### REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,  
 without the written consent of Pace Analytical Services, LLC

## QUALIFIERS

Project 378 Truck Stop 07960/56413  
Pace Project No.. 92389337

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.  
ND - Not Detected at or above adjusted reporting limit  
TNTC - Too Numerous To Count  
J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit  
MDL - Adjusted Method Detection Limit  
PQL - Practical Quantitation Limit.  
RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix  
S - Surrogate  
1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270 The result for each analyte is a combined concentration  
Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values  
LCS(D) - Laboratory Control Sample (Duplicate)  
MS(D) - Matrix Spike (Duplicate)  
DUP - Sample Duplicate  
RPD - Relative Percent Difference  
NC - Not Calculable  
SG - Silica Gel - Clean-Up  
U - Indicates the compound was analyzed for, but not detected  
Acid preservation may not be appropriate for 2 Chloroethylvinyl ether  
A separate vial preserved to a pH of 4-5 is recommended in SW846 Chapter 4 for the analysis of Acrolein and Acrylonitrile by EPA Method 8260.  
N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270 The result reported for each analyte is a combined concentration.  
Pace Analytical is TNI accredited Contact your Pace PM for the current list of accredited analytes  
TNI - The NELAC Institute

### LABORATORIES

PASI-C Pace Analytical Services - Charlotte  
PASI-O Pace Analytical Services - Ormond Beach

### ANALYTE QUALIFIERS

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter)  
M1 Matrix spike recovery exceeded QC limits Batch accepted based on laboratory control sample (LCS) recovery  
P5 The EPA or method required sample preservation degrades this compound, therefore acceptable recoveries may not be achieved in sample matrix spikes  
S3 Surrogate recovery exceeded laboratory control limits Analyte presence below reporting limits in associated sample

|           |                      |                 |                            |                            |                              |       |

Note: Whenever there is a discrepancy affecting North Carolina compliance samples, a copy of this form will be sent to the North Carolina DEHNR Certification Office (i.e. Out of hold, incorrect preservative, out of temp, incorrect containers.

Document Name:  
Sample Condition Upon Receipt(SCUR)

Document No.:  
F-CAR-CS-033-Rev.06

Document Revised: February 7, 2018  
Page 1 of 2

Issuing Authority:  
Pace Carolinas Quality Office

\*Check mark top half of box if pH and/or dechlorination is verified and within the acceptance range for preservation samples.

Exceptions: VOA, Coliform, TOC, Oil and Grease, DRO/8015 (water) DOC, LLHg

\*\*Bottom half of box is to list number of bottle

RE: Project: Hwy 378 Truck WSW 07960/57353  
Pace Project No.: 92388726

Dear Robert Dunn:

Enclosed are the analytical results for sample(s) received by the laboratory on June 18, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Trey Carter

## QUALIFIERS

Project Hwy 378 Truck WSW 07960/57353  
Pace Project No 92388726

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot  
ND - Not Detected at or above adjusted reporting limit  
TNTC - Too Numerous To Count  
J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.  
MDL - Adjusted Method Detection Limit.  
PQL - Practical Quantitation Limit  
RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.  
S - Surrogate  
1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.  
Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values  
LCS(D) - Laboratory Control Sample (Duplicate)  
MS(D) - Matrix Spike (Duplicate)  
DUP - Sample Duplicate  
RPD - Relative Percent Difference  
NC - Not Calculable  
SG - Silica Gel - Clean-Up  
U - Indicates the compound was analyzed for, but not detected.  
Acid preservation may not be appropriate for 2 Chloroethylvinyl ether.  
A separate vial preserved to a pH of 4-5 is recommended in SW846 Chapter 4 for the analysis of Acrolein and Acrylonitrile by EPA Method 8260  
N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270 The result reported for each analyte is a combined concentration.  
Pace Analytical is TNI accredited Contact your Pace PM for the current list of accredited analytes.  
TNI - The NELAC Institute

### LABORATORIES

PASI-C Pace Analytical Services - Charlotte  
PASI-O Pace Analytical Services - Ormond Beach

### ANALYTE QUALIFIERS

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter)  
P5 The EPA or method required sample preservation degrades this compound, therefore acceptable recoveries may not be achieved in sample matrix spikes.

**Subject:** Fw: Complaint on 378

Good afternoon Mihir, Hope you are doing well! Please see the email below. We received a call from a concerned citizen who believes that his property is being impacted by an old underground storage tank that apparently has a long history with our Agency and the EPA. Can you please direct this matter to the proper staff for further review and resolution? Your assistance is greatly appreciated! Respectfully, Travis

**Subject:** Complaint on 378

Travis,

Here is all the information I have.

The current address of the facility is 731 HWY 378 E, Edgefield, SC 29824. Tax map number is 108-00-023-000, and is currently listed as "Old Truck Stop, LLC." The facility had a few under ground storage tanks that leaked diesel and were pulled out over 40 years ago.

The former owner and PRP for the leaking tanks was Wilson Oil. Supposedly, Wilson Oil paid a fine to the EPA and paid to have monitoring wells installed by a company out of Greenville. However, one monitoring well was marked with Geologic Exploration Inc. out of Slatessville, NC.

The current owner of the property is Mr. Calvin Bartley Jr. He resides at 102 Faulkner Mountain Road, Edgefield, SC.

The complainant is Mr. John Paragon (315-778-2882) who has stated that when it rains, a sheen appears on the standing water in his yard. He believes that this is caused by the diesel leaching from the ground.

Let me know if you need any other information.

Kyle,

This site was assigned to you for overtime work. Given the seriousness of the situation, please contact Mr. Paragon and take the appropriate actions necessary. Thank you.

**Subject:** 07960

I received a call from John Paragon (315-778-2882) living at 744 Hwy 378 in Edgefield, across from site 07960. He is complaining of contaminated water in his drinking water well, brown water in his house and fuel on his lawn. He is leaving on June 19th for a month so would like a fast response.

Thanks,

Denise Place

To: Patterson, Kyle C. <patterkc@dhec.sc.gov>;

When are you planning on going out there? I'm going to provide a response back to the District but would like to give them a bit more details about what you are planning on doing and when. You might also want to touch base with Joshua McCord before you make the site visit in case he wants to meet you onsite.

Debra and Stephanie, not sure who's shop this project is but can you please have staff pull up the status for us. Also, do you all think a site visit might be necessary.

Thanks

### Instructions for completing Chain of Custody (COC)

1. Client information at top of sheet: company name, address, phone, fax, contact (the person to contact if there are no other contacts listed on the final report.), e-mail address (if available), PO#, Project Name and/or Project Number as you would like to see it

2. Billing information is included in this section. This information should include the name and address of the person

3. Billing information should be completed if a quotation was provided by Pace Analytical. The Project Manager, and Profile No. will be completed by

4. Billing information must be filled out for each day of sample collection. Record the two letter postal code for the US state in which the

5. Billing information program that is guiding the work to ensure proper regulations are followed.

6. Billing information Description in the "SAMPLE ID" section as you would like it to appear on the laboratory report. The following information should be included: the sample matrix, sample type (G (grab) or C (composite)). When collecting a composite, the start time and end time should be entered in the respective boxes. The collection time for a grab (G) sample should be entered in the boxes marked 'Composite Collection (if required by state), the total number of containers, and preservative used.

7. Billing information Filtered in the field by marking Y or N in 'Filtered' row by the Analysis requested.

8. Billing information Required analysis and methods on the lines provided and place a check in the column for the samples requiring the analysis. The analysis should be referenced in the bottom left hand corner or include attachments for extended lists of parameters.

9. Billing information Name in the space provided and sign their name followed by the date of the sampling event at the bottom of the COC in the space marked 'ANALYST NAME AND SIGNATURE'.

10. When relinquishing custody of the samples to a representative of the laboratory or other organization, indicate the Item Numbers of those samples being transferred; sign relinquished by, date and time, and include your affiliation.

#### \*Important Note:

**Standard Turnaround Time is 2 Weeks/10 business days.** Results will be delivered by end of business on the date due unless other arrangements have been made with your project manager.

**Special Project Requirements** such as Low Level Detection Limits or level of QC reported must be included on the chain of custody in the Additional Comments section.

Re: Granular Activated Carbon Units Maintenance  
378 Truck Stop  
731 Highway 378  
Edgefield, Edgefield County, SC  
UST Permit No. 07960  
GRI Project No. 4422

Dear Mr. Patterson:

This letter is in response to our Thursday June 21, 2018 telephone conversation concerning the maintenance and upkeep of several granular activated carbon (GAC) units currently being used on water supply wells in the area of the above referenced site.

Geological Resources, Inc. (GRI) is the designated contractor of choice for the Wilkerson Fuel Company, which is the responsible party for the release at the subject site. As such, GRI has and wishes to continue conducting continued assessment and remediation activities associated with the release at this site. These activities would include the continued sampling of the water supply wells in the area. However, GRI does not wish to partake in the installation and/or maintenance of the GAC units in service at some of the water supply wells in the area of the subject site. It is our understanding that a SCDHEC State Lead contractor can maintain the GAC units in question. Based on this, GRI requests that any and all GAC installation and/or maintenance activities required by SCDHEC be conducted by the appropriate State Lead contractor.

Please contact me at (704) 845-4010 or [wsb@geologicalresourcesinc.com](mailto:wsb@geologicalresourcesinc.com) if you have any comments or questions regarding this matter.

Sincerely,

W. Scott Ball  
Project Manager

\*Important Note: By signing this form you are accepting Pace's NET 30 day payment terms and agreeing to late charges of 1.5% per month for any invoices not paid within 30 days.

### Instructions for completing Chain of Custody (COC)

1. **Section A and B:** Complete all Client information at top of sheet: company name, address, phone, fax, contact (the person to contact if there are questions, and who will receive the final report.), e-mail address (if available), PO#, Project Name and/or Project Number as you would like to see it appear on the report.
2. **Section C:** Invoice Information: Billing information is included in this section. This information should include the name and address of the person receiving the invoice.
3. Quote Reference should be completed if a quotation was provided by Pace Analytical. The Project Manager, and Profile No. will be completed by Pace Analytical Services.
4. **Site Location:** A separate COC must be filled out for each day of sample collection. Record the two letter postal code for the US state in which the samples were collected.
5. **Regulatory Agency:** List the program that is guiding the work to ensure proper regulations are followed.
6. **Section D:** Complete a Sample Description in the "SAMPLE ID" section as you would like it to appear on the laboratory report. The following information should also be included: the sample matrix, sample type (G (grab) or C (composite)). When collecting a composite, the start time and end time should be documented in the respective boxes. The collection time for a grab (G) sample should be entered in the boxes marked 'Composite End/Grab', Sample temp at collection (if required by state), the total number of containers, and preservative used.
7. Mark if the sample was filtered in the field by marking Y or N in 'Filtered' row by the Analysis requested.
8. Requested Analysis: List the required analysis and methods on the lines provided and place a check in the column for the samples requiring the analysis. Additional comments should be referenced in the bottom left hand corner or include attachments for extended lists of parameters.
9. The sampler should print their name in the space provided and sign their name followed by the date of the sampling event at the bottom of the COC in the spaces designated for 'SAMPLER NAME AND SIGNATURE'.
10. When relinquishing custody of the samples to a representative of the laboratory or other organization, indicate the Item Numbers of those samples being transferred; sign relinquished by, date and time, and include your affiliation.

**\*Important Note:**

**Standard Turnaround Time is 2 Weeks/10 business days.** Results will be delivered by end of business on the date due unless other arrangements have been made with your project manager.

**Special Project Requirements** such as Low Level Detection Limits or level of QC reported must be included on the chain of custody in the Additional Comments section.

### CHAIN-OF-CUSTODY / Analytical Request Document

The Chain-of-Custody is a LEGAL DOCUMENT. All relevant fields must be completed accurately.

\*Important Note: By signing this form you are accepting Pace's NET 30 day payment terms and agreeing to late charges of 1.5% per month for any invoices not paid within 30 days.

### Instructions for completing Chain of Custody (COC)

1. **Section A and B:** Complete all Client information at top of sheet: company name, address, phone, fax, contact (the person to contact if there are questions, and who will receive the final report.), e-mail address (if available), PO#, Project Name and/or Project Number as you would like to see it appear on the report.
2. **Section C:** Invoice Information: Billing information is included in this section. This information should include the name and address of the person receiving the invoice.
3. Quote Reference should be completed if a quotation was provided by Pace Analytical. The Project Manager, and Profile No. will be completed by Pace Analytical Services.
4. **Site Location:** A separate COC must be filled out for each day of sample collection. Record the two letter postal code for the US state in which the samples were collected.
5. **Regulatory Agency:** List the program that is guiding the work to ensure proper regulations are followed.
6. **Section D:** Complete a Sample Description in the "SAMPLE ID" section as you would like it to appear on the laboratory report. The following information should also be included: the sample matrix, sample type (G (grab) or C (composite)). When collecting a composite, the start time and end time should be documented in the respective boxes. The collection time for a grab (G) sample should be entered in the boxes marked 'Composite End/Grab', Sample temp at collection (if required by state), the total number of containers, and preservative used.
7. Mark if the sample was filtered in the field by marking Y or N in 'Filtered' row by the Analysis requested.
8. Requested Analysis: List the required analysis and methods on the lines provided and place a check in the column for the samples requiring the analysis. Additional comments should be referenced in the bottom left hand corner or include attachments for extended lists of parameters.
9. The sampler should print their name in the space provided and sign their name followed by the date of the sampling event at the bottom of the COC in the spaces designated for 'SAMPLER NAME AND SIGNATURE'.
10. When relinquishing custody of the samples to a representative of the laboratory or other organization, indicate the Item Numbers of those samples being transferred; sign relinquished by, date and time, and include your affiliation.

**\*Important Note:**

**Standard Turnaround Time is 2 Weeks/10 business days.** Results will be delivered by end of business on the date due unless other arrangements have been made with your project manager.

**Special Project Requirements** such as Low Level Detection Limits or level of QC reported must be included on the chain of custody in the Additional Comments section.

Edgefield, Edgefield County  
UST Permit No. 07960  
GRI Project No. 4422

Dear Mr. Patterson:

Attached is a Site Specific Work Plan for approved ACQAP and the associated Assessment Component Cost Agreement for the above referenced site in Edgefield, Edgefield County, South Carolina.

Please contact me at (704) 845-4010 or by e-mail at [wsb@geologicalresourcesinc.com](mailto:wsb@geologicalresourcesinc.com) if you have questions or comments concerning this matter.

Sincerely,

W. Scott Ball  
Senior Project Manager

**Site-Specific Work Plan for Approved ACQAP  
Underground Storage Tank Management Division**

To: Kyle Patterson (SCDHEC Project Manager)  
 From: Scott Ball (Contractor Project Manager)  
 Contractor: Geological Resources, Inc. UST Contractor Certification Number: 74

Facility Name: 378 Truck Stop UST Permit #: 07960  
 Facility Address: 731 Highway 378, Edgefield, Edgefield County, SC  
 Responsible Party: Wilkerson Fuel Company Phone: (803) 324-4080  
 RP Address: PO Box 2835, Rock Hill, SC 29732  
 Property Owner (if different): Old Truck Stop, LLC  
 Property Owner Address: 102 Faulkner Mountain Road, Edgefield, SC 29824  
 Current Use of Property: Vacant, unoccupied

**Scope of Work** (Please check all that apply)

- IGWA       Tier II       Groundwater Sampling       GAC  
 Tier I       Monitoring Well Installation       Other Soil Assessment

**Analyses** (Please check all that apply)

Groundwater/Surface Water:

- BTEXNMDCA (8260B)       Lead       BOD       Methane  
 Oxygenates (8260B)       8 RCRA Metals       Nitrate       Ethanol  
 EDB (8011)       TPH       Sulfate       Dissolved Iron  
 PAH (8270D)       pH       Other \_\_\_\_\_

Drinking Water Supply Wells:

- BTEXNMDCA (524.2)       Mercury (200.8 245.1 or 245.2)       EDB (504.1)  
 Oxygenates & Ethanol (8260B)       RCRA Metals (200.8)

Soil:

- BTEXNM       Lead       RCRA Metals       TPH-DRO (3550B/8015B)       Grain Size  
 PAH       Oil & Grease (9071)       TPH-GRO (5030B/8015B)       TOC

Air:

- BTEXN

**Sample Collection** (Estimate the number of samples of each matrix that are expected to be collected.)

\_\_\_\_\_ Soil      \_\_\_\_\_ Water Supply Wells      \_\_\_\_\_ Air      1 Field Blank  
42 Monitoring Wells      \_\_\_\_\_ Surface Water      3 Duplicate      1 Trip Blank

**Field Screening Methodology**

Estimate number and total completed depth for each point, and include their proposed locations on the attached map.  
 # of shallow points proposed: 10 Estimated Footage: 10 feet per point  
 # of deep points proposed: \_\_\_\_\_ Estimated Footage: \_\_\_\_\_ feet per point  
 Field Screening Methodology: \_\_\_\_\_

**Permanent Monitoring Wells**

Estimate number and total completed depth for each well, and include their proposed locations on the attached map.  
 # of shallow wells: NA Estimated Footage: \_\_\_\_\_ feet per point  
 # of deep wells: 2 Estimated Footage: 80 feet per point  
 # of recovery wells: \_\_\_\_\_ Estimated Footage: \_\_\_\_\_ feet per point

Comments, if warranted:

Two down-gradient telescoping wells in the area of WSW-3. Each well will be installed to a total depth of 80'  
No drilling will be conducted until necessary Right-to-enter agreements are obtained.

UST Permit #: 07960 Facility Name: 378 Truck Stop

**Implementation Schedule** (Number of calendar days from approval)

Field Work Start-Up: 10 days from obtaining RTEs Field Work Completion: 20 days field work start up  
Report Submittal: 45 days from completion of field work # of Copies Provided to Property Owners: 10

**Aquifer Characterization**

Pump Test:  Slug Test:  (Check one and provide explanation below for choice)

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Investigation Derived Waste Disposal**

Soil: \_\_\_\_\_ Tons Purge Water: \_\_\_\_\_ Gallons  
Drilling Fluids: \_\_\_\_\_ Gallons Free-Phase Product: \_\_\_\_\_ Gallons

**Additional Details For This Scope of Work**

For example, list wells to be sampled, wells to be abandoned/repared, well pads/bolts/caps to replace, details of AFVR event, etc.

Install 10 soil borings around old waste oil dump pit. Each to 10' in depth, collect samples at 5' and 10'.

Sample monitoring wells MW-1 through MW-31 and TW-1 through TW-9.

One field blank will be collected and one trip blank will be submitted. Samples collected from the monitoring wells and the associated duplicate will be analyzed for BTEX, naphthalene, MTBE, 1,2-DCA and 8 oxygenates by 8260 and EDB by 8011.

**Compliance With Annual Contractor Quality Assurance Plan (ACQAP)**

YES Laboratory as indicated in ACQAP? (Yes/No) If no, indicate laboratory information below.

Name of Laboratory: \_\_\_\_\_

SCDHEC Certification Number: \_\_\_\_\_

Name of Laboratory Director: \_\_\_\_\_

NA Well Driller as indicated in ACQAP? (Yes/No) If no, indicate driller information below.

Name of Well Driller: \_\_\_\_\_

SCLLR Certification Number: \_\_\_\_\_

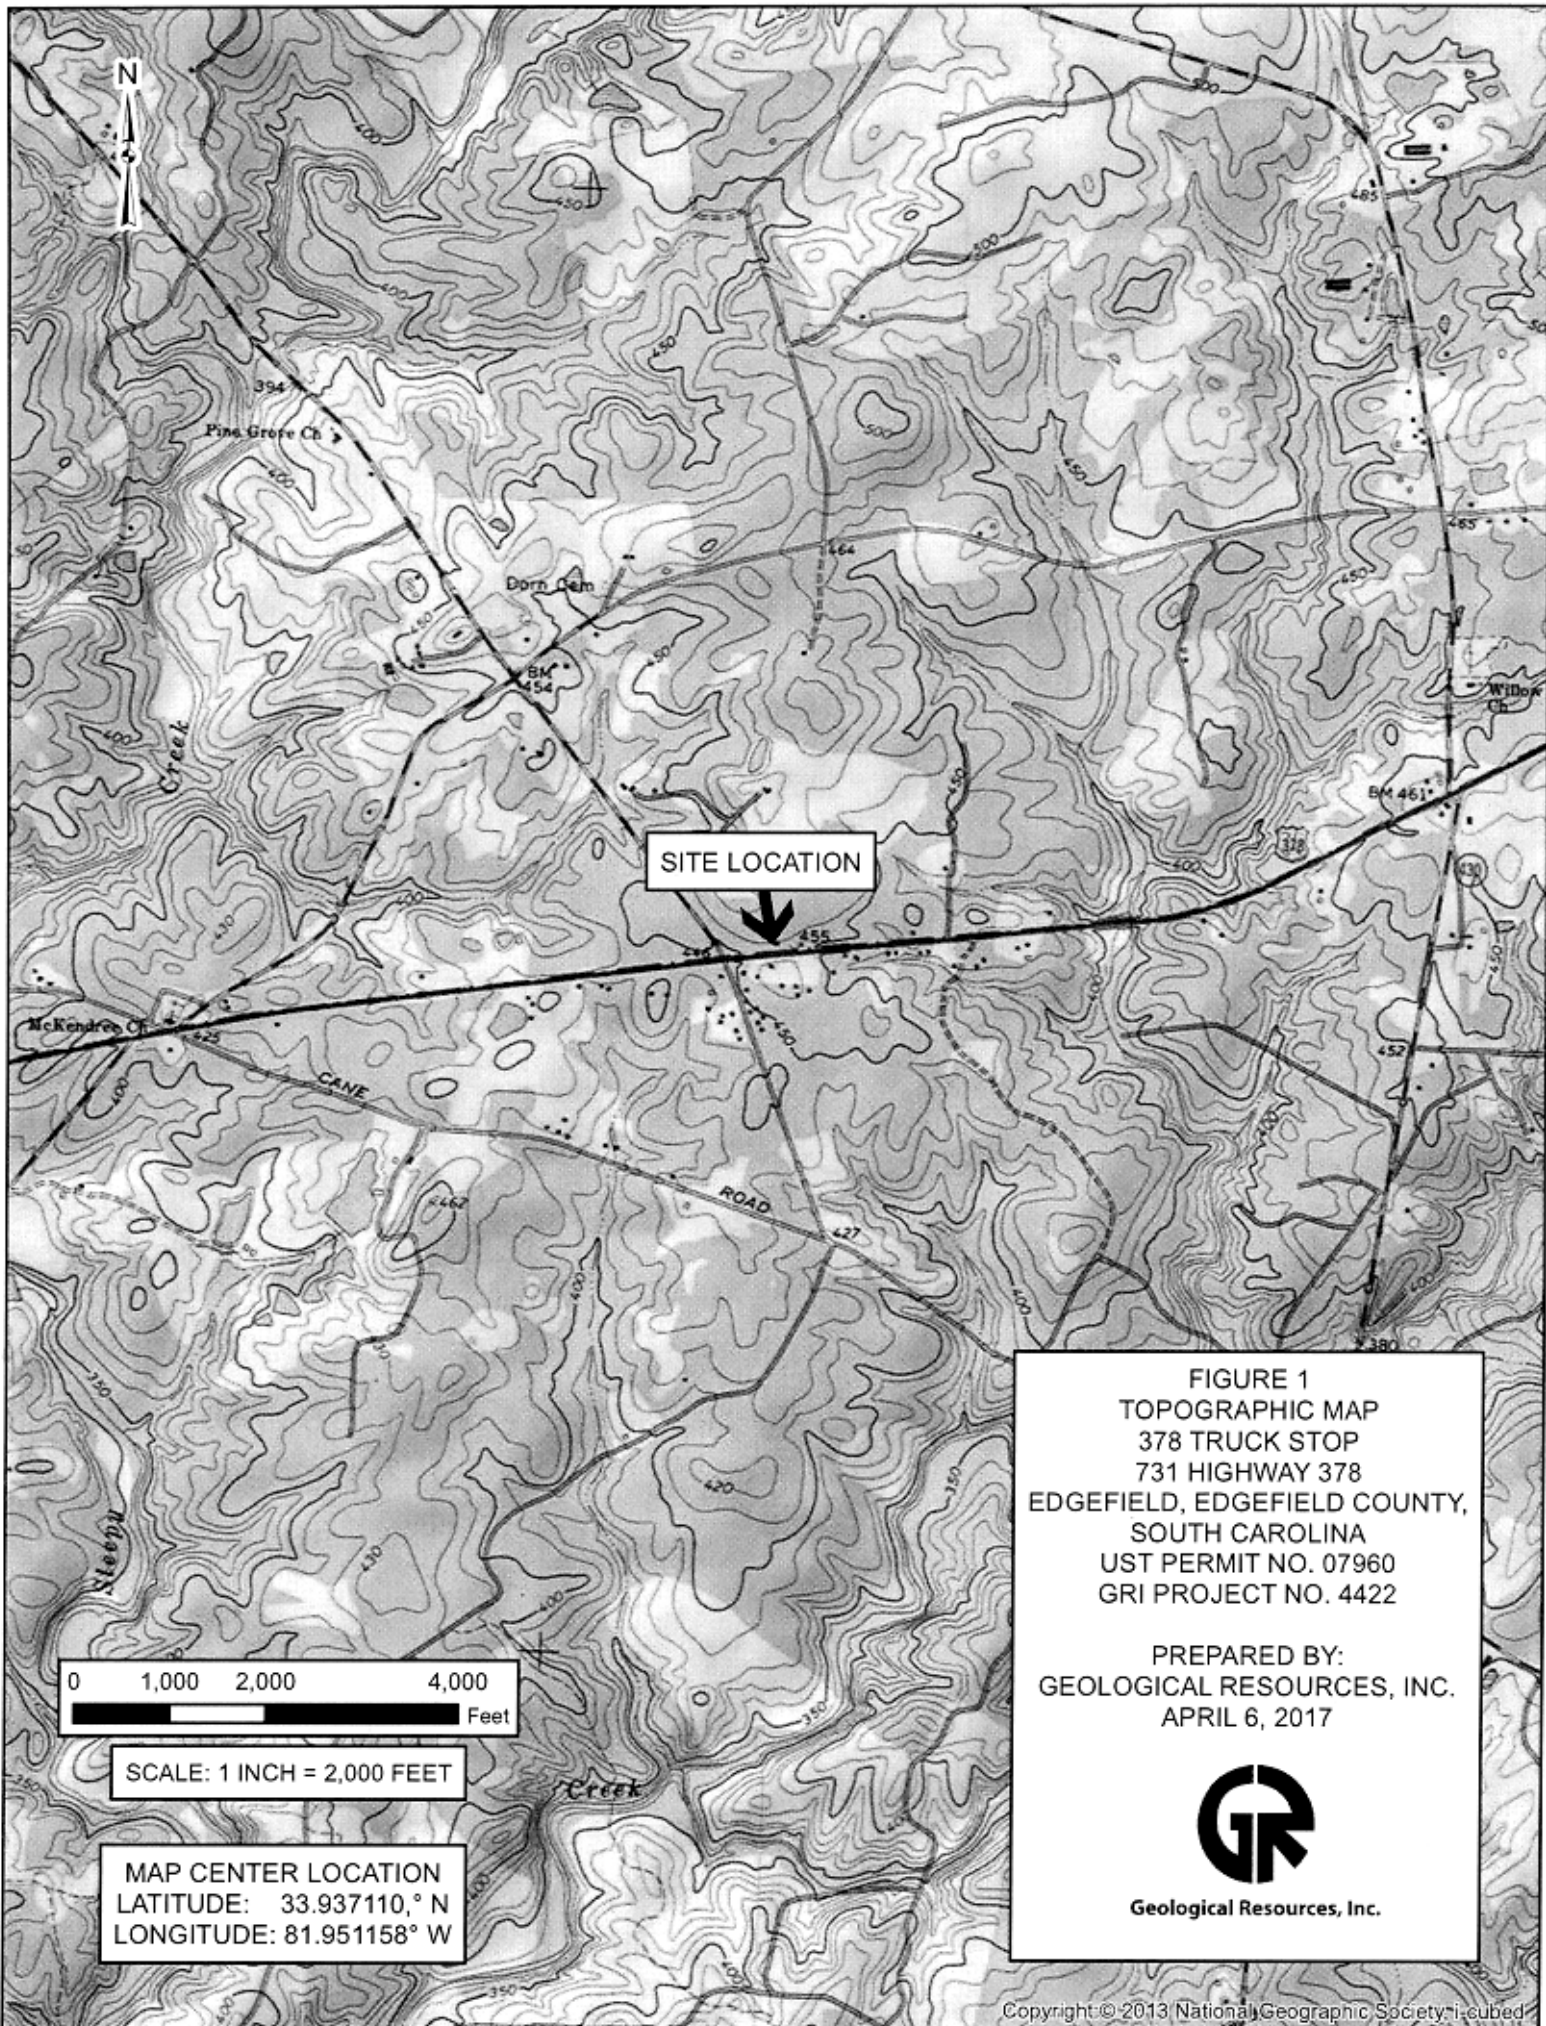

NA Other variations from ACQAP. Please describe below.

**Attachments**

1. Attach a copy of the relevant portion of the USGS topographic map showing the site location.
2. Prepare a site base map. This map must be accurately scaled, but does not need to be surveyed. The map must include the following:

|                                    |   |
|------------------------------------|---|
| North Arrow                        | Proposed monitoring well locations                                      |
| Location of property lines         | Legend with facility name and address, UST permit number, and bar scale |
| Location of buildings              | Streets or highways (indicate names and numbers)                        |
| Previous soil sampling locations   | Location of all present and former ASTs and USTs                        |
| Previous monitoring well locations | Location of all potential receptors                                     |
| Proposed soil boring locations     |   |

Re: Granular Activated Carbon Units Maintenance  
378 Truck Stop  
731 Highway 378  
Edgefield, Edgefield County, SC  
UST Permit No. 07960  
GRI Project No. 4422

Dear Mr. Patterson:

This letter is in response to our Thursday June 21, 2018 telephone conversation concerning the maintenance and upkeep of several granular activated carbon (GAC) units currently being used on water supply wells in the area of the above referenced site.

Geological Resources, Inc. (GRI) is the designated contractor of choice for the Wilkerson Fuel Company, which is the responsible party for the release at the subject site. As such, GRI has and wishes to continue conducting continued assessment and remediation activities associated with the release at this site. These activities would include the continued sampling of the water supply wells in the area. However, GRI does not wish to partake in the installation and/or maintenance of the GAC units in service at some of the water supply wells in the area of the subject site. It is our understanding that a SCDHEC State Lead contractor can maintain the GAC units in question. Based on this, GRI requests that any and all GAC installation and/or maintenance activities required by SCDHEC be conducted by the appropriate State Lead contractor.

Please contact me at (704) 845-4010 or [wsb@geologicalresourcesinc.com](mailto:wsb@geologicalresourcesinc.com) if you have any comments or questions regarding this matter.

Sincerely,

W. Scott Ball  
Project Manager

Mr. Frank Wilkerson  
Owner – Wilkerson Fuel Company

# State Lead Option Permission Form for Site Rehabilitation

**Only complete this form if:** You are the legal owner of the existing or former underground storage tanks, **OR** are the legal owner's designated authorized representative.

I certify that I am the legal owner of the existing or former underground storage tanks located identified below and for the release reported the date listed below or serve as the authorized representative for the UST owner. I grant permission to the South Carolina Department of Health and Environmental Control (DHEC) to secure on my behalf services of a contractor to install and maintain a Granular Carbon (GAC) Unit, as required. The contractor will be designated as my contractor only for the specified environmental site rehabilitation activities. Compensation to the contractor will be from the SUPERB Account, and I will have no obligation to pay the contractor. I understand that DHEC or its contractor will be responsible for obtaining right-of-entry from the property owner and notifying me of all activities that are necessary prior to their initiation and will promptly provide to me a copy of each environmental report.

Re: State Lead Permission Form  
378 Truck Stop, 731 Hwy 378, Edgefield  
UST Permit #07960  
Release reported October 3, 1974  
State Lead Permission Form received August 21, 2018  
Edgefield County

Dear Mr. Wilkerson:

The UST Management Division of the South Carolina Department of Health & Environmental Control (DHEC) is in receipt of a State Lead Permission Form signed by W. Scott Ball.

The release from the three former USTs was reported to DHEC on October 3, 1974 and Wilkerson Fuel Co Inc. was the tank owner at the time. According to our records, W. Scott Ball is an employee of Geological Resources Inc. The UST Management Division is unable to accept the signed State Lead Permission Form sheet at this time. As the tanks were registered in the name of Wilkerson Fuel Co Inc., an authorized representative for Wilkerson Fuel Co Inc. must sign the form. Please complete and return the form to my attention within **15 days from the date of this correspondence.**

On all correspondence concerning this site, please reference UST permit #07960. If you have any questions, please contact me at (803) 898-0643, by fax at (803) 898-0673, or e-mail me at [thomadl@dhec.sc.gov](mailto:thomadl@dhec.sc.gov).

Sincerely,

Debra L. Thoma, Manager  
Corrective Action & Quality Assurance  
UST Management Division  
Bureau of Land & Waste Management

# State Lead Option Permission Form for Site Rehabilitation

**Only complete this form if:** You are the legal owner of the existing or former underground storage tanks, **OR** are the legal owner's designated authorized representative.

I certify that I am the legal owner of the existing or former underground storage tanks located identified below and for the release reported the date listed below or serve as the authorized representative for the UST owner. I grant permission to the South Carolina Department of Health and Environmental Control (DHEC) to secure on my behalf services of a contractor to install and maintain a Granulated Activated Carbon (GAC) unit, as required. The contractor will be designated as my contractor for only the specified environmental site rehabilitation activities. I understand that DHEC or its contractor will be responsible for obtaining right-of-entry from the property owner and notifying me of all activities that are necessary prior to their initiation and will promptly provide to me a copy of each environmental report.

UST Permit # 07960 Release Report Date: 10/3/1974

Facility Name: 378 Truck Stop

Facility Address: 731 Highway 378, Edgefield, SC

Facility Phone Number: No Service

Is facility within city limits? (circle yes/no) Yes No

Name of nearest intersecting street/road/highway: Faulkner Mountain Rd

Does public water/sewer utility service this facility? Yes No

\*If no, please provide a contact name/number that can assist in the location of private water and septic tank lines:

Name: Phone Number:

Were USTs previously removed from the ground at this facility? Yes No

\*If yes, please provide the name/contact number of a person that can assist in the location of the former UST(s):

Name: Scott Ball Phone Number: (704) 845-4010

Is the facility currently leased to someone? Yes No

\*If yes, notify them of the pending work scope, and please provide their name/contact number:

Name: Phone Number:

**\*Please note that if vehicles or other mobile structures are parked over the location of the existing or former USTs, they should be moved prior to DHEC's contractor mobilizes to the facility.**

HATTIE SCURRY  
730 HWY 378 EAST  
EDGEFIELD, SC 29824

Re: Recent Laboratory Results for Your Supply Well  
378 Truck Stop, 731 Hwy 378 East, Edgefield, SC  
UST Permit # 07960  
Groundwater Laboratory Analysis received November 8, 2010  
Edgefield County

Dear Ms. Scurry:

As you are aware, Environmental Compliance Services, Inc. (ECS) is conducting an environmental assessment at the referenced facility. As a part of that assessment your potable well was sampled and a low level of 1,2 dichloroethane (1,2-DCA) was detected. The Underground Storage Tank (UST) Division, in order to verify the results, sampled your potable well on November 4, 2010. The laboratory results confirm the sample collected from your potable well had a low level detection of 1,2-DCA at 2.6 ug/L, which is below its risk-based screening level (RBSL) of 5 ug/L. There was also a very low detection of tert-Butyl Alcohol (tBA) in the water. This detection was below its action level or RBSL. The RBSL for tBA is 1,400 ug/L. I have attached the analytical report (your well is depicted as WSW-1) and the fact sheet for 1,2-DCA, which was taken from the U.S. Department of Health and Human Services, Public Health Service Agency for Toxic Substances and Disease Registry. There were no fact sheets available for tBA. I spoke with you on the phone today, and stated to you that your drinking water is safe to drink and bathe in at this point; however, as a precautionary measure, the UST Division will direct the installation of a granular activated carbon (GAC) Unit on your well. I have directed ECS to install a GAC Unit on your well next week and to sample the water before and after it goes through the GAC Unit. You relayed to me on the phone that you have been drinking bottled water out of concern, please save your receipts and we will reimburse you for the cost of purchasing the water.

In order to further define the extent of petroleum chemicals of concern (CoC), the UST Division is currently directing ECS to install several additional monitoring wells. Your potable well will continue to be sampled periodically in order to ensure that the GAC Unit is working successfully. As with previous assessment activities, you will not be responsible for any costs associated with rehabilitation activities, and you will be provided a copy of the report of findings.

Your continued cooperation is appreciated. On all correspondence regarding this site, please reference UST permit number 07960. Please feel free to contact me at (803) 896-6633, if you have questions or need additional information.

Sincerely,

Cathleen Ridgley, Hydrogeologist

UST Permit # 07960  
Groundwater Laboratory Analysis received November 8, 2010  
Edgefield County

Dear Mr. Padgett:

As you are aware, Environmental Compliance Services, Inc. (ECS) is conducting an environmental assessment at the referenced facility. As a part of that assessment your potable well was sampled and a low estimated level of Methyl-tert-butyl ether (MtBE) was detected. The Underground Storage Tank (UST) Division, in order to verify the results, sampled your potable well on November 4, 2010. The laboratory results confirm the sample collected from your potable well had a low level estimated detection of MtBE at 0.32 ug/L, which is well below its risk-based screening level (RBSL) of 40 ug/L. I have attached the analytical report (your well is depicted as WSW-13) and the fact sheet for MtBE, which was taken from the U.S. Department of Health and Human Services, Public Health Service Agency for Toxic Substances and Disease Registry. I called you on the phone today to let you know that your drinking water is safe to drink and bathe in; however, no one answered and there was no answering machine on which to leave a message.

In order to further define the extent of petroleum chemicals of concern (CoC), the UST Division is currently directing ECS to install several additional monitoring wells. Your potable well will continue to be sampled periodically in order to monitor petroleum CoC. As with previous assessment activities, you will not be responsible for any costs associated with rehabilitation activities, and you will be provided a copy of the report of findings.

Your continued cooperation is appreciated. On all correspondence regarding this site, please reference UST permit number 07960. Please feel free to contact me at (803) 896-6633, if you have questions or need additional information.

Sincerely,

Dear Ms. Bryant:

As you are aware, Environmental Compliance Services, Inc. (ECS) is conducting an environmental assessment at the referenced facility. As a part of that assessment your potable well was sampled and a low estimated level of Methyl-tert-butyl ether (MtBE) was detected. The Underground Storage Tank (UST) Division, in order to verify the results, sampled your potable well on November 4, 2010. The laboratory results confirm the sample collected from your potable well had a low level detection of MtBE at 1.3 ug/L, which is well below its risk-based screening level (RBSL) of 40 ug/L. I have attached the analytical report (your well is depicted as WSW-14) and the fact sheet for MtBE, which was taken from the U.S. Department of Health and Human Services, Public Health Service Agency for Toxic Substances and Disease Registry. I called you on the phone today and left a message on your answering machine to let you know that your drinking water is safe to drink and bathe in.

In order to further define the extent of petroleum chemicals of concern (CoC), the UST Division is currently directing ECS to install several additional monitoring wells. Your potable well will continue to be sampled periodically in order to monitor petroleum CoC. As with previous assessment activities, you will not be responsible for any costs associated with rehabilitation activities, and you will be provided a copy of the report of findings.

**Re: Site Specific Work Plan Request for GAC Change and Groundwater Sample Collection**

378 Truck Stop, 731 Hwy 378, Edgefield, SC 29824  
UST Permit #07960  
Release reported October 3, 1974  
GAC Change and Sampling Report received July 7, 2018  
Edgefield County

Dear Mr. Lowder:

The Underground Storage Tank (UST) Division of the South Carolina Department of Health and Environmental Control (DHEC) has reviewed the referenced report. The report indicates the presence of chemicals of concern (CoCs) in the groundwater.

To ensure a clean source of drinking water, in accordance with Section 280.65 of the South Carolina Underground Storage Tank Control Regulations, implementation of a Granular Activated Carbon (GAC) Unit sampling and filter change event as outlined in the current revision of the UST Quality Assurance Program Plan (QAPP) is necessary. This scope of work should be conducted on the Scurry Hattie et. al. water supply well located at 730 Hwy 378 E and the Gordon Sidney water supply well located at 724 Hwy 378 E, in accordance with the UST QAPP and in compliance with all applicable regulations. Pre-and post- GAC samples should be collected prior to the filter change and analyzed for BTEX, Mtbe, Naphthalene, 1,2-DCA, the Oxygenates, Ethanol, and EDB. Analyses should be in accordance with Appendix F of the QAPP to include duplicate samples, field and trip blanks. A copy of the DHEC QAPP for the UST Management Division is available at <http://www.scdhec.gov/Environment/LW/UST/ReleaseAssessmentClean-up/QualityAssurance>.

**Please complete and submit the Site-Specific Work Plan and Cost Proposal to the UST Division within fifteen (15) days of the date of this letter.** Every component may not be necessary to complete the above scope of work. The State Underground Petroleum Environmental Response Bank (SUPERB) Account allowable cost for each component is included on the Assessment Component Cost Agreement Form. Please note that technical and financial pre-approval from DHEC must be issued before work begins.

On all correspondence regarding this site, please reference UST Permit #07960. If you have questions or need additional information, feel free to contact me by telephone at (803) 898-7705, by fax at (803) 898-0673, or by e-mail to wykelijm@dhec.sc.gov.

Sincerely,

A handwritten signature in black ink that reads "Matt Wykel". The signature is written in a cursive, slightly slanted style.

Re: **Monitoring Well Installation SSWP Approval and Notice to Proceed**  
378 Truck Stop, 731 Hwy 378, Edgefield, SC  
UST Permit # 07960; CA # 57384; MWA #UMW-27273  
Release Reported October 3, 1974  
Site-Specific Work Plan and cost proposal received August 21, 2018  
Edgefield County

Dear Mr. Wilkerson:

The Underground Storage Tank (UST) Management Division of the South Carolina Department of Health and Environmental Control (DHEC) has reviewed and approved the referenced Site-Specific Work Plan (SSWP) submitted by Geological Resources, Inc. All work should be conducted in accordance with the most recent revision of the UST Quality Assurance Program Plan (QAPP), Geological Resources' approved SSWP and Annual Contractor Quality Assurance Plan (ACQAP), and in compliance with all applicable regulations. A copy of the current revision of the UST QAPP is available at <http://www.scdhec.gov/Environment/LW/UST/ReleaseAssessmentClean-up/QualityAssurance/>

The assessment should begin immediately upon receipt of this letter. A monitoring well approval has been enclosed for the monitoring well installation. Cost agreement # 57384 has been approved for the amount shown on the enclosed cost agreement form.

**The Contractor must provide the UST Project Manager with a Project Status Report on a weekly basis via e-mail or notify the UST Project Manager via email 4 days prior to initiation of any site rehabilitation activities. If there are any changes or conflicts with the date(s) of site activities, the UST Project Manager must be contacted within 24 hours of those changes.**

**The Assessment report, contractor checklist (QAPP Appendix K), and invoice should be submitted to the Division within ninety (90) days of the date of this correspondence.** The report submitted at the completion of these activities should include the required information outlined in the UST QAPP.

Geological Resources can submit an invoice for direct payment from the State Underground Petroleum Environmental Response Bank (SUPERB) Account for pre-approved costs. By law, the SUPERB Account cannot compensate any costs that are not pre-approved. If the invoice is not submitted within 120 days from the date of this letter, monies allocated to pay this invoice will be uncommitted. This means that the invoice will not be processed for payment until all other committed funds are paid or monies become available.

Mr. Wilkerson

Page 2

Please note that Sections 44-2-110(4) and 44-2-130 of the SUPERB Statute state that no costs will be allowed unless prior approval from the Division is obtained. If for any reason additional tasks will be completed, these additional tasks and the associated cost must be pre-approved by the Division for the cost to be paid. The Division reserves the authority to pay only for work properly performed and/or technically justified and will only pay rates in accordance with established criteria. Further, the Division reserves the right to question and/or reject costs if deemed unreasonable and the right to audit project records at any time during the project or after completion of work.

Please note that applicable South Carolina certification requirements regarding laboratory services, well installation, and report preparation must be satisfied. Any site rehabilitation activity associated with the UST release must be performed by a DHEC-certified site rehabilitation contractor as required by R.61-98.

The Division grants pre-approval for transportation of virgin petroleum impacted soil and groundwater from the referenced site to a permitted treatment facility. There can be no spillage or leakage in transport. All investigation-derived waste (IDW) must be properly contained and labeled prior to disposal. IDW should not be stored on-site longer than ninety (90) days. A copy of the disposal manifest and/or acceptance letter from the receiving facility that clearly designates the quantity received must be included as an appendix to the report. If the Chemical of Concern (CoC) concentrations based on laboratory analysis is below Risk-Based Screening Levels (RBSLs), please contact the project manager for approval to dispose of soil and/or groundwater on-site. The SUPERB Account will not reimburse for transportation or treatment of soil and/or groundwater with concentrations below RBSLs.

On all correspondence regarding this site, please reference UST Permit #07960. Should you have any questions regarding this correspondence, please feel free to contact me at (803) 898-0599, fax me at (803) 898-0673, or e-mail me at [martinsr@dhec.sc.gov](mailto:martinsr@dhec.sc.gov).

Sincerely,

Steven Martin

## Monitoring Well Approval

**Approval is hereby granted to:** Geological Resources, Inc.  
**(on behalf of):** Wilkerson Fuel  
**Facility:** 378 Truck Stop, 731 Hwy 378, Edgefield, SC  
**UST Permit Number:** 07960  
**County:** Edgefield

This approval is for the installation of two deep groundwater monitoring wells. The monitoring wells are to be installed in the approved locations. Monitoring wells are to be installed following the South Carolina Well Standards, R.61-71, and the applicable guidance documents.

**Please note that R.61-71 requires the following:**

1. All wells shall be drilled, constructed, and abandoned by a South Carolina certified well driller per R.61-71.D.1.
2. All monitoring wells shall be labeled as required by R.61-71.H.2.c.
3. A Water Well Record Form or other form provided or approved by the Division shall be completed and submitted to the Division within 30 days after well completion or abandonment unless another schedule has been approved by the Division. The form should contain the "as-built" construction details and all other information required by R.61-71.H.1.f
4. All analytical data and water levels obtained from each monitoring well shall be submitted to the Division within 30 days of receipt of laboratory results unless another schedule has been approved by the Division as required by R.61-71.H.1.d.
5. If any of the information provided to the Division changes, notification to Steven Martin the project manager (tel: (803) 898-0599 or e-mail: martinsr@scdhec.sc.gov) shall be provided a minimum of twenty-four (24) hours prior to well construction as required by R.61-71.H.1.a.
6. All temporary monitoring wells shall be abandoned within 5 days of borehole completion using appropriate methods as required by R.61-71.H.4.c. All other wells shall be properly developed per R.61-71.H.2.d.
7. Division approval is required prior to abandonment of all monitoring wells as required by R.61-71.H.1.a.

This approval is pursuant to the provisions of Section 44-55-40 of the 1976 South Carolina Code of Laws and R.61-71 of the South Carolina Well Standards and Regulations, dated May 27, 2016. A copy of this approval should be on the site during well installation.

**Date of Issuance: November 11, 2018**

**Approval #: UMW-27273**

SCDHEC Site ID #07960

Mr. Wykel,

Please find the attached Site Specific Work Plan, proposed costs and example chain of custody for Granular Activated Carbon (GAC) filter change and sampling. These GACs are associated with the Scurry residence located at 730 Highway 378 East and Gordon residence located at 724 Highway 378 East in Edgefield, SC. If you have any questions or concerns please feel free to contact Emerald, Inc. at 803-469-5454.

Sincerely,

A handwritten signature in black ink, appearing to read "William C. McClary".

William C. McClary, P.G.  
Project Manager

**Additional Details For This Scope of Work**

For example, list wells to be sampled, wells to be abandoned/repared, well pads/bolts/caps to replace, details of AFVR event, etc.

The subject site (378 Truck Stop) is located at 731 Highway 378 outside Edgefield, SC. Two nearby water supply wells (Scurry and Gordon) have been impacted by petroleum contamination. Each water supply well (WSW) has been attached to granular activated carbon (GAC) filters to aid in removal of petroleum contaminants. Prior to conducting a carbon change, Emerald, Inc. will collect samples from the Scurry and Gordon WSWs before filtering (Pre GAC) and after passing through the filter (Post GAC). The duplicate sample will be collected from the Scurry Pre-GAC sampling port. This work will be conducted under Solicitation IFB-5400011271-4/28/16-EMW and PO #4600491068. The samples will be collected after opening the spigot for approximately 10 minutes or until the well pump turns on. Samples will be collected by allowing the well water to pour directly into laboratory supplied sampling containers.

**Compliance With Annual Contractor Quality Assurance Plan (ACQAP)**

\_\_\_\_ Laboratory as indicated in ACQAP? (Yes/No) If no, indicate laboratory information below.  
Name of Laboratory: \_\_\_\_\_

**Attachments**

1. Attach a copy of the relevant portion of the USGS topographic map showing the site location.
2. Prepare a site base map. This map must be accurately scaled, but does not need to be surveyed. The map must include the following:  
North Arrow Proposed monitoring well locations  
Location of property lines Legend with facility name and address, UST permit number, and bar scale  
Location of buildings Streets or highways (indicate names and numbers)  
Previous soil sampling locations Location of all present and former ASTs and USTs  
Previous monitoring well locations Location of all potential receptors  
Proposed soil boring locations

**Re: Notice to Proceed-GAC Change and Groundwater Sample Collection**

UST Permit #07960; Emerald CA#58656 ;Pace CA #58657  
FB-5400011271-4/28/16-EMW; PO #4600603935  
Site-Specific Work Plan received December 6, 2018  
Edgefield County

Dear Mr. Lowder:

Under the terms and conditions of the referenced contract, collection of pre- and post- GAC unit groundwater samples has been approved for the Scurry residence located at 730 Hwy 378 East and Gordon residence located at 824 Highway 378 East. The pre- and post- GAC unit groundwater samples should be collected and submitted to Pace Analytical Services for analysis.

This facility has been assigned individual Cost Agreement (CA) numbers as listed above. Please reference the CA #58656 and PO #4600603935 on the invoice submitted for payment. Emerald, Inc. should complete the work in accordance with the contract specifications and established schedule. The work must be conducted as outlined in the UST Quality Assurance Program Plan (QAPP) and in compliance with all applicable regulation. A GAC Unit Installation and Maintenance record should be submitted within **thirty (30) days** from the date of Notice to Proceed.

On all correspondence or inquiries regarding this directive, please reference UST Permit #07960, CA #58656, and CA #58657. If you have any questions or need further assistance, please contact me at (803) 898-7705 or by email at [wykeljm@dhec.sc.gov](mailto:wykeljm@dhec.sc.gov).

Sincerely,

A handwritten signature in cursive that reads "Matt Wykel".

## Instructions for completing Chain of Custody (COC)

1. Complete all client information at the top left of the sheet: Company name, address, phone/fax, contact (the person to contact if there are questions, and who will receive the final report), e-mail address (if available), PO#, Project Name and/or Project Number as you would like it to appear on the report.
2. Billing Information: name and address of the person who is receiving the invoice
3. Site Collection Information: A separate COC must be filled out for each day of sample collection. Record the 2 letter postal code for the US state where samples were collected as well as the county/city and time zone.
4. Regulatory Agency: List the program that is guiding the work to ensure proper regulations are followed in the customer remarks section.
5. Quote #: should be completed if a quote was provided by Pace Analytical.
6. Mark if the sample was filtered in the in the field by marking Y or N in the "Field Filtered" box.
7. The sampler should print and sign their name in the spaces provided.
8. Complete a sample description in the CUSTOMER SAMPLE ID section as you would like it to appear on the laboratory report. Include: sample matrix, sample type (G (grab) or C (composite)). When collecting a composite, the start time and end time should be documented in the respective boxes. Also record the sample temp at collection (if required by state), the total number of containers, and preservative used.
9. Requested Analysis: List required analysis and methods on the lines provided and place a check mark in the column for the samples requiring the analysis. Additional comments should be referenced in the Customer Remarks section or included in attachments for extended lists of parameters.
10. Relinquishing custody of the samples: sign relinquished by, date and time, and include you affiliation.

**\*Important Note:**

**Standard Turnaround Time is 2 Weeks/10 business days.** Results will be delivered by end of business on the date due unless other arrangements have been made with your project manager.

**Special Project Requirements** such as Low Level Detection or level of QC reported must be included on the chain of custody in the Customer Remarks box.

**\*If you have additional questions about how to complete the Chain of Custody (COC) please contact a Pace Project Manager\***

RE: Project: 378 TRUCK STOP 07960/57353  
Pace Project No.: 92414687

Dear Robert Dunn:

Enclosed are the analytical results for sample(s) received by the laboratory on January 19, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Trey Carter

## QUALIFIERS

Project 378 TRUCK STOP 07960/57353  
Pace Project No 92414687

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot  
ND - Not Detected at or above adjusted reporting limit  
TNTC - Too Numerous To Count  
J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit  
MDL - Adjusted Method Detection Limit  
PQL - Practical Quantitation Limit  
RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix  
S - Surrogate  
1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270 The result for each analyte is a combined concentration  
Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.  
LCS(D) - Laboratory Control Sample (Duplicate)  
MS(D) - Matrix Spike (Duplicate)  
DUP - Sample Duplicate  
RPD - Relative Percent Difference  
NC - Not Calculable  
SG - Silica Gel - Clean-Up  
U - Indicates the compound was analyzed for, but not detected  
Acid preservation may not be appropriate for 2 Chloroethylvinyl ether  
A separate vial preserved to a pH of 4-5 is recommended in SW846 Chapter 4 for the analysis of Acrolein and Acrylonitrile by EPA Method 8260  
N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270 The result reported for each analyte is a combined concentration  
Pace Analytical is TNI accredited Contact your Pace PM for the current list of accredited analytes  
TNI - The NELAC Institute

### LABORATORIES

PASI-C Pace Analytical Services - Charlotte  
PASI-O Pace Analytical Services - Ormond Beach

### ANALYTE QUALIFIERS

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery  
P4 Sample field preservation does not meet EPA or method recommendations for this analysis  
P5 The EPA or method required sample preservation degrades this compound, therefore acceptable recoveries may not be achieved in sample matrix spikes

Site-Specific Work Plan for Approved ACQAP
Underground Storage Tank Management Division

To: Sharlen Nguyen (SCDHEC Project Manager)
From: Sharlen Nguyen (Contractor Project Manager)
Contractor: SC DHEC UST Program UST Contractor Certification Number: UCC-0116

Facility Name: Former 378 Truck Stop UST Permit #: 07960
Facility Address: 731 Hwy 378, Edgefield, SC 29824
Responsible Party: Wilerson Fuel Co Inc Phone: 803-324-4080
RP Address: PO Box 2835 Rock Hill, SC 29732
Property Owner (if different): Gail & Barbara Whitmir
Property Owner Address: 1226 Hwy 378 E, Edgefield, SC, 29824
Current Use of Property:

Scope of Work (Please check all that apply)

- IGWA, Tier I, Tier II, Monitoring Well Installation, Groundwater Sampling, GAC, Other Confirmation Sampling

Analyses (Please check all that apply)

- Groundwater/Surface Water: BTEXNMDCA, Oxygenates, EDB, PAH, Lead, 8 RCRA Metals, TPH, pH, BOD, Nitrate, Sulfate, Other, Methane, Ethanol, Dissolved Iron
Drinking Water Supply Wells: BTEXNMDCA, Oxygenates & Ethanol, Mercury, RCRA Metals, EDB
Soil: BTEXNM, PAH, Lead, RCRA Metals, Oil & Grease, TPH-DRO, TPH-GRO, Grain Size, TOC
Air: BTEXN

Sample Collection (Estimate the number of samples of each matrix that are expected to be collected.)

Soil, Monitoring Wells, Water Supply Wells, Surface Water, Air, Duplicate, Field Blank, Trip Blank

Field Screening Methodology

Estimate number and total completed depth for each point, and include their proposed locations on the attached map.
# of shallow points proposed: Estimated Footage: feet per point
# of deep points proposed: Estimated Footage: feet per point
Field Screening Methodology:

Permanent Monitoring Wells

Estimate number and total completed depth for each well, and include their proposed locations on the attached map.
# of shallow wells: Estimated Footage: feet per point
# of deep wells: Estimated Footage: feet per point
# of recovery wells: Estimated Footage: feet per point
Comments, if warranted:

Re: Laboratory Analyses Approval  
(Analytical) Bid #IFB-5400012961-04/06/17-EMW; PO #4600683759

Dear Ms. Baioni:

Under the terms and conditions of the referenced bid package, analytical sampling has been approved for the referenced facility. The facility has been assigned an individual Cost Agreement (CA) number listed below. Please reference the CA number and Purchase Order number on the appropriate invoice submitted for payment against the facility.

| UST # | FACILITY NAME         | # of Samples<br>(ANALYSES-<br>GROUNDWATER) | # OF WSW Samples<br>(ANALYSES-POTABLE<br>WATER) | CA #  |
|-------|-----------------------|--|---|-------|
| 03026 | Infingers Amoco       |  | 3 (524.2,8260)                                  | 59097 |
| 07960 | Former 378 Truck Stop |  | 2(524.2,8260,504.1)                             | 59104 |
|       |                       |  |   |       |

If you have any questions or need further assistance, please contact Robert A. Dunn by phone (803) 898-0671 or email [dunnra@dhec.sc.gov](mailto:dunnra@dhec.sc.gov).

Sincerely,

Sharlen Nguyen, Hydrogeologist

\*Important Note: By signing this form you are accepting Pace's NET 30 day payment terms and agreeing to late charges of 1.5% per month for any invoices not paid within 30 days. F-ALL-Q-020rev.07, 15-May-2007

### Instructions for completing Chain of Custody (COC)

1. **Section A and B:** Complete all Client information at top of sheet: company name, address, phone, fax, contact (the person to contact if there are questions, and who will receive the final report.), e-mail address (if available), PO#, Project Name and/or Project Number as you would like to see it appear on the report.
2. **Section C:** Invoice Information: Billing information is included in this section. This information should include the name and address of the person receiving the invoice.
3. Quote Reference should be completed if a quotation was provided by Pace Analytical. The Project Manager, and Profile No. will be completed by Pace Analytical Services.
4. **Site Location:** A separate COC must be filled out for each day of sample collection. Record the two letter postal code for the US state in which the samples were collected.
5. **Regulatory Agency:** List the program that is guiding the work to ensure proper regulations are followed.
6. **Section D:** Complete a Sample Description in the "SAMPLE ID" section as you would like it to appear on the laboratory report. The following information should also be included: the sample matrix, sample type (G (grab) or C (composite)). When collecting a composite, the start time and end time should be documented in the respective boxes. The collection time for a grab (G) sample should be entered in the boxes marked 'Composite End/Grab', Sample temp at collection (if required by state), the total number of containers, and preservative used.
7. Mark if the sample was filtered in the field by marking Y or N in 'Filtered' row by the Analysis requested.
8. Requested Analysis: List the required analysis and methods on the lines provided and place a check in the column for the samples requiring the analysis. Additional comments should be referenced in the bottom left hand corner or include attachments for extended lists of parameters.
9. The sampler should print their name in the space provided and sign their name followed by the date of the sampling event at the bottom of the COC in the spaces designated for 'SAMPLER NAME AND SIGNATURE'.
10. When relinquishing custody of the samples to a representative of the laboratory or other organization, indicate the Item Numbers of those samples being transferred; sign relinquished by, date and time, and include your affiliation.

**\*Important Note:**

**Standard Turnaround Time is 2 Weeks/10 business days.** Results will be delivered by end of business on the date due unless other arrangements have been made with your project manager.

**Special Project Requirements** such as Low Level Detection Limits or level of QC reported must be included on the chain of custody in the Additional Comments section.

Healthy People. Healthy Communities.

Dear Mr. Lowder:

Under the terms and conditions of the referenced contract, a GAC unit maintenance has been approved for the Scurry residence located at 703 Hwy 378 East, Edgefield, SC 29824. The contact person for this facility is Ms. Scurry. This facility has been assigned an individual Cost Agreement (CA) number as listed above. Please reference the CA #59251 and PO #4600603935 on the invoice submitted for payment. Emerald Inc. should complete the work in accordance with the contract specifications. The work must be conducted as outlined in the UST Quality Assurance Program Plan (QAPP) and in accordance with all applicable regulations. A GAC Unit Installation and Maintenance record should be submitted within **ten (10) days** from the date of the Notice to Proceed.

If you have any questions or need further assistance, please contact me at (803) 898-2831 or by email at [nguyens@dhec.sc.gov](mailto:nguyens@dhec.sc.gov).

Sincerely,

A handwritten signature in cursive script, appearing to read "S. Nguyen".

RE: Project: Fmr 378 Truck Stop 07960/59104  
Pace Project No.: 92420247

Dear Robert Dunn:

Enclosed are the analytical results for sample(s) received by the laboratory on March 06, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

*Angela M. Baioni*

## QUALIFIERS

Project: Fmr 378 Truck Stop 07960/59104

Pace Project No.: 92420247

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

Acid preservation may not be appropriate for 2 Chloroethylvinyl ether

A separate vial preserved to a pH of 4-5 is recommended in SW846 Chapter 4 for the analysis of Acrolein and Acrylonitrile by EPA Method 8260.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute

### LABORATORIES

PASI-C Pace Analytical Services - Charlotte

PASI-O Pace Analytical Services - Ormond Beach

### ANALYTE QUALIFIERS

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery

P5 The EPA or method required sample preservation degrades this compound, therefore acceptable recoveries may not be achieved in sample matrix spikes

Re: WSW-8 GAC Installation  
378 Truck Stop  
731 Highway 378  
Edgefield, South Carolina 29824  
Edgefield County

Dear Ms. Ridgley:

Environmental Compliance Services, Inc. (ECS), on behalf of Wilkerson Fuel Company, Inc., visited Mr. Sidney Gordon's residence, located at 724 Highway 378, Edgefield, SC, on November 12, 2010 to install a Granular Activated Carbon (GAC) unit on private water supply well WSW-8 (**Figure 1** and **Figure 2**). This work was conducted in response to a South Carolina Department of Health and Environmental Control (SCDHEC) directive dated November 12, 2010. The directive required a GAC unit be installed on WSW-8 due to elevated concentrations of contaminants of concern reported in groundwater samples collected by ECS from the water supply well on October 19, 2010. The analytical results obtained by ECS were verified with a sampling conducted by SCDHEC on November 4, 2010. The laboratory report from the verification sampling event conducted by SCDHEC has been included as **Appendix A**. The laboratory report from the initial sampling will be included with the Tier II report, which will also include groundwater sampling results from site monitoring wells.

Upon arrival to the residence on November 12, 2010, ECS personnel discussed the planned activities with the property owner, Mr. Sidney Gordon. A 12 x 52 mesh GAC unit containing 90 lbs of acid-washed virgin carbon was installed on the private water supply well utilizing chlorinated polyvinyl chloride (CPVC) piping. Influent and effluent sample ports were installed on the piping in pre- and post-carbon locations for subsequent collection of groundwater samples. The GAC vessel was placed inside a wooden shed for protection from weathering from outdoor elements.

Prior to installation, the GAC was charged to relieve air from the unit and to prepare the carbon to receive water. Following installation, water was discharged from the supply well, through the GAC unit, and out the effluent until the water ran clear and no apparent air bubbles were present. After the GAC vessel was installed and water had been purged from the unit, groundwater samples were collected from the influent and effluent sample ports. The groundwater samples

Printed on recycled, carbon neutral paper

Page 2 of 2

were placed into an iced cooler and delivered to Pace Analytical Laboratories of Huntersville, NC for subsequent analysis of BTEX compounds (benzene, toluene, ethylbenzene, and xylenes), MTBE, naphthalene, 1,2 DCA, and oxygenates using EPA Method 8260B and EDB using EPA Method 8011. The laboratory report has been included as **Appendix B**.

A concentration of 1,2 DCA was reported above the Risk Based Screening Level (RBSL) in the pre-carbon water sample. A concentration of TAA was reported above the RBSL in the pre-carbon water sample. Concentrations of the requested method constituents were not reported above the laboratory reporting limits or method detection limits in the post-carbon water sample.

RE: Project: 378 TRUCK STOP 07960  
Pace Project No.: 9281530

Dear Ms. Thoma:

Enclosed are the analytical results for sample(s) received by the laboratory on November 05, 2010. The results relate only to the samples included in this report. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

Analyses were performed at the Pace Analytical Services location indicated on the sample analyte page for analysis unless otherwise footnoted.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Erin Waters for  
Renee Spencer

### QUALIFIERS

Project: 378 TRUCK STOP 07960  
Pace Project No.: 9281530

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.  
ND - Not Detected at or above adjusted reporting limit.  
J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.  
MDL - Adjusted Method Detection Limit  
S - Surrogate  
1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.  
Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.  
LCS(D) - Laboratory Control Sample (Duplicate)  
MS(D) - Matrix Spike (Duplicate)  
DUP - Sample Duplicate  
RPD - Relative Percent Difference  
NC - Not Calculable.  
U - Indicates the compound was analyzed for, but not detected.  
N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.  
Pace Analytical is NELAP accredited. Contact your Pace PM for the current list of accredited analytes.

### LABORATORIES

PASI-C Pace Analytical Services - Charlotte

### ANALYTE QUALIFIERS

P5 The EPA or method required sample preservation degrades this compound, therefore acceptable recoveries may not be achieved in sample matrix spikes.

RE: Project: 378 TRUCK STOP  
Pace Project No.: 9282135

Dear Ms. Dupuis:

Enclosed are the analytical results for sample(s) received by the laboratory on November 15, 2010. The results relate only to the samples included in this report. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

Analyses were performed at the Pace Analytical Services location indicated on the sample analyte page for analysis unless otherwise footnoted.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Kevin Herring

## QUALIFIERS

Project: 378 TRUCK STOP  
Pace Project No.: 9282135

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is NELAP accredited. Contact your Pace PM for the current list of accredited analytes.

### LABORATORIES

PASI-C Pace Analytical Services - Charlotte

### ANALYTE QUALIFIERS

L0 Analyte recovery in the laboratory control sample (LCS) was outside QC limits.

M0 Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

P5 The EPA or method required sample preservation degrades this compound, therefore acceptable recoveries may not be achieved in sample matrix spikes.

RONNY LOWDER  
EMERALD INC  
PO BOX 3050  
SUMTER SC 29151

Re: **Site Specific Work Plan Request for Multiple GAC Change and Groundwater Sample Collection**

378 Truck Stop, 731 Hwy 378, Edgefield, SC  
UST Permit #07960  
Release reported October 3, 1974  
Monitoring Report received October 16, 2017  
Edgefield County

Dear Mr. Lowder:

The Underground Storage Tank (UST) Division of the South Carolina Department of Health and Environmental Control (DHEC) has reviewed the referenced report. The report indicates the presence of chemicals of concern (CoCs) in the groundwater.

To ensure a clean source of drinking water, in accordance with Section 280.65 of the South Carolina Underground Storage Tank Control Regulations, implementation of a Granular Activated Carbon (GAC) Unit sampling and filter change event as outlined in the current revision of the UST Quality Assurance Program Plan (QAPP) is necessary. **Implementation of 6 filter changes and groundwater samplings should occur at 2-month intervals.** This scope of work should be conducted on the Scurry water supply well located at 730 Highway 378 East, and the Gordon water supply well located at 724 Highway 378 East in accordance with the UST QAPP and in compliance with all applicable regulations. Pre-and post- GAC samples should be collected prior to the filter change and analyzed for BTEX, Mtbe, Naphthalene, 1,2-DCA, the Oxygenates, Ethanol, and EDB. Analyses should be in accordance with Appendix F of the QAPP to include duplicate samples, field and trip blanks. A copy of the DHEC QAPP for the UST Management Division is available at <http://www.scdhec.gov/Environment/LW/UST/ReleaseAssessmentClean-up/QualityAssurance>.

**Please complete and submit the Site-Specific Work Plan and Cost Proposal to the UST Division within fifteen (15) days of the date of this letter.** Every component may not be necessary to complete the above scope of work. The State Underground Petroleum Environmental Response Bank (SUPERB) Account allowable cost for each component is included on the Assessment Component Cost Agreement Form. Please note that technical and financial pre-approval from DHEC must be issued before work begins.

On all correspondence regarding this site, please reference UST Permit #07960. If you have questions or need additional information, feel free to contact me by telephone at (803) 898-2831, by fax at (803) 898-0673, or by e-mail to nguyens@dhec.sc.gov.

Sincerely,

A handwritten signature in black ink, appearing to read 'S. Nguyen', with a long horizontal flourish extending to the right.

Site Specific Work Plan  
378 Truck Stop  
731 Highway 378  
Edgefield, South Carolina  
SCDHEC Site ID #07960

Ms. Nguyen,

Please find the attached Site Specific Work Plan, proposed costs and example chain of custody for one year of Granular Activated Carbon (GAC) filter changes and sampling. These GACs are associated with the Scurry residence located at 730 Highway 378 East and Gordon residence located at 724 Highway 378 East in Edgefield, SC. If you have any questions or concerns please feel free to contact Emerald, Inc. at 803-469-5454.

Sincerely,

William C. McClary, P.G.  
Project Manager

**Additional Details For This Scope of Work**  
For example, list wells to be sampled, wells to be abandoned/repared, well pads/bolts/caps to replace, details of AFVR event, etc.  
The subject site (378 Truck Stop) is located at 731 Highway 378 outside Edgefield, SC. Two nearby water supply wells (Scurry and Gordon) have been impacted by petroleum contamination. Each water supply well (WSW) has been attached to granular activated carbon (GAC) filters to aid in removal of petroleum contaminants. Prior to conducting a carbon change, Emerald, Inc. will collect samples from the Scurry and Gordon WSWs before filtering (Pre GAC) and after passing through the filter (Post GAC). The duplicate sample will be collected from the Scurry Pre-GAC sampling port.  
This work will be conducted under PO #4600702267.  
The samples will be collected after opening the spigot for approximately 10 minutes or until the well pump turns on.  
Samples will be collected by allowing the well water to pour directly into laboratory supplied sampling containers.

**Compliance With Annual Contractor Quality Assurance Plan (ACQAP)**  
Yes Laboratory as indicated in ACQAP? (Yes/No) If no, indicate laboratory information below.  
Name of Laboratory: \_\_\_\_\_

**Re: Notice to Proceed-GAC Change and Groundwater Sample Collection**  
378 Truck Stop, 731 Hwy 378, Edgefield, SC  
UST Permit #07960; Emerald CA #59930; Pace CA #59931  
IFB-5400017572-4/25/19-EMW; PO #4600702267  
Site-Specific Work Plan received June 24, 2019  
Edgefield County

Dear Mr. Lowder:

Under the terms and conditions of the referenced contract, collection of pre- and post- GAC unit groundwater samples has been approved for the Scurry residence located at 730 Highway 378 East and the Gordon residence located at 724 Highway 378 East. The pre- and post- GAC unit groundwater samples should be collected and submitted to Pace Analytical Services for analysis.

This facility has been assigned individual Cost Agreement (CA) numbers as listed above. Please reference the CA #59930 and PO #4600702267 on the invoice submitted for payment. Emerald, Inc. should complete the work in accordance with the contract specifications and established schedule. The work must be conducted as outlined in the UST Quality Assurance Program Plan (QAPP) and in compliance with all applicable regulation. A GAC Unit Installation and Maintenance record should be submitted within **fifteen (15) days** from the date of Notice to Proceed.

On all correspondence or inquiries regarding this directive, please reference UST Permit #07960, CA #59930, and CA #59931. If you have any questions or need further assistance, please contact me at (803) 898-2831 or by email at [nguyens@dhec.sc.gov](mailto:nguyens@dhec.sc.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "S. Nguyen".

## 1.0 INTRODUCTION

This report presents the results of soil assessment, monitoring well installation and comprehensive ground water sampling activities conducted in May and June 2019 at the former 378 Truck Stop site, located at 731 U.S. Highway 378, Edgefield, Edgefield County, South Carolina (**Figure 1**). The activities were conducted in accordance with the Monitoring Well Installation SSWP Approval and Notice to Proceed dated November 14, 2018 from the South Carolina Department of Health and Environmental Control (SCDHEC). The purpose of the activities was to further assess ground water quality for the site. The site is currently vacant and contains an abandoned building previously used as a truck stop and petroleum retail facility. Adjacent properties are currently used for residential purposes.

A release from the UST system was reported to the SCDHEC in October 1974 and confirmed in July 1996. Reportedly, one 550-gallon diesel UST, one 1,000-gallon gasoline UST and one 2,000-gallon gasoline UST as well as associated product piping and dispensers were removed from the site in January 1997. No USTs are currently in use at the site. Both Tier I and Tier II site assessments have been conducted at the site. To date, a total of 31 Type III monitoring wells (MW-1 through MW-31) and nine telescoping monitoring wells (TW-1 through TW-9) have been installed at the site and surrounding properties. A total of 16 water supply wells (WSW-1 through WSW-15 and WSW-X) have been identified within a 500-foot radius of the source area. Both AFVR and ground water sampling events have reportedly been conducted at the site since completion of the Tier II activities in 2010.

The last comprehensive ground water sampling event conducted at the site occurred in August 2017. Contaminants of concern (COCs) above their respective risk-based screening levels (RBSLs) have been reported in several monitoring wells at the site. This report summarizes the June 2019 soil assessment and ground water monitoring results.

## 2.0 FACILITY INFORMATION

- **Facility Name:** 378 Truck Stop
- **Location:** 731 U.S. Highway 378  
Edgefield, Edgefield County, SC 29824
- **UST Permit No.** 07960
- **Land Use:** Commercial
- **Property Owner:** Old Truck Stop, LLC  
102 Faulkner Mountain Road  
Edgefield, SC 29824

(803) 637-5422

- **UST Owner/Operator:** Wilkerson Oil Company  
Post Office Box 2835  
Rock Hill, South Carolina 29732  
(803) 324-4080
- **Site Rehabilitation Contractor:** Geological Resources, Inc. (GRI)  
3502 Hayes Road  
Monroe, North Carolina 28110  
(704) 845-4010  
Class 1, Certification Number 74
- **Drilling Contractor:** REDI  
Bryan Vest  
1 Piney Point  
Whispering Pines, North Carolina 28327  
(910) 690-6688  
Certification Number 2188-B
- **Laboratory:** SGS North America, Inc.  
4405 Vineland Road, Suite C-15  
Orlando, FL 32811  
(407) 425-6700  
State Certification Number: 96038001

**Release Information:**

- **Date Discovered:** October 1974
- **Estimated Amount of Release:** Unknown
- **Source of Release:** Leaking UST System
- **UST Size/Contents:** Two gasoline USTs and one diesel UST
  
- **Latitude:** 33.937110°North      **Longitude:** 81.951158° West

**3.0 WELL INSTALLATION**

On May 21 and May 22, 2019, two telescoping monitoring wells (TW-10 and TW-11) were installed. TW-10 was installed to a total depth of 65 feet with a screened interval of 5 feet. TW-11 was installed to a total depth of 60 feet with a screened interval of 5 feet. Copies of the subsurface logs, Well Construction Records and Well Development Forms have been included in **Appendix A**. GRI attempted to survey the top-of-casing elevations for TW-10 and TW-11 using existing top-of-casing elevation data previously established for the site. However, when shooting to previously surveyed reference points, the elevation data did not correlate with those known elevations. It is recommended that a comprehensive professional survey of the site and all top-of-casing elevations be conducted.

#### 4.0 GROUND WATER QUALITY

Twenty four Type III monitoring wells (MW-1 through MW-13, MW-17, MW-19 through MW-23, MW-25, MW-27 through MW-30) and nine telescoping monitoring wells (TW-1 through TW-5, TW-7, TW-8, TW-10 and TW-11) were gauged on June 12, 2019. Monitoring wells MW-14, MW-15, MW-16, MW-18, MW-24, MW-26, MW-31, TW-6 and TW-9 could not be located and were not sampled. All monitoring wells were purged and sampled on June 12 and June 13, 2019. The depths to ground water in the Type III monitoring wells during the June 12, 2019 gauging event ranged from 13.82 to 28.93 feet below the top of casings. Ground water elevations in the Type III monitoring wells relative to a temporary benchmark with an assumed datum of 100.00 feet ranged from 75.77 to 86.90 feet. Based on this data, ground water flow across the area was generally toward the southwest with a horizontal gradient of approximately 0.03 feet per foot. The depths to ground water in the telescoping monitoring wells during the June 12, 2019 gauging event ranged from 12.72 to 61.58 feet below the top of casings. Ground water elevations in the telescoping monitoring wells relative to a temporary benchmark with an assumed datum of 100.00 feet ranged from 78.80 to 85.30 feet. Based on this data, ground water flow across the area in the telescoping wells was generally toward the west with a horizontal hydraulic gradient of approximately 0.01 feet per foot. The vertical hydraulic gradient calculated for paired wells MW-1/TW-1, MW-3/TW-2, MW-9/TW-3, MW-10/TW-4, MW-12/TW-5, MW-17/TW-7 and MW-19/TW-8 were approximately 0.14 feet per foot downward, 0.045 feet per foot upward, 0.017 feet per foot upward, 0.035 feet per foot upward, 0.013 feet per foot downward, 0.017 feet per foot upward and 0.079 feet per foot upward, respectively. A Site Map showing the locations of the monitoring wells and the structures on-site has been included as **Figure 2**. Summaries of ground water elevation data for the June 2019 sampling event are presented in **Table 1**. Potentiometric Surface Maps for the Type III monitoring wells and the telescoping monitoring wells based on the June 2019 gauging data have been included as **Figures 3 and 4**.

Laboratory analyses were performed on the ground water samples collected from the monitoring wells during the June 2019 sampling event for BTEX, MTBE, naphthalene, 1,2-dichloroethane (1,2-DCA) and eight oxygenates using EPA Method 8260B and EDB using EPA Method 8011. Concentrations of BTEX constituents, naphthalene, 1,2-DCA and/or EDB that exceeded the RBSLs were reported in the ground water samples collected from MW-1, MW-2, MW-3, MW-7, MW-12, MW-13, MW-22, MW-29, MW-30, TW-1 and TW-2. Concentrations of the oxygenate TAA that exceeded the action level were reported in the samples collected from MW-1, MW-3, MW-7, MW-12, MW-13, MW-22, MW-29, MW-30, TW-1 and TW-2. A Ground Water Quality Map based on data from the June 2019 sampling event has been included as **Figure 5**. Summaries of ground water analytical results are presented in **Table 2** and **Table 3**. A

complete laboratory analytical report has been included as **Appendix B**. Field Data Information Sheets are attached as **Appendix C**. Historical ground water elevation data and historical ground water quality data have been included as **Appendix D**. Approximately 139 gallons of purge water was generated during the well development activities and the ground water sampling event. The purge water was transported to a licensed facility for disposal. A copy of the Disposal Manifest has been included as **Appendix E**.

## **5.0 SOIL ASSESSMENT**

On May 22, GRI personnel installed ten soil borings in an area on the east side of the former 378 Truck Stop structure. The area was reported to be previously used as a waste pit where used oil was dumped. Borings were installed to total depths ranging from five to ten feet below grade. Samples were collected at five-foot and/or ten foot intervals and screened with a PID. A soil sample was collected from the interval showing the highest PID reading and/or at the terminus of the boring. The soil samples were submitted for analyses of BTEX and naphthalene using Method 8260B, 5 PAHs using Method 8270D, and 8 RCRA Metals using Methods 6010D and 7471B. No detectable concentrations of Method 8260B or 8270D constituents were reported in any of the soil samples collected. Concentrations of arsenic that exceeded the U.S. EPA's Resident and Industrial Soil Screening Levels (SSLs) were reported in each soil sample collected. Concentrations of Barium, Chromium, Lead and/or Mercury were reported in the soil samples collected. However, none of the reported concentrations exceeded the Resident or Industrial SSLs for those metals. A Soil Quality Map based on the data from the May 22 soil assessment activities has been included as **Figure 6**. A summary of the soil sample analytical results is presented in **Table 4**. Subsurface boring logs are included in **Appendix A**. A complete laboratory analytical report is included in **Appendix B**.

## **6.0 QA/QC**

Soil sampling, monitoring well installation, development, gauging, purging and sampling was conducted in general accordance with the SCDHEC Programmatic QAPP and the approved site specific Contractor Addendum. All wells were purged and sampled with dedicated disposable bailers. All field measurement equipment was properly decontaminated between sampling locations. Duplicate samples from monitoring wells MW-3, MW-13, and MW-22 (MW-3 DUP A, MW-13 DUP B, and MW-22 DUP C) and one monitoring well field blank were collected during the sampling activities. Laboratory provided trip blanks for the monitoring well samples were included in the sample coolers. Laboratory results for each sample and their respective duplicate sample showed the same compounds at similar concentrations. No detectable concentrations of requested method constituents were reported in the field blanks or trip blanks. All applicable items on the Contractor Checklist were reviewed and verified. A copy of the Contractor

Checklist is included as **Appendix F**.

## **7.0 CONCLUSIONS AND RECOMMENDATIONS**

- Two telescoping monitoring wells, TW-10 and TW-11, were installed between May 21 and May 22, 2019. The total depths of the telescoping wells were 65 and 60 feet, respectively.
- Ten soil borings were installed in the former waste oil disposal pit on May 22, 2019. One soil sample was collected from each soil boring. Concentrations of arsenic that exceeded the Resident and Industrial SSLs were reported in each soil sample collected. Concentrations of Barium, Chromium, Lead and/or Mercury were reported in the soil samples collected. However, none of the reported concentrations exceeded the Resident or Industrial SSLs for those metals.
- Twenty four Type III monitoring wells and nine telescoping monitoring wells were gauged, purged and sampled between June 12 and June 13, 2019.
- Ground water flow in the Type III monitoring wells and telescoping monitoring wells across the site was generally towards the southwest and west, respectively. The horizontal hydraulic gradient across the site was approximately 0.03 feet per foot for the Type III monitoring wells and 0.01 feet per foot for the telescoping wells. The vertical hydraulic gradient calculated for paired Type III and telescoping monitoring wells varied from 0.79 feet per foot upward for MW-19/TW-8 to 0.14 feet per foot downward for MW-1/TW-1.
- Concentrations of BTEX constituents, naphthalene, 1,2-DCA and/or EDB that exceeded the RBSLs were reported in the ground water samples collected from MW-1, MW-2, MW-3, MW-7, MW-12, MW-13, MW-22, MW-29, MW-30, TW-1 and TW-2. Concentrations of the oxygenate TAA that exceeded the action levels were reported in the samples collected from MW-1, MW-3, MW-7, MW-12, MW-13, MW-22, MW-29, MW-30, TW-1 and TW-2.
- GRI makes the following recommendations:
  - A comprehensive site survey should be conducted to tie together all monitoring wells.
  - Due to the presence of water supply wells in the area, ground water sampling events should continue at the site.
  - AFVR events should be conducted on monitoring wells MW-1, MW-3, MW-7, MW-12, MW-13 and MW-22 to reduce the dissolved-phase contaminant concentrations in those wells.

## **8.0 LIMITATIONS**

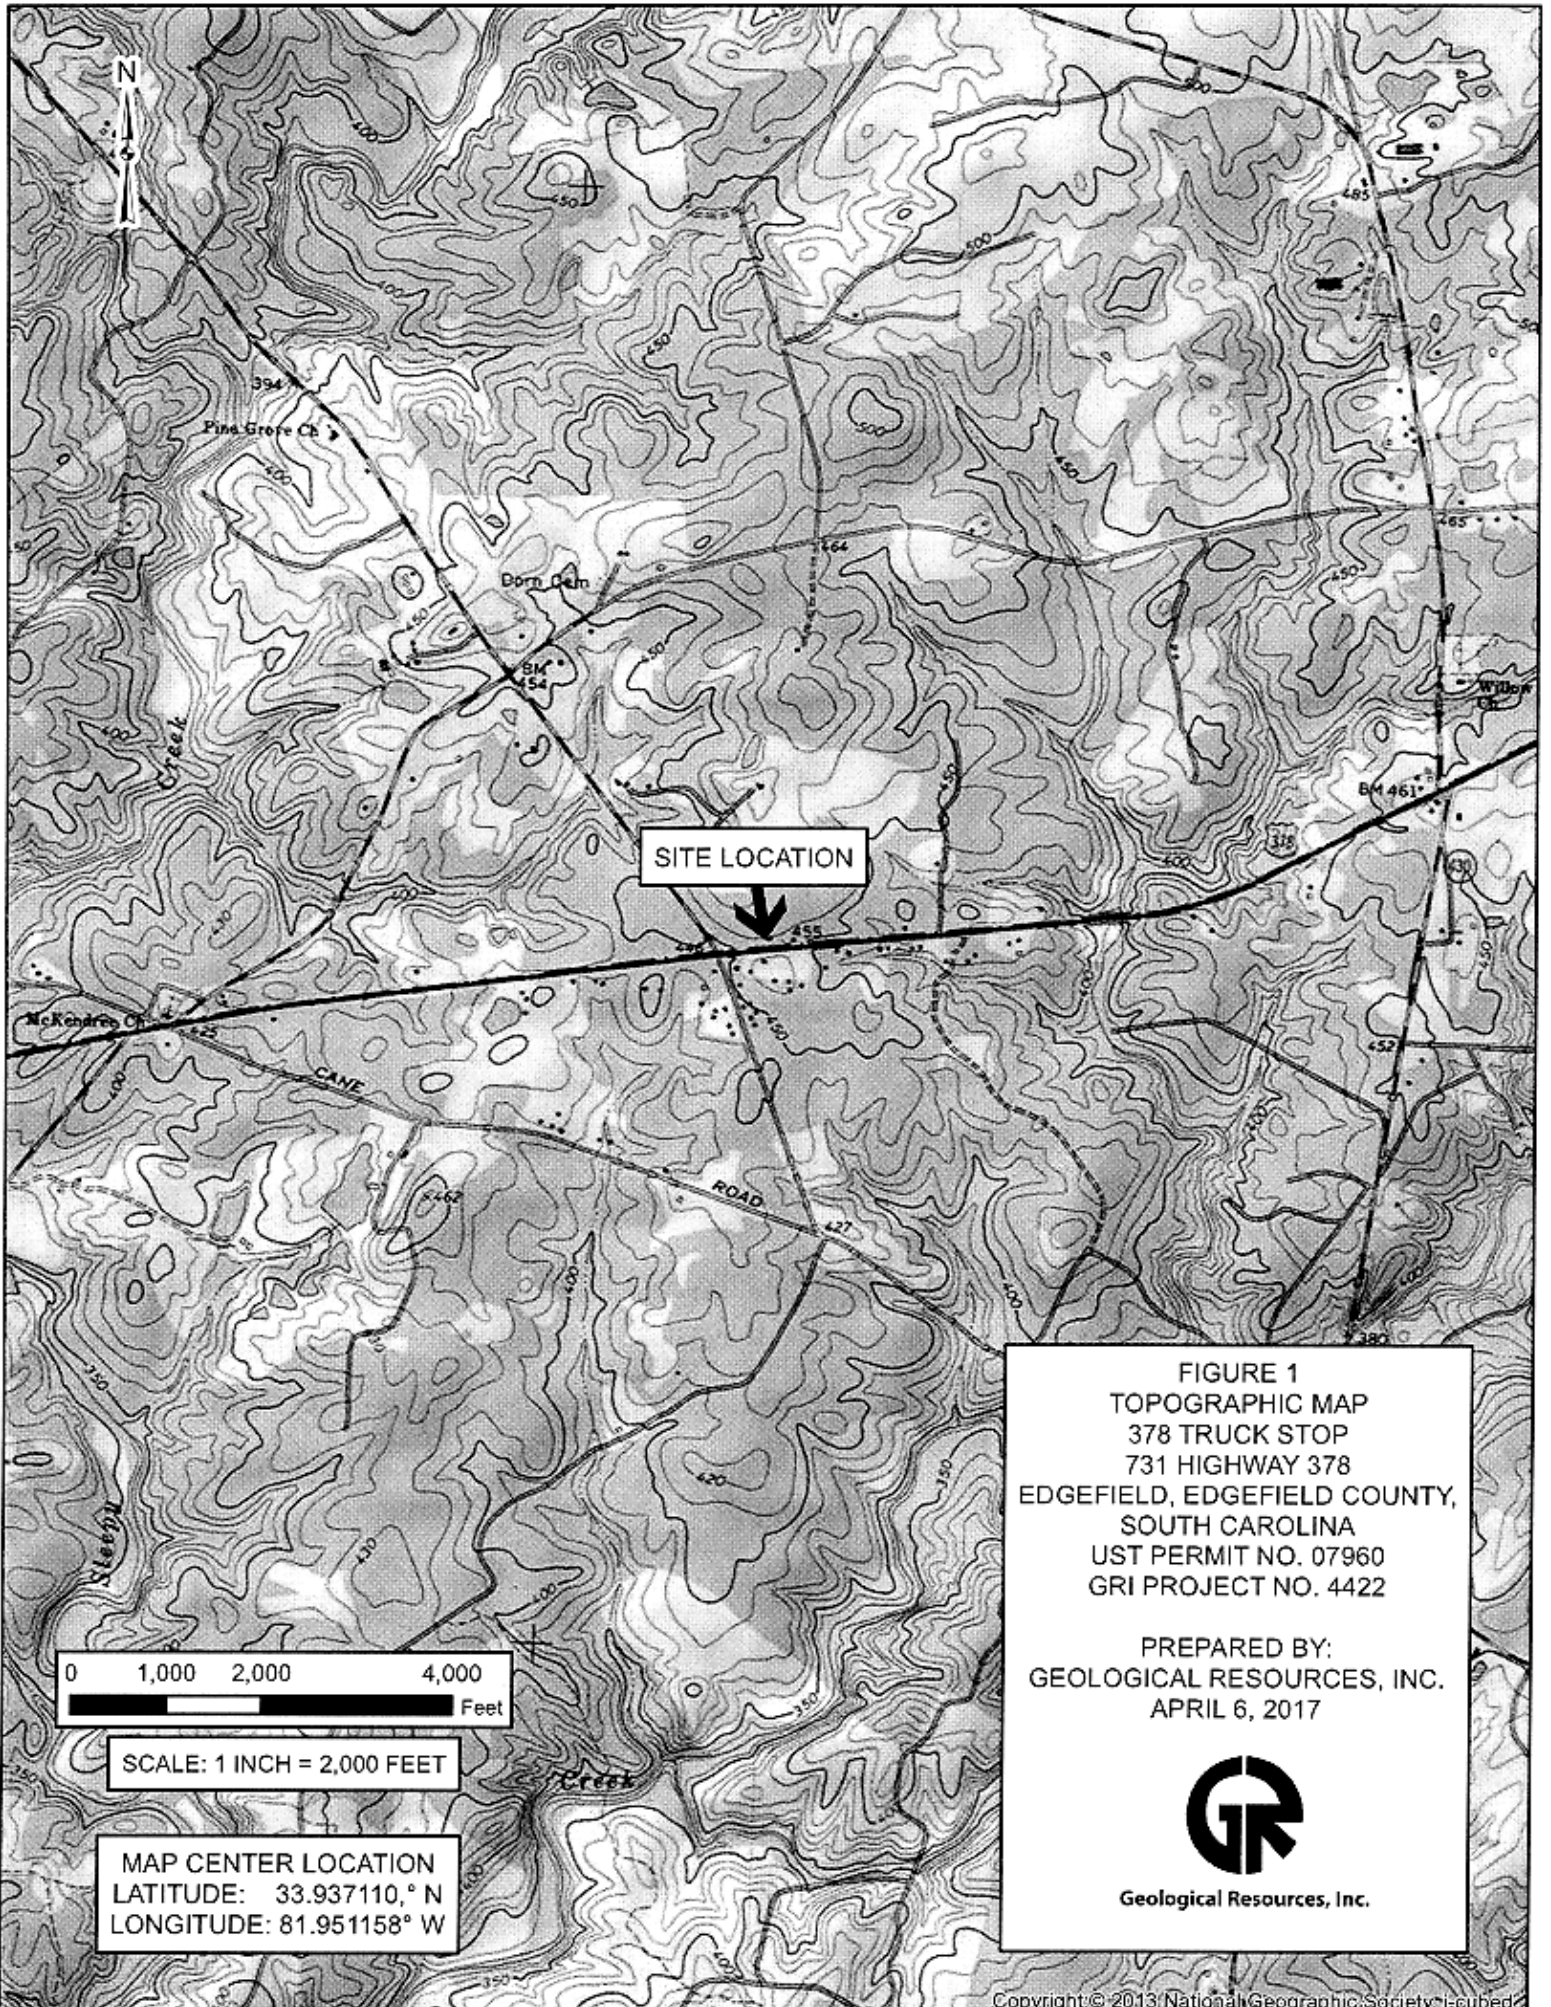

This report has been prepared for the exclusive use of Wilkerson Oil Company and the SCDHEC for specific application to the referenced site in Edgefield County, South Carolina. The assessment was

conducted based on the scope of work and level of effort specified by the SCDHEC and with resources adequate only for that scope of work. Our findings have been developed in accordance with generally accepted standards of geology and hydrogeology practices in the State of South Carolina, available information, and our professional judgment. No other warranty is expressed or implied.

The data that are presented in this report are indicative of conditions that existed at the precise locations sampled and at the time the samples were collected. In addition, the data obtained from samples would be interpreted as being meaningful with respect to parameters indicated in the laboratory report. No additional information can logically be inferred from these data. Please note that certain information contained in this report was not obtained under the direct supervision of GRI personnel. Therefore, GRI cannot verify the accuracy of this information. However, for the purpose of this report, GRI assumes the information is correct.

Notes:

- Monitoring well samples analyzed for BTEX constituents, MTBE, naphthalene & 1,2-DCA by Method 8260B and EDB by Method 8011; results reported in µg/l.
- Water supply well samples analyzed for BTEX constituents, MTBE, naphthalene & 1,2-DCA by Method 524.2 and EDB by Method 504.1; results reported in µg/l.
- Concentrations in bold face type exceeded the RBSLs.
- RBSL: Risk-Based Screening Levels.
- J: Estimated value
- NS: Not sampled.

Notes:

- Analyses for selected oxygenates by EPA Method 8260B; results reported in µg/l.
- <: Less than the method detection limit specified in the laboratory report.
- J: Estimated concentrations less than the Reporting Limit but greater than or equal to the Method Detection Limit.
- NS: Not sampled.
- NE: Not established.

Notes:

- Concentrations reported in milligrams per kilogram (mg/kg).
- SSL: Soil Screening Level from EPA's Regional Screening Levels - Generic Tables.
- Concentrations in bold face type exceeded Resident SSLs.
- Concentrations in italic type exceeded Industrial SSLs.
- <: Concentration is less than method detection limit specified in the laboratory report.

Results < IDL are shown as zero for calculation purposes

(\*) Outside of QC limits

(N) Matrix Spike Rec. outside of QC limits

(anr) Analyte not requested

(a) Sample dilution required due to difficult matrix.

(b) RPD acceptable due to low duplicate and sample concentrations.

(c) Spike recovery indicates possible matrix interference and/or sample non-homogeneity.
