Introduction

For the purpose of these guidelines, the term Emergency Medical Technician (EMT) is inclusive of all levels of certified EMTs in South Carolina. At the present time, South Carolina recognizes three levels of EMT certification:

- EMT (Basic Emergency Medical Technician)
- AEMT/I-85 (Advanced Emergency Medical Technician or Intermediate 85)
- Paramedic (Paramedic)

Certification as an EMR - First Responder (Emergency Medical Responder) is not currently recognized as a certified level in South Carolina and does not fall under South Carolina Laws and Regulations pertaining to EMS.

In order to gain certification as an EMT in South Carolina, you must meet the following requirements:

1. You must hold a valid credential as listed above with at least one year of valid certification remaining in any US state or US territory
   - OR -
   You must hold a current National Registry Credential as an EMT

2. You must hold a current CPR credential*.

3. In addition to the above, Paramedics must also hold a current ACLS credential**.

*Currently, South Carolina only accepts the following CPR (Provider or Instructor) credentials for the purpose of EMT certification:

- American Heart Association (AHA) BLS for the Healthcare Provider
- American Red Cross (ARC) CPR for the Professional Rescuer
- American Safety & Health Institute (ASHI) CPR Pro

**Currently, South Carolina only accepts the following ACLS (Provider or Instructor) credentials for the purpose of EMT certification:

- American Heart Association (AHA) Advanced Cardiac Life Support

For the purposes of EMT certification, South Carolina does not recognize “on-line” courses such as e-ACLS, etc.
