

Description: South Carolina PWS Facility Information

Publish Date: **07/09/2014**

Abstract:

Environmental Data, Public Drinking Water Quality: This data set contains the Latitude and Longitude location of all Public Water Systems (PWS) in South Carolina as well as the facility type from 1999. It also contains information on the facility ID, spatial reference datum, and the year for which the data is valid.

Purpose:

To provide the public, EPHT grantees, researchers, and other public health professionals with information pertaining to public sources of Drinking Water in the state of South Carolina. This dataset contains the physical locations of sources and treatment plants of Public Water Systems (PWS).

Supplemental Information:

The drinking water data in this data set come from the Bureau of Water at the South Carolina Department of Health and Environmental Control. The 1999 - 2003 data are located in our 'Water Supply Inventory' database. From 2004, all data reside in SDWIS (State Drinking Water Information System).

Notes:

Any user of this data must have reviewed and understand the metadata content before attempting to interpret or use the SC PWS Facility Information data. This is a public dataset and is not for commercial purposes. Any use of this data should contain proper data source acknowledgement: EQC Water, SC DHEC.
