Dam (D_0958) Action Plan

June 24, 2015

John A. Poole, PE
Steve Hauptman
DHEC
Via Email

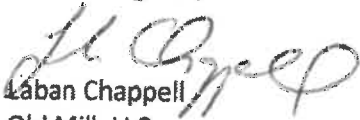

Dear Sirs,

Per your request I am contacting you following the inspection of the above referenced Dam under my ownership and control. Below is my current action plan to remediate the sinkhole that appeared recently.

1. Hired Rich Wargo with Schnabel Engineering last week. Rich made his site visit this past weekend and he will be furnishing me with his results and recommendations this week.
2. Lake level is being kept below the penstock area at the cause of the sinkhole.
3. Will be reviewing Rich's recommendations once received and will file a Permit Application Package with your office once we know the proper repairs to be made.
4. I'm requesting at this point if I can move forward with removing excessive growth of shrubs and such from the banks of the Dam. My intent is to keep grass and such on the banks going forward and maintain it in that state.
5. Developing an Emergency Action Plan for your review and suggestions.

Thank you for your time and please let me know any questions, thoughts or suggestions in the meantime.

Kindest Regards,

Laban Chappell
