Description: **South Carolina Acute Myocardial Infarction Hospitalizations Data**

Publish Date: **07/09/2014**

Abstract:

Health Data, SC Acute Myocardial Infarction (AMI/Heart Attack): This data set contains aggregated counts of the number of Hospitalizations for AMI/Heart Attack by Admission Year, Admission Month, Age Group, Sex, and County in the state of South Carolina. Counts and rates are given for the condition.

Purpose:

To provide the public, EPHT grantees, researchers, and other public health professionals with information pertaining to Hospitalization for AMI/Heart Attack in the state of South Carolina.

Supplemental Information:

The Private Sector Health Care Utilization Database contains information from the UB-04 billing system. This data includes all inpatient hospitalizations and emergency department visits from short-term acute care hospitals. The database includes information such as patient demographics, ICD-9 diagnoses and procedures, charges, length of stay, and patient disposition, etc. The South Carolina Data Oversight Council, a seventeen member public/private body formed by the state statute with ORS as staff, oversees the collection and release of information from this database.

Notes:

Any user of this data must have reviewed and understand the metadata content before attempting to interpret or use the AMI/Heart Attack Hospitalization data. No attempt should be made to identify patient identity through use of this data set. This is a public dataset and is not for commercial purposes. Any use of this data should contain proper data source acknowledgement: SC Office of Research and Statistics
