SIMON Manual Vaccine Inventory Reconciliation Checklist

Instructions: Follow this checklist when you are ready to balance and close your VFC inventory reconciliation within SIMON.

It is important that you count your *Physical Count* at the end or beginning of the work day on your reconciliation *Count Date* when all vaccine activity has been completed, or at the beginning of the next work day before vaccine activity occurs.

Reconcile your inventory on at least a **MONTHLY** basis, regardless of how often you order vaccine.

Tips for counting vaccine inventory:

- Pick a reconciliation *Count Date* that works well with your clinic's workflow. For example, if your clinic stops giving vaccinations early on a particular day of the week, this may be a good time to count the vaccine inventory in your refrigerator and enter the count in the *Physical Count* column of your reconciliation in SIMON.
- Have two staff members do the vaccine inventory physical count to minimize counting errors. For example, one person could count while the other records the number.
- Double check the vaccine inventory lot numbers to verify that your count is correct for each lot number.

SIMON Manual Inventory User Checklist	Check
(You enter the immunizations administered directly into	When
SIMON)	Completed
If you have Pending VTrckS Shipments, make sure you Receive	
these shipments from the Vaccine Inventory On-Hand screen	
in SIMON.	
If you have Pending Incoming Inventory Transfers, make sure	
you Receive these transfers from the Vaccine Inventory	
OnHand screen in SIMON.	
Make sure that all vaccinations that were administered prior	
to your Count Date have been entered into SIMON.	
Make sure you zero out any remaining expired doses of	_
vaccine inventory. (This vaccine(s) will appear in <i>Red</i> on your	
reconciliation.)	
Enter your vaccine inventory physical count for each vaccine	—
lot number in the Physical Count column on your	
reconciliation.	

Tip: Make sure your *Physical Count* is accurate as it carries forward to your next reconciliation. If you have zeros in your *Physical Count* column, make sure this is intentional and not because you forgot to enter your physical dose count.

Click the *Update* button once you have entered all of your information into your reconciliation screen. This will recalculate the *Inventory Difference* column on your reconciliation.

1	-

Tip: It is best practice to have a zero in the *Inventory Difference* because this means that you have been able to successfully account for all of your inventory. Before closing your reconciliation, review any vaccine inventory items that have an *Inventory Difference* greater than zero, as these will become *Unaccounted for* doses once you close your reconciliation. *Unaccounted for* doses will either be added to your SIMON *On-Hand Inventory* (if they are positive) or subtracted from your SIMON *On-Hand Inventory* (if they are negative.)

Please note: An effort should be made to determine what has happened to those doses that are *Unaccounted for*, so that you can make the appropriate adjustments before closing your reconciliation. Having more than 5 percent of *Unaccounted for* doses may prevent you from ordering VFC vaccine in the future pending a review by a VFC staff member.

Remember: SIMON will *NOT* allow you to close a reconciliation with a *Delta* greater than +/-10 for private funded vaccine and +/- 0 for public funded vaccine.

Questions? Contact the SIMON Help Desk **BEFORE** making extensive vaccine inventory adjustments as this can make it more difficult to troubleshoot problems.

Close your reconciliation by clicking the drop-down arrow		
near the Update button and click Close Reconciliation		
Tip: If you are unable to close your reconciliation, please contact the SIMON Help Desk at
