents of this report are intended for the use by MECI, Mr. Frank Crawford, and the South Carolina Department of Health and Environmental Control, under mutually agreed upon terms and conditions. If other parties wish to rely on this report please contact MECI prior to their use of this information so that a mutual understanding and agreement of the terms and conditions of our services can be established.

Midlands Environmental appreciates the opportunity to offer our professional environmental related services to you on this project. Please feel free to contact us at 803-808-2043 if you have any immediate questions or comments.

Sincerely,
**Midlands Environmental Consultants, Inc.**

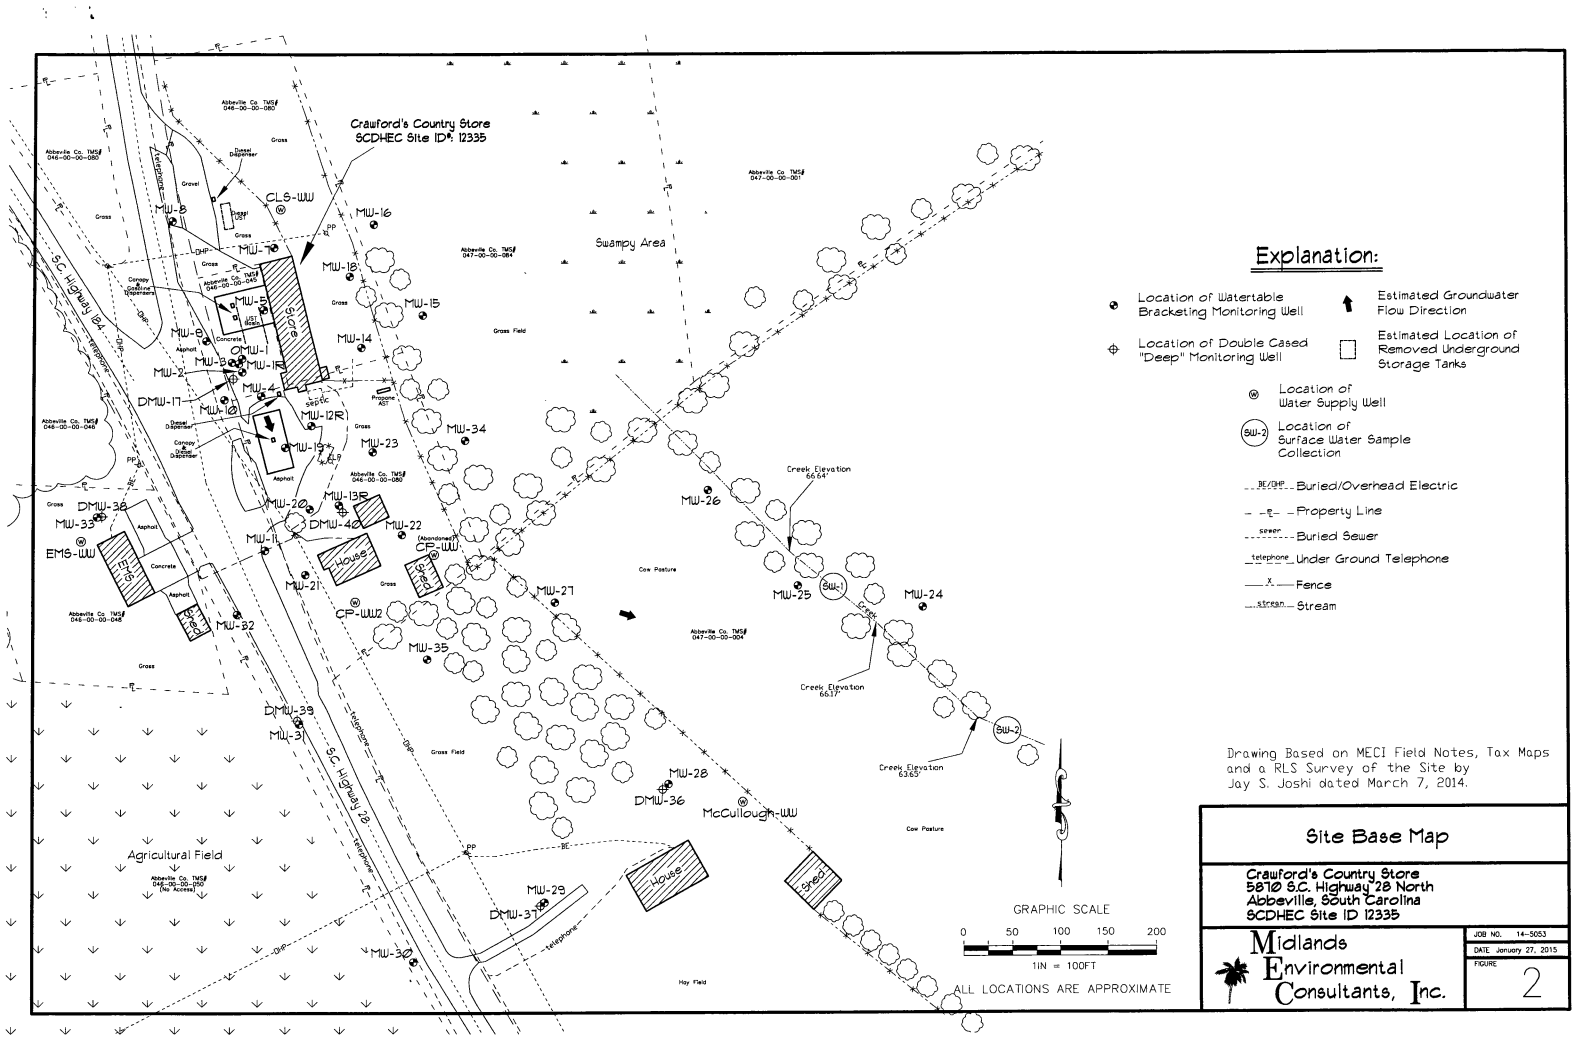
Notes: *** = AFVR event suspended at 10:30AM on Thursday 1/8/2014 due to mechanical failure and restarted at 2PM.



## Explanation:

- Location of Watertable Bracketing Monitoring Well
- Location of Double Cased "Deep" Monitoring Well
- Estimated Groundwater Flow Direction
- Estimated Location of Removed Underground Storage Tanks
- (W) Location of Water Supply Well
- (SW-2) Location of Surface Water Sample Collection
- BE/OHP — Buried/Overhead Electric
- —P— Property Line
- sewer — Buried Sewer
- telephone — Under Ground Telephone
- —X— Fence
- stream — Stream

Subject: Report of Groundwater Sampling and Chemical Analyses
Crawford's Country Store
5870 Highway 28 North
Abbeville, South Carolina
SCDHEC Site ID# 12335, CA# 49349
MECI Project Number 15-5105
Certified Site Rehabilitation Contractor UCC-0009

Dear Ms. Thrash,

On behalf of Mr. Frank Crawford, Midlands Environmental Consultants Inc. (MECI) is pleased to submit the attached Report of Groundwater Sampling and Chemical Analyses for the referenced site. This report describes assessment activities conducted at the site and results of those activities in general accordance with South Carolina Department of Health and Environmental Control (SCDHEC) guidelines, including adherence to the UST Division Programmatic Quality Assurance Program Plan (QAPP, Revision 2.0).

Midlands Environmental appreciates the opportunity to offer our professional environmental services to you on this project. Please feel free to contact us at 803-808-2043 if you have any immediate questions or comments.

Sincerely,
**Midlands Environmental Consultants, Inc.**

## 1.1 PROJECT INFORMATION

The subject site (Crawford's Country Store) is located at 5870 S.C. Highway 28 North in Abbeville, Abbeville County, South Carolina (see Figure 1). The subject site is currently an active gasoline service station and convenience store. Previously, the subject site maintained one 2,000 gallon gasoline underground storage tank (UST), one 1,000 gallon kerosene UST, one 560 gallon diesel UST, one 8,000 gallon gasoline UST, and one 10,000 gallon gasoline UST. The former UST's were removed from the ground in October of 1991. The South Carolina Department of Health and Environmental Control (SCDHEC) reported a release of petroleum product in December of 1991 and confirmed the release in March of 1993. Currently, the subject site maintains one 3,000 gallon diesel UST, one 6,000 gallon off-road diesel UST, one 6,000 gallon premium gasoline UST, one regular unleaded gasoline UST, and one 10,000 gallon regular unleaded gasoline UST.

The above information is based on reports and correspondence obtained from SCDHEC files and MECI field notes.

## 2.0 SURROUNDING PROPERTY USAGE

The subject site is located outside the town limits of Abbeville in an area known as Antreville, Abbeville County, South Carolina. The site is currently an active gasoline service station and convenience store. A wildlife processing center and residence is located directly south of the site, beyond which is residential farm. East of the site is bordered by a grass field, beyond which is a swampy area and grass fields. South Caroline Highway 28 forms the western border of the site, beyond which is an Abbeville County EMS facility. South of the EMS facility is a large agricultural field and residences. Northwest of the site is a Café and old gasoline service station.

## 3.0 AREA GEOLOGY AND HYDROGEOLOGY

The mean elevation of the property, as depicted on the local USGS quadrangle (Moore, SC), appears to be approximately 710 feet above sea level. The site is located in the Piedmont Physiographic Province of South Carolina, an area underlain by ancient igneous and metamorphic rocks. The soils in this province are generally residual soils that are underlain by rock at highly varying depths.

The soils encountered in this area are the product of in-place weathering of rocks similar to the rocks underlying the site. In areas not altered by erosion or disturbed by the activities of man, the typical residual soil profile consists of near surface clayey soils and underlying sandy silt and sand. The boundary between soil and rock is gradational. A transitional zone termed "weathered rock" is normally found overlying the parent bedrock. This zone is typically the most transmissive zone for groundwater movement. Consequently, the topography of the bedrock surface is uneven, even over short horizontal distances. It is not unusual to find lenses and boulders of hard rock and zones of weathered rock within the soil mantle well above the general bedrock level.

Local precipitation is the source of practically all of the groundwater in Abbeville County. A portion of the precipitation infiltrates into the ground and moves under the influence of gravity to the surficial aquifer. After the water has reached the surficial aquifer, the direction of movement is generally parallel to the hydraulic gradient. In the Piedmont Province, the slope of the surficial aquifer's surface under static conditions (no pumping interference) approximates the topography of an area. Thus, the movement of groundwater within the soil mantel is typically in the direction of the topographic slope. Local groundwater flow patterns may be affected by disturbed areas such as tank pits, utility trenches, building foundations, borings, wells, etc. Groundwater flow in fractured rock is often difficult to interpret due to the variability of fracture connectivity and orientation.

Locally, in the surficial aquifer, groundwater discharges into streams, lakes or springs where the groundwater table intersects lows occupied by these water bodies. The apparent direction (based on hydraulic gradient) of groundwater flow from the release is to the south and southeast, towards the unnamed intermittent creek associated with the Spur Creek. Analytical data indicates this unnamed creek may be impacted with petroleum contamination.

### 3.1 LOCAL SUBSURFACE CONDITIONS

Piedmont residual soils were encountered during drilling activities conducted at the site during previous assessment performed at the site. The soils encountered generally consisted of micaceous

fine sandy clayey silts. Residual soils were underlain by coarser grained saprolitic soils at depths of approximately 20' feet BGS. Partially weathered rock was encountered at a depth of 32' feet BGS during the installation of monitoring well DMW-39. Mud-rotary refusal was encountered at 35' BGS during the installation of DMW-39 and the well is set on top of a potential confining formation.

On February 25th, 2015, stabilized groundwater levels were measured in the surrounding monitoring wells. Depth to groundwater ranged from 0.00 to 19.97 feet BGS in the wells measured. The groundwater measurements are summarized in tabular form in Table 2 and on Figure 5. A groundwater contour map illustrating the groundwater flow direction at the site is also depicted on Figure 5.

Groundwater levels may fluctuate several feet with seasonal and rainfall variations and with change in the water level of adjacent drainage features. Normally, the highest groundwater levels occur in late winter and spring. The lowest levels occur in late summer and fall.

## 4.0 FIELD EXPLORATION

Field exploration conducted at the site included:

- comprehensive sampling of the entire well network;
- sampling of several nearby water supply wells;
- sampling of one surface water body; and,
- chemical analyses of groundwater samples.

## 4.1 MONITORING WELL SAMPLING AND CHEMICAL ANALYSES

On February 25th, 2014, MECI personnel collected groundwater samples from the thirty-nine (39) monitoring wells at the subject site. Monitoring wells MW-3 was gauged and determined to contain 0.01 feet of measurable free phase petroleum product. All newly installed monitoring wells and pre-existing monitoring wells were purged prior to sample collection. Thirty-nine (39) monitoring wells were purged prior to sample collection.

Purging of the monitoring wells was completed utilizing a prepackaged, clear, disposable polyethylene bailer and nylon rope. Purging was completed by bailing three to five well volumes of water from the well, until pH, conductivity, dissolved oxygen, and turbidity stabilized or until all available water was evacuated from the well, whichever occurred first. A new set of nitrile gloves were worn at each monitoring well, and at all times samples were handled. Field measurements of turbidity, pH, conductivity, dissolved oxygen, and water temperature were obtained before the well sampling process. MECI utilized YSI550A meters for DO (mg/L) and temperature readings ($^{o}$C), YSI63 meters for pH and conductivity (uS) readings, and a MicroTPI/TPW Turbidimeter for turbidity readings (NTU). The attached Field Data Information Sheets presents the results of the field measurements obtained during sampling processes. All wells were sampled in accordance with SCDHEC's Quality Assurance Program Plan for the Underground Storage Tank Management Division (QAPP, Revision 2.0) and MECI's Standard Operating Procedures (MECI SOP, January 2014). Groundwater samples obtained were sent to Shealy Environmental Services, Inc. of West Columbia, SC (SCDHEC Laboratory Certification #32010) for analysis.

The following sampling matrix contains well development and requested analyses for each well:

| Monitoring Well | Purge | No Purge | Gauge Only | BTEX, Naphthalene, MTBE (EPA Method 8260-B) | EDB (EPA Method 8011) | 1,2 DCA (EPA Method 8260-B) | 8 Oxygenates (EPA Method 8260-B) | Total Lead (EPA Method 6010) | Filtered Lead (EPA Method 6010) | Sulfate (EPA Method 375.2) | Nitrate (EPA Method 335.2) | Methane (RSK Method) | PAH's (EPA Method 8270) |

The results of the laboratory analyses are summarized in Tables 3, Table 3A and presented in Appendix B.

Purge water produced by the purging process was treated on-site utilizing a granular activated carbon unit. A total of 262.25 gallons of purge water was disposed of in this manner. A disposal manifest for the referenced purge water is presented in Appendix G.

## 4.2 WATER SUPPLY WELL SAMPLING AND CHEMICAL ANALYSES

On February 25th, 2015, MECI collected samples from seven (7) water supply wells. Water supply well CP-WW is abandoned and the Gin House-WW could not be sampled due to the well being locked inside a fence and the property owner was unable to be located. In addition, the CP-WW2, Major-WW and Driver-WW were unable to be sampled due to freezing conditions.

The following table presents detailed information about each water supply well located near the subject site.

| Water Supply Well Number | Approximate Distance from MW-3 | Abbeville County Tax Map Number: | Notes: | Well Status |
|---|---|---|---|---|
| CLS-WW | 167' Feet NE | 046-00-00-080 | 5870 S.C. Highway 28 N. (Onsite) | Active |
| CP-WW | 291' Feet SE | 046-00-00-049 | 5846 S.C. Highway 28 N | Abandoned |
| CP-WW2 | 281' Feet S | 046-00-00-049 | 5846 S.C. Highway 28 N | Frozen |
| EMS-WW | 244' Feet SW | 046-00-00-048 | 3 Highway 184 N | Active |
| McCullough-WW | 703' Feet SE | 047-00-00-004 | 5804 Highway 28 N | Active |
| Café-WW | Approx. 580' Feet NW | 046-00-00-044 | Fork @ S.C. Hwy. 28 & S.C. Hwy. 184 | Active |
| Old Service Station-WW | 976' Feet N | 046-00-00-043 | 3174 South Carolina Highway 260 | Active |
| Scott-WW | 1,041' Feet NW | 046-00-00-037 | 88 S.C. Highway N | Active |
| Farm-WW | 1,044' Feet SW | 046-00-00-106 | Dry Hollow Rd. & Parker Rd. | Active |
| Major-WW | 1,257' Feet S | 046-00-00-051 | 45 Parker Road | Frozen |
| Driver-WW | 1,387' Feet S | 046-00-00-050 | 5733 S.C. Highway 28 N | Frozen |
| Gin House-WW | 682' Feet W | 046-00-00-041 | Dry Hollow Rd. & Gin House Road | Unknown |

The samples obtained from the water supply wells were analyzed for volatile organic compounds including BTEX, naphthalene, methyl-tertiary-butyl-ether, 1,2 DCA, 8 oxygenates (EPA Method 8260B) and EDB (EPA method 8011). Results of the laboratory analyses are discussed in Section 5.2 and summarized in Table 3 & 3A. The analytical results are also presented in Appendix B.

### 4.3 SURFACE WATER SAMPLING AND CHEMICAL ANALYSIS

Two surface water samples were collected on February 25th, 2015. SW-1 and SW-2 were collected from an unnamed intermittent creek associated with the Spur Creek. Surface water samples were collected adjacent to monitoring well MW-25 (SW-1) and approximately 250' feet southeast of MW-25 (SW-2). This creek may act as a point of local groundwater discharge.

The samples obtained from the surface water locales were analyzed for volatile organic compounds including BTEX, naphthalene, methyl-tertiary-butyl-ether, 1,2 DCA, 8 oxygenates (EPA Method 8260B) and EDB (EPA method 8011). Results of the laboratory analyses are discussed in Section 5.2 and summarized in Table 3 & 3A. The analytical results are also presented in Appendix B.

## 5.0 TEST RESULTS AND EVALUATION

The following sections discuss groundwater test results for the subject site.

### 5.1 GROUNDWATER ANALYTICAL RESULTS

As discussed in Section 4.1, groundwater samples obtained from the monitoring wells during the February 25th, 2015 comprehensive groundwater sampling event were analyzed for dissolved phase petroleum constituents. Free phase petroleum product was not detected in any of the monitoring wells during sampling activities. The analytical results indicate petroleum impact to the surficial aquifer ("Shallow" Zone), with the highest dissolved concentrations being detected in the area of OMW-1, MW-1R and MW-3. Of the forty monitoring wells sampled, twelve monitoring wells (OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-20, MW-25, MW-31, MW-35 and DMW-40) detected petroleum constituents above Risked Based Screening Levels (RBSL's). Petroleum constituents detected above the established RBSL include:

| ***Compound*** | ***RBSL (ug/l)*** | ***Wells Above RBSL*** |
|---|---|---|
| Benzene | 5 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-35, & DMW-40 |
| Toluene | 1,000 | OMW-1, MW-1R, MW-2, & MW-10 |
| Ethylbenzene | 700 | OMW-1, MW-1R, MW-2, MW-3 & MW-10 |
| Total Xylenes | 10,000 | OMW-1, MW-1R, MW-3 & MW-10 |
| Naphthalene | 25 | OMW-1, MW-1R, MW-2, MW-4, MW-10 & MW-35 |
| MTBE | 40 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-20, MW-31, MW-35 & DMW-40 |
| EDB | 0.05 | OMW-1, MW-1R, MW-3, MW-4, & MW-10 |

In addition, the analytical results also detected petroleum constituents above the laboratory method detection limit in monitoring wells MW-9, MW-19, MW-21, MW-22, MW-23 and MW-25; however the concentrations detected did not exceed the RBSL. The results of the analyses for each monitoring well and specific parameters are listed on Table 3, Table 3A, and provided in Appendix B.

## 5.2 WATER SUPPLY WELL ANALYTICAL RESULTS

As discussed in section 4.2, water samples were obtained from seven water supply wells during the February 25, 2015 groundwater sampling event. The samples obtained from the above mentioned water supply wells were analyzed for petroleum constituents. The laboratory results from the samples obtained from CLS-WW, EMS-WW, Café-WW, Old Service Station-WW, Scott-WW and Farm-WW did not indicate petroleum impact and all petroleum compounds were below detection limits. MTBE and Diisopropyl ether (DIPE) was detected above the method detection limit in the sample obtained from the McCullough-WW. MTBE concentrations were detected at 1.1 micrograms per liter and DIPE concentrations were detected at 9.2 micrograms per liter in the sample obtained from the McCullough-WW. These concentrations detected do not exceed the RBSL for MTBE or DIPE and the remainder of petroleum compounds analyzed were detected at levels below detection limits. The results of the analysis for the water supply well and specific parameters are listed on Table 3, Table 3A, and provided in the laboratory reports (Appendix B).

## 5.3 SURFACE WATER SAMPLING AND CHEMICAL ANALYSIS

During the February 25, 2015 sampling event, two samples were collected from the nearby surface water (SW-1 & SW-2). Analytical results from the sample collected at SW-1 indicate MTBE concentrations above the method detection limit, but below the established RBSL. MTBE concentrations were detected at 0.28J micrograms per liter in SW-1. All petroleum compounds analyzed from SW-2 were below detection limits. The results of the analysis for the surface water and specific parameters are listed on Table 3, Table 3A, and provided in the laboratory reports (Appendix B).

## 6.0 ASSESSMENT SUMMARY & RECOMMENDATIONS

Based on the results of our assessment activities, it appears that impact to the surficial aquifer has occurred due to a release of petroleum hydrocarbons. Free phase petroleum product was not detected in any of the monitoring wells during the February 25, 2015 sampling event. The analytical results indicate petroleum impact to the "shallow" surficial aquifer, with the highest dissolved concentrations being detected in the area of the former UST basin (OMW-1, MW-1R and MW-3). Additionally, the

highest concentrations of dissolved phase petroleum constituents to the "deep" zone were detected in the area of DMW-40. Groundwater appears to be moving to the south-southeast toward unnamed intermittent creek associated with the Spur Creek.

The analytical results indicate petroleum impact to the surficial aquifer ("Shallow" Zone), with the highest dissolved concentrations being detected in the area of OMW-1, MW-1R and MW-3. Of the forty monitoring wells sampled, twelve monitoring wells (OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-20, MW-25, MW-31, MW-35 and DMW-40) detected petroleum constituents above Risked Based Screening Levels (RBSL's). Petroleum constituents detected above the established RBSL include:

| ***Compound*** | ***RBSL (ug/l)*** | ***Wells Above RBSL*** |
|---|---|---|
| Benzene | 5 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-35, & DMW-40 |
| Toluene | 1,000 | OMW-1, MW-1R, MW-2, & MW-10 |
| Ethylbenzene | 700 | OMW-1, MW-1R, MW-2, MW-3 & MW-10 |
| Total Xylenes | 10,000 | OMW-1, MW-1R, MW-3 & MW-10 |
| Naphthalene | 25 | OMW-1, MW-1R, MW-2, MW-4, MW-10 & MW-35 |
| MTBE | 40 | OMW-1, MW-1R, MW-2, MW-4, MW-10, MW-11, MW-13R, MW-20, MW-31, MW-35 & DMW-40 |
| EDB | 0.05 | OMW-1, MW-1R, MW-3, MW-4, & MW-10 |

In addition, the analytical results also detected petroleum constituents above the laboratory method detection limit in monitoring wells MW-9, MW-19, MW-21, MW-22, MW-23 and MW-25; however the concentrations detected did not exceed the RBSL. The results of the analyses for each monitoring well and specific parameters are listed on Table 3, Table 3A, and provided in Appendix B.

Figures 4 (Benzene Isopleth), 4A (Naphthalene Isopleth), 4B (MTBE Isopleth) and 4C (EDB Isopleth) depict graphically the concentrations and approximate extent of each listed petroleum compound in the surficial aquifer at the site. Figure 4D presents the 8 oxygenates analytical data from all monitoring wells installed in conjunction with the subject UST release.

Based on current analytical results, the contaminant plume emanating from the subject site appears to be defined downgradient, both horizontally and vertically. The plume is not defined (sidegradient) to the west of MW-31; however this is due to property access issues with a very large tract of agricultural land. MECI recommends continued monitoring of the monitoring well network and nearby receptors. It may be advantageous to install an Granular Activated Carbon (GAC) unit on the McCullough-WW in order to filter the trace amounts of MTBE and DIPE detected in the water supply well. Furthermore, MECI recommends installing several recovery wells in the source area of the contaminant plume, followed by a series of extended AFVR events to reduce elevated concentrations of dissolved phase petroleum constituents.

## 7.0 QUALIFICATIONS OF REPORT

The activities and evaluative approaches used in this assessment are consistent with those normally employed in hydrogeological assessment and waste management projects of this type. Our evaluation of site conditions has been based on our understanding of the site, project information provided to us, and data obtained in our exploration. The general subsurface conditions utilized in our evaluation have been based on interpretation of subsurface data between borings. Contents of this report are

intended for the sole use of Mr. Frank Crawford, SCDHEC, and MECI under mutually agreed upon terms and conditions. If other parties wish to rely on this report please contact MECI prior to their use of this information so that a mutual understanding and agreement of the terms and conditions of our services can be established.

Notes:

1. BDL = Below Practical Quantitative Limits
2. µg/l = micrograms per liter
3. NS = Not Sampled
4. MTBE = Methyl-Tertiary-Butyl Ether
5. "P" Values = The RPF between two GC columns exceeds 40%
6. 1,2 DCA = 1,2-Dichloroethane
7. NL = Not Located
8. EDB = Ethylene Dibromide
9. "J" Values used in Total BTEX Calculations
10. "J" values report concentrations above the method detection limits (MDL) and below actual reporting limit (RL).
11. PROD = Free phase petroleum product encountered

Notes:

1. BDL = Below Practical Quantitative Limits
2. µg/l = micrograms per liter
3. NS = Not Sampled
4. MTBE = Methyl-Tertiary-Butyl Ether
5. "P" Values = The RPF between two GC columns exceeds 40%
6. 1,2 DCA = 1,2-Dichloroethane
7. NL = Not Located
8. EDB = Ethylene Dibromide
9. "J" Values used in Total BTEX Calculations
10. "J" values report concentrations above the method detection limits (MDL) and below actual reporting limit (RL).
11. PROD = Free phase petroleum product encountered

Notes:

1. µg/l = micrograms per liter
2. DIPE = Diisopropyl Ether
3. ETBE = Ethyl tert-butyl Ether
4. TAA = tert-Amyl Alcohol
5. TAME = tert-Amyl Methyl Ether
6. TBA = tert-Butyl Alcohol
7. TBF = tert-Butyl Formate
8. NL = Not Located
9. PROD = Free Phase Petroleum Product
10. NS = Not Sampled
11. "J" values report concentrations above the method detection limits (MDL) and below actual reporting limit (RL).

Notes:

Groundwater samples collected on February 25, 2015.

Isopleth Interval = 2,500 ug/l

Isopleths Computer Generated using Surfer by Golden Graphics and Modified by MECI Personnel.

"Deep" wells not used in isopleth data.

NT = Not Tested

NL = Not Located

BDL = Below Detected Limits

## Explanation:

- Location of Watertable Bracketing Monitoring Well
- Location of Double Cased "Deep" Monitoring Well
- Location of Water Supply Well
- BW-2 Location of Surface Water Sample Collection
- Estimated Groundwater Flow Direction
- Estimated Location of Removed Underground Storage Tanks

Benzene Concentration Isopleth (ug/l)

RE: Project: CRAWFORD'S COUNTRY STORE
Pace Project No.: 92239087

Dear Mr. Shane:
Enclosed are the analytical results for sample(s) received by the laboratory on February 27, 2015. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

Analyses were performed at the Pace Analytical Services location indicated on the sample analyte page for analysis unless otherwise footnoted.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angela M. Baioni

# QUALIFIERS

Project: CRAWFORD'S COUNTRY STORE
Pace Project No.: 92239087

## DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

Acid preservation may not be appropriate for 2 Chloroethylvinyl ether, Styrene, and Vinyl chloride.

A separate vial preserved to a pH of 4-5 is recommended in SW846 Chapter 4 for the analysis of Acrolein and Acrylonitrile by EPA Method 8260.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

## LABORATORIES

| | |
|---|---|
| PASI-C | Pace Analytical Services - Charlotte |

## ANALYTE QUALIFIERS

| | |
|---|---|
| L3 | Analyte recovery in the laboratory control sample (LCS) exceeded QC limits. Analyte presence below reporting limits in associated samples. Results unaffected by high bias. |
| M0 | Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits. |
| P5 | The EPA or method required sample preservation degrades this compound, therefore acceptable recoveries may not be achieved in sample matrix spikes. |
| S4 | Surrogate recovery not evaluated against control limits due to sample dilution. |

March 10, 2015

Re: Treatment of Purge Water
Crawford's Country Store
Abbeville, South Carolina
SCDHEC Site ID Number 12335
MECI Project Number 15-5105

To Whom It May Concern;

Midlands Environmental Consultants, Inc. is providing the following letter as certification that treatment of the referenced purge water complied with the conditions of "Proposed Conditions for Use of Portable Activated Carbon Units for the Treatment of Small Volumes of Petroleum Hydrocarbon Contaminated Groundwater", as described in the following:

Applicability:

Groundwater treated was obtained as a result development of wells and sampling.

Conditions:

1. The purge/bail water from all wells is mixed before usage of the Activated Carbon Unit.

2. No free-product was detected in any of the purge water drums.

3. Analytical results of from well sampling show average concentrations of petroleum hydrocarbon constituents less than 5000 parts per billion (ppb) Benzene and less than 20,000 ppb total BTEX.

4. The existing carbon pack will be replaced/reactivated every 5,000 gallons.

5. Record of usage is maintained by Contractor.

6. Any and all recommendations and conditions issued by the Manufacturer have been adhered to.

7. Any and all recommendations and conditions (even on a site by site basis) issued by the SCDHEC must be adhered to.

All purge waters were treated on-site using an up-flow treatment drum loaded with 30 pounds of activated carbon. Carbon will be loaded to a maximum of 3 pounds of total organic compounds or 5,000 gallons of development/purge water, whichever occurs first.

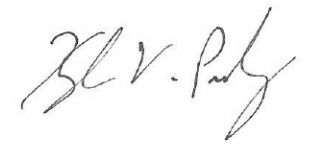
Post Office Box 854, Lexington SC 29071 • 231 Dooley Road, Lexington, SC 29073
Telephone: (803) 808-2043 • fax: (803) 808-2048

**262.25 gallons of wastewater was disposed on February 25th, 2015 during the sampling/purging of the monitoring well network.**

Midlands Environmental also tracks cumulative organic compounds adsorbed on the activated carbon to ensure the capacity of carbon mass is not over-charged. This data is available upon request.

Should you have any questions or comments, please contact the undersigned.

Sincerely,
Midlands Environmental Consultants, Inc.



Kyle V. Pudney
Project Biologist

**MR FRANK CRAWFORD**
**CRAWFORDS COUNTRY STORE**
**5870 HIGHWAY 28 NORTH**
**ABBEVILLE SC 29620**

MAR 2 3 2015

**Re: Corrective Action Options**
Crawford's Country Store, 5870 Highway 28 North, Abbeville, SC
UST Permit #12335
Release reported December 3, 1991
Monitoring Report received March 20, 2015
Abbeville County

Dear Mr. Crawford

The Underground Storage Tank (UST) Management Division (Division) of the South Carolina Department of Health and Environmental Control (Agency) has reviewed the referenced report submitted by Midland's Environmental Consultants, Inc. on your behalf. The report indicates that active corrective action is necessary at the site to mitigate petroleum impact and ensure that there is no detrimental exposure to human health or the environment.

Funds from the State Underground Petroleum Environmental Response Bank (SUPERB) Account will soon be available for active corrective action. The selected technology must reduce the petroleum chemicals of concern (CoC) concentrations to site-specific target levels (SSTLs) determined by the Division.

The SUPERB Site Rehabilitation and Fund Access Regulations R.61-98 require the UST owner/operator to develop and implement a reasonable, cost-effective corrective action to be performed by an Agency-certified site rehabilitation contractor. As the owner/operator you are the responsible party for the release reported on December 3, 1991. You may choose one of two options as to how to proceed with this requirement: State lead or owner/operator lead.

State Lead Option:

- If you choose the state lead option, the Division will procure a certified site rehabilitation contractor to perform corrective action on your behalf. The Agency will enter into an enforceable contract with the awarded contractor. As long as you do not interfere with or prohibit the work at your site, DHEC will not hold you responsible for the failure of the state selected contractor to meet the terms of the contract. To utilize the state lead option, please sign and return the applicable Permission and Right-of-Entry forms within 15 days of the date of this letter.

Owner/Operator Lead Option:

- If you select the owner/operator lead option, you will be required to select a contractor to perform the corrective action. In order to assist you in determining the clean-up technology, time frame, clean-up levels, and associated costs, the Division will prepare a technical specification package and provide you copies to send to contractors of your choice. In addition, the Division will announce the request for solicitations in the South Carolina Business Opportunities, a bi-weekly state government publication, to ensure that an adequate solicitation response is obtained so that a fair and competitive price can be established. This announcement will clearly indicate that you will select the contractor to implement the corrective action.
- Compensation to the contractor will be from the SUPERB Account, but you may have the obligation to pay your selected contractor for any costs not approved by the Agency.
- The Division strongly suggests that a written contract between you and the selected contractor be developed following the completion of the solicitation process. The parties to this contract would be you and the contractor you choose; the Agency would not be a party to this contract. The Division's function would be to monitor and ensure progress of corrective action activities.
- If the contractor you select does not or cannot complete the required activities, you will be required to find another certified contractor to complete the required activities for the remainder of the existing financial approval amount. No additional funding from the SUPERB Account may be allowed. Under R.61-92, Part 280: Underground Storage Tank Control Regulations, you as the owner/operator are ultimately responsible to the Agency for the actions of your contractor. The Agency will pursue enforcement actions against you if the contractor you select does not make satisfactory progress towards achieving established corrective actions goals. To utilize the owner/operator lead option, please sign and return the enclosed Active Corrective Action Options Form within 15 days of the date of this letter.

On all correspondence or inquiries regarding this project, please reference **UST Permit #12335.** If you have any questions, please contact me at (803) 896-0607 or by email at thrasham@dhec.sc.gov.

Sincerely,

Ashleigh Thrash

Re: **Water Supply Well & Stream Sampling Results**
Crawford's Country Store
5870 Hwy 28 North, Abbeville, SC 29620
UST Permit #12335
Petroleum Release Reported December 3, 1991
Monitoring Report Received March 20, 2015
Abbeville County

Dear Mr. and Mrs. McCullough:

On February 25, 2015, Midlands Environmental Consultants, Inc., collected groundwater samples from your water supply well and the stream located on your property. This sampling work was directed by the Underground Storage Tank Management Division (UST Division) to evaluate the extent of the underground petroleum release from Crawford's Country Store. The lab results from your water supply well sample indicate that Methyl tertiary butyl ether (MTBE) is present at a concentration of 1.1 µg/L, and Diisopropyl ether (DIPE) is present at an estimated concentration of 9.2 µg/L. The safe drinking water standard/Risk Based Screening Level (RBSL) for MTBE is 40 µg/L, and the Action Level for DIPE is 150 µg/L. Based on current scientific evidence, concentrations below RBSLs and ALs do not pose any risk to your health. Additionally, for the sample collected from the stream located in your pasture, all Contaminants of Concern (COCs) were below RBSLs.

Based on these results, the UST Management Division plans to periodically resample your water supply well and stream to ensure that contaminants remain below the safe drinking water standards. If concentrations increase, or if you so desire, a granular activated carbon (GAC) unit can be installed on your well to remove chemicals of concern.

On all correspondence concerning this site, please reference **UST Permit #12335**. If you have any questions concerning this correspondence, please feel free to contact me at (803) 898-0607 or via email at thrasham@dhec.sc.gov.

Sincerely,

Ashleigh Thrash

## REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, Inc..

MDE
Maryland Department of the Environment

# FACTS ABOUT:
## METHYL TERTIARY-BUTYL ETHER (MTBE)

## METHYL TERTIARY-BUTYL ETHER (MTBE)

Methyl tertiary-butyl ether (MTBE) is a chemical compound made from a chemical reaction of methanol and isobutylene. At one time, MTBE was produced in very large quantities and was used primarily as a fuel additive in gasoline. During the summer of 2006, the gasoline refiners phased MTBE out of Maryland's gasoline and replaced it with ethanol.

## WHY WAS MTBE USED AS A FUEL ADDITIVE?

MTBE replaced lead as an octane enhancer to help prevent gasoline engines from "knocking." MTBE is known as an oxygenate because it raises the oxygen content of gasoline. Oxygen helps gasoline burn more completely, thereby reducing harmful tailpipe emissions from motor vehicles. Most refiners used MTBE in higher concentrations over other oxygenates primarily for its blending characteristics to fulfill some requirements set by Congress in the 1990 Clean Air Act Amendments. MTBE became more prevalently used in the Baltimore-Washington Metropolitan region in 1995 when the Clean Air Act required areas with the worst ground-level ozone air pollution to reduce emissions of pollutants that form ground-level ozone by using reformulated, or oxygenated, gasoline. This continued until the summer of 2006 when ethanol replaced MTBE as the primary oxygenate used by gasoline refiners.

## WHY IS MTBE AN ENVIRONMENTAL CONCERN?

MTBE is more soluble and mobile in water, has a smaller molecular size, and is less biodegradable than other gasoline components. MTBE can become introduced into the environment, particularly to water, from leaking underground and aboveground petroleum storage tank (USTs and ASTs) systems through liquid and vapor releases. Other sources of MTBE include atmospheric deposition, storm water runoff, watercraft, and residential fuel use.

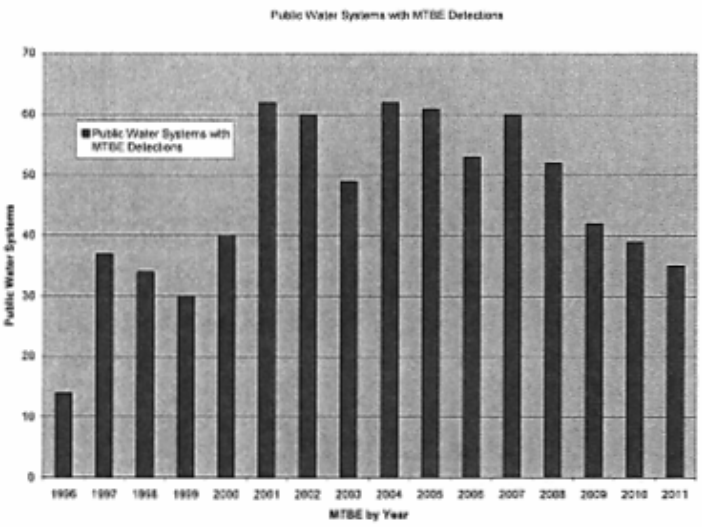
## IS MTBE A HEALTH CONCERN?

The U.S. Environmental Protection Agency (EPA) reviewed all available information and concluded that there was insufficient data to quantify health risks from low-level MTBE exposures in drinking water. EPA's health advisory, issued in December 1997, states that levels of contamination at or below 20 to 40 parts per billion (ppb) provides a large margin of safety from toxic effects and that water would not have an unpleasant taste and odor. In 1999, an EPA Panel investigated concerns about MTBE in drinking water supplies. The Panel recommended that EPA work with Congress and the states to implement reforms to protect drinking water

supplies from MTBE while maintaining air pollution reductions. Specific Panel recommendations included:

- Substantially reducing the use of MTBE while ensuring no loss in air quality benefits;
- Enhancing public drinking water monitoring, assessment, and protection programs;
- Enhancing enforcement of UST upgrade or replacement programs; and
- Enhancing programs for public education and clean-up of gasoline spills.

## HAVE THE WATERS OF MARYLAND BEEN IMPACTED?



Since 1995, MDE has periodically sampled community and non-transient, non-community public water systems for MTBE. Of the 1,023 public water systems, MTBE was detected in 35 systems in 2011. MDE continues to require sampling for MTBE contamination at all leaking underground storage tank (LUST) sites with groundwater impacts. Data from all such LUST sites indicated that 652 domestic wells have been impacted by MTBE to date. Carbon filtration systems are typically installed to remove contamination or alternative water supplies are provided to address MTBE concerns.

## WHAT IS MDE DOING ABOUT MTBE CONTAMINATION?

The MDE continues to test for the presence of MTBE in groundwater. For public water supplies, sampling frequency increases when MTBE is detected, and contamination levels over 10 ppb trigger an investigation for the contamination source. For private wells, treatment is recommended for wells with levels at or above 20 ppb at the point of use. However, at higher levels other options including well replacement may be needed. Follow-up action has included providing alternative sources of water, adding treatment, conducting additional monitoring, and implementing remediation strategies. MDE continues to assist local governments to develop wellhead protection programs to reduce the risk of contaminating public supplies. Many local government water sampling programs include MTBE in there sampling.

## GOVERNOR TASK FORCE ON MTBE:

- On May 11, 2000, the Governor signed an emergency bill that created a Task Force charged with determining and addressing the environmental and health risks associated with ground and surface water MTBE contamination, examining national and regional efforts on MTBE contamination, recommending a plan to minimize and counteract MTBE risks, and exploring alternatives to MTBE. The Task Force published its findings in Preliminary and Final Reports. (Click here to view Governor's Office Press Release)
- The Preliminary Report by the Task Force became available by December 2000. (Click here to download the Preliminary Report)
- The Final Report by the Task Force became available by December 2001. (Click here to download the Final Report)

If you need more information, please contact MDE's Oil Control Program at (410) 537-3442, and if you have questions concerning the presence of MTBE in public water supplies, contact MDE's Water Supply Program at (410) 537-3714.

UST Permit #12335
Release reported December 3, 1991
Monitoring Report received March 20, 2015
Abbeville County

Dear Mr. Crawford

The Underground Storage Tank (UST) Management Division (Division) of the South Carolina Department of Health and Environmental Control (Agency) has reviewed the referenced report submitted by Midland's Environmental Consultants, Inc. on your behalf. The report indicates that active corrective action is necessary at the site to mitigate petroleum impact and ensure that there is no detrimental exposure to human health or the environment.

Funds from the State Underground Petroleum Environmental Response Bank (SUPERB) Account will soon be available for active corrective action. The selected technology must reduce the petroleum chemicals of concern (CoC) concentrations to site-specific target levels (SSTLs) determined by the Division.

The SUPERB Site Rehabilitation and Fund Access Regulations R.61-98 require the UST owner/operator to develop and implement a reasonable, cost-effective corrective action to be performed by an Agency-certified site rehabilitation contractor. As the owner/operator you are the responsible party for the release reported on December 3, 1991. You may choose one of two options as to how to proceed with this requirement: State lead or owner/operator lead.

State Lead Option:

- If you choose the state lead option, the Division will procure a certified site rehabilitation contractor to perform corrective action on your behalf. The Agency will enter into an enforceable contract with the awarded contractor. As long as you do not interfere with or prohibit the work at your site, DHEC will not hold you responsible for the failure of the state selected contractor to meet the terms of the contract. To utilize the state lead option, please sign and return the applicable

UST Permit #12335
Release reported December 3, 1991
Monitoring Report received March 20, 2015
Abbeville County

Dear Mr. Crawford

The Underground Storage Tank (UST) Management Division (Division) of the South Carolina Department of Health and Environmental Control (Agency) has reviewed the referenced report submitted by Midland's Environmental Consultants, Inc. on your behalf. The report indicates that active corrective action is necessary at the site to mitigate petroleum impact and ensure that there is no detrimental exposure to human health or the environment.

Funds from the State Underground Petroleum Environmental Response Bank (SUPERB) Account will soon be available for active corrective action. The selected technology must reduce the petroleum chemicals of concern (CoC) concentrations to site-specific target levels (SSTLs) determined by the Division.

The SUPERB Site Rehabilitation and Fund Access Regulations R.61-98 require the UST owner/operator to develop and implement a reasonable, cost-effective corrective action to be performed by an Agency-certified site rehabilitation contractor. As the owner/operator you are the responsible party for the release reported on December 3, 1991. You may choose one of two options as to how to proceed with this requirement: State lead or owner/operator lead.

State Lead Option:

- If you choose the state lead option, the Division will procure a certified site rehabilitation contractor to perform corrective action on your behalf. The Agency will enter into an enforceable contract with the awarded contractor. As long as you do not interfere with or prohibit the work at your site, DHEC will not hold you responsible for the failure of the state selected contractor to meet the terms of the contract. To utilize the state lead option, please sign and return the applicable

Permission and Right-of-Entry forms within 15 days of the date of this letter.

Owner/Operator Lead Option:

- If you select the owner/operator lead option, you will be required to select a contractor to perform the corrective action. In order to assist you in determining the clean-up technology, time frame, clean-up levels, and associated costs, the Division will prepare a technical specification package and provide you copies to send to contractors of your choice. In addition, the Division will announce the request for solicitations in the South Carolina Business Opportunities, a bi-weekly state government publication, to ensure that an adequate solicitation response is obtained so that a fair and competitive price can be established. This announcement will clearly indicate that you will select the contractor to implement the corrective action.
- Compensation to the contractor will be from the SUPERB Account, but you may have the obligation to pay your selected contractor for any costs not approved by the Agency.
- The Division strongly suggests that a written contract between you and the selected contractor be developed following the completion of the solicitation process. The parties to this contract would be you and the contractor you choose; the Agency would not be a party to this contract. The Division's function would be to monitor and ensure progress of corrective action activities.
- If the contractor you select does not or cannot complete the required activities, you will be required to find another certified contractor to complete the required activities for the remainder of the existing financial approval amount. No additional funding from the SUPERB Account may be allowed. Under R.61-92, Part 280: Underground Storage Tank Control Regulations, you as the owner/operator are ultimately responsible to the Agency for the actions of your contractor. The Agency will pursue enforcement actions against you if the contractor you select does not make satisfactory progress towards achieving established corrective actions goals.
- To utilize the owner/operator lead option, please sign and return the enclosed Active Corrective Action Options Form within 15 days of the date of this letter.

On all correspondence or inquiries regarding this project, please reference **UST Permit #12335.** If you have any questions, please contact me at (803) 896-0607 or by email at thrasham@dhec.sc.gov.

Sincerely,

Ashleigh Thrash

**UNDERGROUND STORAGE TANK AND PROPERTY OWNER**
**UST Permit #12335**

**If you are both the owner of the former or existing underground storage tanks for the release reported on December 3, 1991 and the current property owner, please complete this form.**

I, _____, certify that I am the identified legal owner of the underground storage tanks for the release reported on December 3, 1991 and property located at the facility identified below or serve as the authorized representative for the owner. I grant permission to the South Carolina Department of Health and Environmental Control (SCDHEC) to secure on my behalf contractor services to conduct assessment and corrective action activities as required, and authorize SCDHEC, or a contractor selected by SCDHEC, to enter this property at reasonable times only to accomplish these site rehabilitation tasks. The contractor(s) will be designated as my contractor for only the required site rehabilitation activities. Compensation to the contractor(s) will be from the SUPERB Account and I will have no obligation to pay the contractor(s). I understand that SCDHEC or its contractor will be responsible for notifying me of all activities that are necessary prior to their initiation and will promptly provide to me a copy of each environmental report. I understand that I may choose to select my own contractor at the completion of any phase of work by notifying the Division of Underground Storage Tank Management in writing.

APR 29 2011
PROGRAM

**UNDERGROUND STORAGE TANK (UST) OWNER/OPERATOR LEAD INFORMATION SHEET**

## 1. CONTRACTOR OF CHOICE

As the UST Owner/Operator of UST Permit # 12335, I would like to use the contractor or person(s)* listed below and request that they represent me for: (check one)

( ) Initial Groundwater Assessment
( ) Other (please specify)_____
(X) all future assessments scopes. **

Name of Contractor/Person(s): Midlands Environmental Consultants, Inc.

Address: 235-B Dooley Road, Lexington, SC 29073

Telephone Number: (803) 808-2043

Note: Site rehabilitation activities must be performed by a SCDHEC Certified Site Rehabilitation Contractor in accordance with R.61-98.

*indicate if the person listed is your own employee

** if you would like the contractor to perform all future assessment activities at this and/or other facilities that have confirmed releases, please provide a list of all sites on your letterhead and provide the information requested in items 2 and 3 below within the context of the letter.

## 2. FINANCIAL OR FAMILIAL RELATIONSHIP

Does a financial or familial relationship, as defined below, exist between you and the contractor/person that you listed above? _____ Yes _X_ No (please initial) ✓

Financial Relationship: A connection or association through a material interest of sources of income which exceed five percent of annual gross income from a business entity.

Familial Relationship: A connection or association by family or relatives, in which a family member or relative has a material interest. Family or relatives include: father, mother, son, daughter, brother, sister, uncle, aunt, first cousin, nephew, niece, husband, wife, father-in-law, mother-in-law, son-in-law, daughter-in-law, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, half brother, half sister, grandparent, grandchild, great grandchild, step grandparent, step great grandparent, step grandchild, step great grandchild, or fiancee.

## 3. PAYMENT

You can pay the contractor and, upon the submittal of the canceled check (or a notarized statement from the contractor), be compensated from the SUPERB Account, or have payment issued directly from us to the contractor.

I request that payment be made to me after I have paid the contractor. _____ Yes _____ No (please initial)
I request that payment be made directly to the contractor. _X_ Yes _____ No (please initial) fc

Note: All costs must receive prior financial approval from the Department regardless of payment option.

DIVISION OF UNDERGROUND STORAGE TANK MGMT.

**UNDERGROUND STORAGE TANK AND PROPERTY OWNER**

PERMISSION FORM - FACILITY ID #12335

**If you are the owner of the former or existing underground storage tanks and the property owner, please complete this form.**

I, Harold Franklin Crawford, certify that I am the legal owner of the underground storage tanks and property located at the facility identified below or serve as the authorized representative for the owner. I grant permission to the South Carolina Department of Health and Environmental Control (SCDHEC) to secure on my behalf contractor services to conduct assessment and corrective action activities as required, and authorize SCDHEC, or a contractor selected by SCDHEC, to enter this property at reasonable times only to accomplish these site rehabilitation tasks. The contractor(s) will be designated as my contractor for only the required site rehabilitation activities. Compensation to the contractor(s) will be from the SUPERB Account and I will have no obligation to pay the contractor(s). I understand that SCDHEC will be responsible for notifying me of all activities that are necessary prior to their initiation and will promptly provide to me a copy of each environmental report. I understand that I may choose to select my own contractor at the completion of any phase of work by notifying the Division of Underground Storage Tank Management in writing.

Name of Facility Crawfords Country Store Inc Phone # 864-348-7442

Street Address of Facility 5870 HWY 28 North

Town, City, District, Suburb Abbeville, SC 29620

Name of nearest intersecting street, road, highway, alley HWY 184

Is this facility within the city limits? (yes or no) NO

Is this facility serviced by a public water or sewer utility? (yes or no) NO, if no, please provide the name and phone number of a person that we can contact that can assist in the location of private water and septic tank lines FRANK CRAWFORD, phone number 864-446-2000

Were underground storage tanks previously removed from the ground at this facility? (yes or no) YES, if yes, please provide the name of a person we can contact that can assist in the location of the former underground storage tank excavation FRANK CRAWFORD, Phone number 864-446-2000

Is the property currently leased or rented to someone? (yes or no) NO, if yes, please provide their name _____ and phone number _____ and let them know about the pending assessment activities. If vehicles or other mobile structures are parked over the former or existing underground storage tanks, they should be moved before SCDHEC's contractor gets to the site.

Re: **Notice to Proceed-Groundwater Sampling**
Bid # SB-27496-03/08/05; PO# 574989

Dear Mr. Lowder:

Based on the award of the referenced bid package, enclosed are the information packets to conduct twenty (20) groundwater-sampling events. The packets contain all necessary information for work to begin. The facility has been assigned an individual Cost Agreement (CA) number as listed below. Please reference the CA number and Purchase Order #574989 on the appropriate invoice submitted for payment against the facility.

Emerald, Inc. will perform services at the sites on behalf of the site's responsible party (RP); however, payment will be made from the SUPERB Account. The site's RP has no obligation for payment for this scope of work. Please coordinate access to the facility with the property owner. Contact information has been provided in the information packet. The Bureau grants pre-approval for transportation of drums of groundwater from the referenced sites to a permitted treatment facility. The contaminated groundwater must be properly stored in labeled 55-gallon drums or equivalent containers. The contaminated groundwater must be accepted by the approved treatment facility. There can be no spillage or leakage in transport. A copy of the disposal manifest from the receiving facility that clearly designates the quantity received must be included with the final report. **Please note, the final report is due within 3 weeks from the date the site is sampled. If the site is not sampled by the specified due date or the report is not received in the specified time period, a late fee may be imposed.**

Please contact me with the sampling schedule before commencing work at these facilities. If you have any questions or need further assistance, please contact me at (803) 896-6397 or thomadl@dhec.sc.gov.

Sincerely,

Debra L. Thoma

Re: **Notice to Proceed**
Bid # SB-21868-3/18/03; PO# 463276

Dear Mr. Heames:

Based on the award of the referenced bid package, enclosed are the information packets to conduct twenty-seven (27) groundwater-sampling events. The packets contain all necessary information for work to begin. The facility has been assigned an individual Cost Agreement (CA) number as listed below. Please reference the CA number and Purchase Order #463276 on the appropriate invoice submitted for payment against the facility.
