## Message from the SCPHA President

**Leah B. Dorman**

President, SC Public Health Association

On behalf of the South Carolina Public Health Association, Governing Council, and conference committees, I would like to welcome each of you to the 84th Annual Meeting at the Columbia Marriott Downtown in Columbia, South Carolina. Whether you are an attendee, a presenter, an exhibitor, a sponsor, or a donor, we want you to know how appreciative we are of your support.

The Association has continued to face many financial challenges this year, and has made many difficult decisions in an effort to sustain our future. One of those decisions was the selection of a venue for the annual meeting. While we have met at the beach for many years, the Governing Council voted last year to move the annual meeting to Columbia for 2014, in an effort to save money and attract attendees who may not otherwise be able to attend the meeting at the beach. Our convention coordinators and program committees have worked very hard this past year with planning, what I feel will be, another outstanding conference. The theme is "Heroes in the Field: Public Health at the Frontline", and is dedicated to YOU and all our public health heroes in South Carolina - past, present, and future. I am excited about the speakers, topics, and sessions. As always, the hardest decision will be selecting which concurrent sessions to attend!

Thank you again for your continued support of SCPHA, and your advocacy of public health across South Carolina. We strive to bring you quality events, with reputable speakers and timely topics. As always, your input is very valuable. Please feel free to contact me or one of the other Governing Council members with any comments and/or suggestions.

Once again, welcome to Columbia and enjoy the conference.

Sincerely,

Leah B. Dorman

### ***Marketing Public Health***

Robert “Robbie” Butt, MA, BA, Marketing Performance Group

In many ways, public health or “social marketing” is more difficult than commercial marketing. In commercial marketing, it’s about the product or service, financial gain, and positioning yourself against your competition. In public health marketing, it’s about behavior change, individual or societal gain, and your competition is often times either other organizations you work with, or the current or preferred behavior of your target market. Learn about an 8-step planning process that has been applied to public health marketing successfully and will bring a new level of expertise and effectiveness to your organization.

*Where's the Finish Line?*

Actually, it's not a race. It's about individual achievement. Whether we make a beeline or zigzag to reach our destination, we all must chart our own course. We believe a thriving community needs those who're willing to shoot for the horizon. And we encourage them.

*Because it matters how you're treated.*
