Summary: Trey Smith d.b.a. Smith's Construction and Mobile Flooring Services (Individual/Entity) was contracted to clean out apartment buildings at Petan Apartments of St. Andrews (Site) after they were damaged by fire. On July 24, 2014, a Department inspector conducted an investigation at the Site and observed asbestos-contaminated materials being improperly removed. On August 25, 2015, September 10, 2015, and September 15, 2015, the Department

attempted to issue a proposed consent order to the Individual/Entity. Following appropriate efforts to resolve this matter in accordance with the Department's Uniform Enforcement Policy, the Department issued an Administrative Order. The Individual/Entity has violated U.S. EPA National Emission Standard for Asbestos and South Carolina Standards of Performance for Asbestos Projects as follows: failed to comply with work practice requirements for a NESHAP-sized project related to preparation, removal, clean-up, and disposal of asbestos containing materials; failed to ensure that visible emissions from the work area did not escape into the environment; and failed to obtain a Department-issued asbestos contractor's license, project license, or ensure that all persons engaged in the project were licensed to do so.

Action: The Individual/Entity is required to: not engage in any asbestos abatement projects unless all required licenses from the Department have been obtained and pay a civil penalty in the amount of twelve thousand, five hundred dollars (**\$12,500.00**).

Summary: Johnson Controls Battery Group, Inc. (Individual/Entity) operates a lead-acid battery recycling facility in Florence South Carolina. On February 5, 2010, the Department issued Synthetic Minor Air Quality Construction Permit 1040-0129-CA to the Individual/Entity. On March 18, 2014, through March 26, 2014, the Individual/Entity conducted source tests to demonstrate compliance with the Maximum Achievable Control Technology (MACT) requirements. On August 12, 2014, the Department began conducting more frequent inspections and on August 18, 2014, the Department received the final test results and additional information it requested regarding the tests and determined compliance as not demonstrated with the performance testing requirements. The Individual/Entity has violated U.S. EPA Regulations, South Carolina Air Pollution Control Regulations and Synthetic Minor Construction Permit 1040-0129-CA as follows: failed to provide required records of continuous monitoring system performance evaluations; failed to operate according to the Standard Operating Procedures Manual for the control of fugitive dust and inspection of control devices; failed to provide adequate information regarding monitoring devices in its Notice of Compliance Status and periodic reports; failed to report total duration of excess emissions and monitor downtime as a percent of total operating time; failed to demonstrate the required negative pressure for total enclosure of buildings in which lead dust is generated; failed to describe corrective actions in periodic reports when pressure differential readings were outside of established ranges; failed to maintain established pressure

differential on control devices; failed to adequately maintain and operate continuous emissions monitoring systems for carbon monoxide and nitrogen oxide emissions; failed to maintain combustion zone and afterburner temperatures during initial source testing; failed to comply with the limit on the amount of sodium nitrate used in the Refinery Process; and failed to repair breaches or other possible routes for emissions of lead dust to the atmosphere.

Action: The Individual/Entity is required to: submit a Total Enclosure Negative Pressure Assessment developed by a third party to correct deficiencies in maintaining the required total enclosure negative pressure; henceforth maintain the required negative pressure on all applicable total enclosures; submit a Continuous Emission Monitoring System Assessment developed by a third party; within 30 days of the final assessment or completion of necessary modifications, henceforth achieve no less than 95% monitor up time for all continuous emissions monitoring systems; henceforth maintain required combustion zone and afterburner temperatures; henceforth provide records of all required performance evaluations; henceforth document cause and corrective actions taken for parameter readings outside established ranges; submit to the Department an Environmental Management System developed by a third party that is consistent with ISO 14001 standards; and, pay a civil penalty in the amount of two hundred fifty thousand dollars (**\$250,000.00**).

Summary: Broad River Materials, Inc. (Individual/Entity) operates a sand drying facility. The Department issued Conditional Major Operating Permit 9900-0125 to the Individual/Entity, effective October 1, 2012. On April 27, 2015, the Department conducted a comprehensive inspection and a Notice of Alleged Violation and Notice of Enforcement Conference was issued on August 10, 2015. The Individual/Entity violated South Carolina Air Pollution Control Regulations as follows: failed to conduct a source test to confirm particulate matter (PM) emissions from the sand dryer baghouse; failed to establish an operational range for the pressure drop of the baghouse, and maintain records of pressure drop

readings; failed to operate and properly maintain the pressure drop gauge; failed to perform and maintain records of weekly operation and maintenance checks; failed to maintain fuel oil supplier certifications; failed to calculate PM emissions and submit semiannual emissions reports; failed to develop a facility-wide fugitive dust control plan; failed to develop written guidelines for water truck operators; failed to record weekly inspections of all water trucks including corrective actions and maintenance activities; and, failed to develop written guidelines for plant operators on how to address opacity problems.

Action: The Individual/Entity is required to: except as otherwise required, conduct source tests in accordance with the Order, not operate the sand dryer and associated permitted equipment until such time as the facility achieves compliance with the requirements of the Order; henceforth comply with all testing, operational, maintenance, monitoring, record keeping and reporting conditions of the Conditional Major Operating Permit; replace, calibrate, or otherwise repair the pressure drop gauge on the sand dryer baghouse and submit documentation demonstrating that the pressure drop gauge is operational and an operational range has been established; submit semiannual emissions reports and fuel oil supplier certifications for the reporting periods of October 1, 2014 through March 31, 2015, and April 1, 2015 through September 30, 2015; submit a facility-wide fugitive dust control plan; submit written guidelines for water truck operators; submit written guidelines for plant operators on how to address opacity problems; conduct a Department-approved source performance test to confirm PM emissions from the sand dryer baghouse; pay a civil penalty in the amount of eight thousand five hundred dollars (**\$8,500.00**); and, pay a suspended penalty in the amount eight thousand five hundred dollars (\$8,500.00) should any requirement of the Order not be met.
